Optimum Currency Areas: A Monetary Union for Southern Africa Christian Sorgenfrei, 2011-03 With the current situation in the European Monetary Union in mind a Monetary Union in other parts of the world seems highly inadvisable Nevertheless Africa has some of the oldest Monetary arrangements in the world dating back to the beginning of the 19th century Is Africa particularly qualified for a Monetary Union And furthermore what features are necessary to make Monetary Arrangements between countries enduring This study evaluates the prospects and the feasibility of a monetary union in the Southern African Development Community SADC from an economic point of view Both the theory of optimum currency areas and the recent example of the European Monetary Union are employed to analyze the pros and cons of monetary unification The theoretical implications are operationalized first by a broad analysis of economic and socio graphic data and second by estimating the degree of structural shock synchronization between SADC countries Results obtained by an Autoregressive and Vector Autoregressive model indicate that a monetary union which includes all SADC members is neither desirable nor feasible in the foreseeable future However the study concludes that a small subset of countries including South Africa Namibia Swaziland Lesotho Mozambique Botswana and Zambia could gain from forming a smaller monetary union

Optimum Currency Areas: Is Southern Africa ready to form a Monetary Union? Christian Sorgenfrei, 2010-11-18 Inhaltsangabe Introduction and Course of Work In 2007 at their meeting in Tanzania the central bank governors of the Southern African Development Community SADC laid out a strategy to strengthen regional integration containing the development of a common market by 2015 fixed exchange rates by 2016 and ultimately a monetary union with a single currency in 2018 In pursuit of this agenda a free trade area absent of intra regional tariffs was arranged in August 2008 with a regional customs union to follow this year The currently fourteen member countries of the SADC committed themselves towards achieving economic convergence and to deepen monetary cooperation In the 21st century Africa finds itself increasingly separated from economic developments in the remaining world and fails to prosper from increased globalization Despite a large abundance in natural resources many countries have suffered from an extremely poor economic performance which mainly originated from internal strives and weak and distortionary policies Inward looking governments conducting clientele policies are focused on reaping economic rents rather than on fostering growth Furthermore tribal conflicts and civil war have sparked recurring border conflicts with neighboring countries Although Africa has seen a large number of regional arrangements and trading blocs throughout the continent the overall success for growth and trade expansion was limited Against this background the formation of a monetary union is believed to counteract economic and political weaknesses to improve regional cooperation and to enhance both the political and economic standing in the world A

monetary union and a common currency entails both gains and losses for its members On the cost side countries in a monetary union effectively lose the ability to pursue independent monetary policies and to use the exchange rate as adjustment instrument to stabilize the economy On the other hand countries inside a monetary union benefit from reduced transaction costs and the elimination of internal exchange rate volatility Furthermore countries which suffer from weak internal stability and high inflation rates benefit by using the fixed exchange rate in a monetary union as external anchor By transferring the power over monetary policy to a supranational central bank the risk of homegrown inflation and currency devaluations is banished and economic agents are able to borrow at more
