Working as Indigenous Archaeologists George Nicholas, Joe Watkins, 2024-09-30 *Working as Indigenous Archaeologists* explores the often contentious relationship between Indigenous and other formerly colonized peoples and Archaeology through their own voices Over the past 35 plus years the once novel field of Indigenous

Archaeology has become a relatively familiar part of the archaeological landscape. It has been celebrated, criticized, and analyzed as to its practical and theoretical applications and its political nature. No less important are the life stories of its Indigenous practitioners. What has brought some of them to become practicing archaeologists or heritage managers? What challenges have they faced from both inside and outside their communities? And why haven't more pursued Archaeology as a vocation or avocation? This volume is a collection of 60 autobiographical chapters by Indigenous archaeologists and heritage specialists from around the world: some community based, some academic, some in other realms, who are working to connect past and present in meaningful and especially personal ways. As Archaeology continues to evolve, there remain strong tensions between an objective, science-oriented, evidentiary-based approach to knowing the past and a more subjective, relational, humanistic approach informed by local values, traditional knowledge, and holistic perspective. While there are no maps for these new territories, hearing directly from those Indigenous individuals who have pursued Archaeology reveals the pathways taken. Those stories will provide inspiration and confidence for those curious about what lies ahead. This is an important volume for anyone interested in the present state and future of the archaeological discipline.

The History of Archaeology Paul Bahn, 2014-01-10. The History of Archaeology: An Introduction provides global coverage with chapters devoted to particular regions of the world. The regional approach allows readers to understand the similarities and differences in the history of and approach to archaeology in various parts of the world. Each chapter is written by a specialist scholar with experience of the region concerned. Thus the book focuses on the earliest beginnings of archaeology in different parts of the world and how it developed from being a pastime for antiquarians and collectors to a serious attempt to obtain information about past societies. Woven into the text are various boxes that explore key archaeologists, sites, and important discoveries in the history of archaeology, enriching the story of the discipline's development. With such far-ranging coverage, including an exploration of the little-covered development of Russian and Chinese archaeology, *The History of Archaeology* is the perfect introduction to the history of archaeology for the interested reader and student alike.

Bridging the Divide Caroline Phillips, Harry Allen, 2016-09-16. The collected essays in this volume address contemporary issues regarding the relationship between Indigenous groups and archaeologists, including the challenges of dialogue, colonialism, the difficulties of working within legislative and institutional frameworks, and NAGPRA and similar legislation. The disciplines of archaeology and cultural heritage management are international in scope, and many countries continue to experience the impact of colonialism. In response to these common experiences, both archaeology and Indigenous political movements involve international networks through which information quickly moves around the globe. This volume reflects these dynamic dialectics between the past and the present and between the international and the local, demonstrating that archaeology is a historical science always linked to contemporary cultural concerns.

Cultural Heritage Management in China Hilary Du Cros, Yok-shiu F. Lee, 2007-03-27. This innovative study presents a thematic examination of the development of cultural

heritage management CHM in an Asian context offering valuable insights into Asian culture and society Cultural Tourism Hilary du Cros, Bob McKercher, 2014-12-05 Cultural Tourism remains the only book to bridge the gap between cultural tourism and cultural and heritage management The first edition illustrated how heritage and tourism goals can be integrated in a management and marketing framework to produce sustainable cultural tourism The current edition takes this further to base the discussion of cultural tourism in the theory and practice of cultural and heritage management CM and CHM under the understanding that for tourism to thrive a balanced approach to the resource base it uses must be maintained An umbrella approach to cultural tourism represents a unique feature of the book proposing solutions to achieve an optimal outcome for all sectors Reflecting the many important developments in the field this new edition has been completely revised and updated in the following ways New sections on tangible and intangible cultural heritage and world heritage sites Expanded material on cultural tourism product development the cultural tourism market and consumer behaviour planning and delivery of exceptional experiences New case studies throughout drawn from cultural attractions in developing countries such as Southeast Asia China South Africa and the Pacific as well as from the developed world particularly the United States Britain Japan Singapore Australia and Canada Written by experts in both tourism and cultural heritage management this book will enable professionals and students to gain a better understanding of their own and each other's roles in achieving sustainable cultural tourism It provides a blueprint for producing top quality long term cultural tourism products

Questioning Collapse Patricia A. McAnany, Norman Yoffee, 2009-09-28 Questioning Collapse challenges those scholars and popular writers who advance the thesis that societies past and present collapse because of behavior that destroyed their environments or because of overpopulation In a series of highly accessible and closely argued essays a team of internationally recognized scholars bring history and context to bear in their radically different analyses of iconic events such as the deforestation of Easter Island the cessation of the Norse colony in Greenland the faltering of nineteenth century China the migration of ancestral peoples away from Chaco Canyon in the American southwest the crisis and resilience of Lowland Maya kingship and other societies that purportedly collapsed Collectively these essays demonstrate that resilience in the face of societal crises rather than collapse is the leitmotif of the human story from the earliest civilizations to the present Scrutinizing the notion that Euro American colonial triumphs were an accident of geography Questioning Collapse also critically examines the complex historical relationship between race and political labels of societal success and failure

Cultural Tourism bob Mckercher, hilary du cros, 2012-10-02 Examine cultural tourism issues from both sides of the industry Unique in concept and content Cultural Tourism The Partnership Between Tourism and Cultural Heritage Management examines the relationship between the sectors that represent opposite sides of the cultural tourism coin While tourism professionals assess cultural assets for their profit potential cultural heritage professionals judge the same assets for their intrinsic value Sustainable cultural tourism can only occur when the two sides form a true partnership based on

understanding and appreciation of each other's merits. The authors, one a tourism specialist and the other a cultural heritage management expert, present a model for a working partnership with mutual benefits, integrating management theory and practice from both disciplines. *Cultural Tourism* is the first book to combine the different perspectives of tourism management and cultural heritage management. It examines the role of tangible physical evidence of culture and intangible continuing cultural practices, knowledge, and living experiences. Heritage describes the differences between cultural tourism products and cultural heritage assets and develops a number of conceptual models, including a classification system for cultural tourists, indicators of tourism potential at cultural and heritage assets, and assessment criteria for cultural and heritage assets with tourism potential. *Cultural Tourism* examines the five main constituent elements involved in cultural tourism: cultural and heritage assets in tourism sites such as the Royal Palace in Bangkok, the Cook Islands, and Alcatraz Prison in San Francisco; tourism: what it is, how it works, and what makes it a success; five different types of cultural tourists; consumption of products; value adding and commodification. Integrating the first four elements to satisfy the tourist, meet the needs of the tourism industry, and conserve the intrinsic value of the asset. Though tourism and cultural heritage management professionals have mutual interests in the management, conservation, and presentation of cultural and heritage assets, the two sectors operate on parallel planes, maintaining an uneasy partnership with surprisingly little dialogue. *Cultural Tourism* provides professionals and students in each field with a better understanding of their own roles in the partnership, bridging the gap via sound planning, management, and marketing to produce top quality, long-lasting cultural tourism products. Now translated into simplified Chinese.

Drive Tourism Bruce Prideaux, Dean Carson, 2010-11-03 This book is the first attempt to provide a global comprehensive review and scholarly investigation into Drive Tourism, which is a popular and growing form of tourism.

Tourism Leszek Butowski, 2016-05-04 Tourism is that area of activity of contemporary man that touches on various fields of human interest. Representatives of numerous academic disciplines find it intriguing for its exceptionally interdisciplinary character. Conditions for and consequences of the development of tourism are investigated, among others, by economists, geographers, sociologists, experts in culture, anthropologists, management and social policy specialists, and even by representatives of some natural sciences. Researchers dealing with tourism need to meet strict methodological requirements, but they get access to a very interesting subject of scientific inquiry which combines social, cultural, economic, and environmental aspects to create an ontologically new quality, offering epistemological challenges.
