"Code of Massachusetts regulations, 2005" ,2005 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 **Official Gazette of the United States Patent and Trademark Office** ,2006 *Calendars and Years* John M. Steele,2007-10-08 Dates form the backbone of written history But where do these dates come from Many different calendars were used in the ancient world Some of these calendars were based upon observations or calculations of regular astronomical phenomena such as the first sighting of the new moon crescent that defined the beginning of the month in many calendars while others incorporated schematic simplifications of these phenomena such as the 360 day year used in early Mesopotamian administrative practices in order to simplify accounting procedures Historians frequently use handbooks and tables for converting dates in ancient calendars into the familiar BC AD calendar that we use today But very few historians understand how these tables have come about or what assumptions have been made in their construction The seven papers in this volume provide an answer to the question what do we know about the operation of calendars in the ancient world and just as importantly how do we know it Topics covered include the ancient and modern history of the Egyptian 365 day calendar astronomical and administrative calendars in ancient Mesopotamia and the development of astronomical calendars in ancient Greece This book will be of interest to ancient historians historians of science astronomers who use early astronomical records and anyone with an interest in calendars and their development **Encyclopedia of Time** H. J. Corfield,2007-01-01 In this lively comedy of love and money in sixteenth century Venice Bassanio wants to impress the wealthy heiress Portia but lacks the necessary funds He turns to his merchant friend Antonio who is forced to borrow from Shylock a Jewish moneylender When Antonio s business falters repayment becomes impossible and by the terms of the loan agreement Shylock is able to demand a pound of Antonio s flesh Portia cleverly intervenes and all ends well except of course for Shylock Mercury ,2004 Mercury gives informed perspectives on salient issues in research education history and public policy relating to astronomy *AGS Quarterly* ,2003 *Jet* ,2004-05-24 The weekly source of African American political and entertainment news *Home Needlework Magazine* ,1908 Creation and Destruction David Toshio Tsumura,2005-01-01 In 1989 David Tsumura published a monograph entitled The Earth and the Waters in Genesis 1 and 2 A Linguistic Evaluation in which he demonstrated that the oft recited claim that the early chapters of Genesis betrayed a background or adaptation by Israel of mythological terms and or motifs from other ancient Near Eastern literature could not be supported by a close examination of the linguistic data Despite the book s positive reception the notion that the Chaoskampf motif lies behind the early chapters of Genesis continues to be rehearsed in the literature as if the data were incontrovertible In this revised and expanded edition of the 1989 book Tsumura carries the discussion forward In part 1 the general thesis of the original work is restated in a significantly revised and expanded form in the second part of this monograph he expands the scope of his research to include a number of poetic texts outside the Primeval History texts for which scholars often have posited an ancient Near Eastern mythological substratum Among the questions asked are the following What are the functions of waters and flood in biblical poetry Do the so called chaos dragons in the Old Testament such as Leviathan Rahab and Yam have anything to do with the creation motif in the biblical tradition What is the relationship between these poetic texts and the Ugaritic myths of the Baal Yam conflict Are Psalms 18 and 29 adaptations of Canaanite hymns as suggested by some scholars Among the conclusions that Tsumura reaches are these 1 The phrase *tohu wabohu* has nothing to do with the idea of a chaotic state of the earth 2 The

term *tehom* in Gen 1 2 is a Hebrew form derived from the Proto Semitic *tiham* ocean and it usually refers to the underground water that was overflowing and covering the entire surface of the earth in the initial state of creation 3 The earth water relationship in Gen 2 5 6 is different from that in Gen 1 2 In Gen 1 2 the earth was totally under the water in Gen 2 5 6 only a part of the earth the land was watered by the *ed* water which was overflowing from an underground source 4 The biblical poetic texts that are claimed to have been influenced by the Chaoskampf motif of the ancient Near East in fact use the language of storms and floods metaphorically and have nothing to do with primordial combat

Time and Space in Ancient Myth, Religion and Culture SNF-Projekt, Menelaos Christopoulos, Athina Papachrysostomou, 2017-10-10 From Homer to Sophocles and Greek Middle Comedy and from Plato and Protagoras to Ovid this volume features a panoramic and cross generic overview of the diverse handling and ad hoc elaboration of the overarching literary notions of time and space The twenty one contributions of this volume written by an international group of esteemed scholars provide an equal number of hermeneutic approaches to individual distinct aspects of Greek and Latin literature The volume is purposely designed not as a linear display of knowledge but rather as an anthology of select paradigms that aim to demonstrate the multidimensional function and multifaceted role of the twin notions of time and space throughout ancient Greek and Latin literary texts The volume opens with analyses of conspicuous cases from epic poetry proceeds with examples from drama tragedy and comedy and concludes with diverse instances of chronotopes empirical imaginary and even shifting ones in various literary genres The volume is of greatest relevance since it meets the cultural and theoretical trends of today's Classics It therefore will attract not only the interest of specialised Classicists but it is also intended for a wider general readership

Calendrical Calculations Nachum Dershowitz, Edward M. Reingold, 2008 Expanded coverage includes generic cyclical calendars astronomical lunar calendars and the Korean Vietnamese Aztec and Tibetan calendars

Maya Calendar Origins Prudence M. Rice, 2009-02-17 In *Maya Political Science Time Astronomy and the Cosmos* Prudence M Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the *May* This fundamental connection between timekeeping and Maya political organization sparked Rice's interest in the origins of the two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In *Maya Calendar Origins* she presents a provocative new thesis about the origins and development of the calendrical system Integrating data from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars developed about a millennium earlier than commonly thought around 1200 BC as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers who could thereby claim control over supernatural cosmic forces Rice shows how time became materialized transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as

politicized becoming the foundation for societal order political legitimization and wealth Rice's research also sheds new light on the origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems The Rural New-Yorker, 1927
