Dodsworth,2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online offering researchers academics and students with information on how to locate and access the large variety of resources new and old Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material

Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources. Additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites. Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level. This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets. Moulton, 1987-06-01. When the Atlas of the Lewis and Clark Expedition appeared in 1983, critics hailed it as a publishing landmark in western history. Fully living up to the promise of the first volume were the second volume which began the actual journals and brought the expedition through its first year to August 1804 and the third volume which brought the explorers through a winter at Fort Mandan, present North Dakota, and to April 1805. This eagerly awaited fourth volume begins on April 7, 1805, when Meriwether Lewis and William Clark and their permanent party set out from Fort Mandan traveling up river along the banks of the Missouri. For the first time they entered country never explored by whites. With the help of the Shoshone Indian woman Sacagawea, they hoped to make friendly contact with her people, then cross the Rocky Mountains and eventually reach the Pacific. They were to spend the rest of the spring and the early summer toiling up the Missouri or around its perilous falls. Along the way they encountered grizzly bears, cataloged new species of plants and animals and mapped rivers and streams. Sacagawea recognized landmarks, meeting her people became the next great concern of the expedition when they reached the three forks of the Missouri in late July. Superseding the last edition published early in this century, the current edition contains new materials discovered since then. It expands and updates the annotation to take account of the most recent scholarship on the many subjects touched on by the journals. **The Definitive Journals of Lewis & Clark: From Fort Mandan to Three Forks** Meriwether Lewis, William Clark, Gary E. Moulton, Thomas W.

Dunlay, 2002-01-01. Since the time of Columbus, explorers dreamed of a water passage across the North American continent. President Thomas Jefferson shared this dream. He conceived the Corps of Discovery to travel up the Missouri River to the

Rocky Mountains and westward along possible river routes to the Pacific Ocean Meriwether Lewis and William Clark led this expedition of 1804 6 Along the way they filled hundreds of notebook pages with observations of the geography Indian tribes and natural history of the trans Mississippi West In April 1805 Lewis and Clark and their party set out from Fort Mandan following the Missouri River westward This volume recounts their travels through country never before explored by white people With new personnel including the Shoshone Indian woman Sacagawea her husband Toussaint Charbonneau and their baby nicknamed Pomp the party spent the rest of the spring and early summer toiling up the Missouri Along the way they portaged the difficult Great Falls encountered grizzly bears cataloged new species of plants and animals and mapped rivers and streams
