This philosophical investigation challenges existing literary and rhetorical perspectives on intention and offers a new framework for understanding the negotiation of meaning It describes how an audience s intentions affect their interpretations shows how audiences negotiate meaning when faced with a writer s undecipherable intentions and defines the scope of understanding within rhetorical situations Introducing a concept of intention into literary analysis that supersedes existing rhetorical theory Arabella Lyon shows how the rhetorics of I A Richards Wayne Booth and Stanley Fish as well as the hermeneutics of Hans Georg Gadamer fail to account for the complex interactions of author and audience Using Kenneth Burke's concepts of form motive and purpose she builds a more complex notion of intention than those usually found in literary studies then employs her theory to describe how philosophers read Wittgenstein's narratives metaphors and reversals in argument Lyon argues that our differences in intention prevent consistency in interpretations but do not stop our discussions deliberations and actions She seeks to acknowledge difference and the communicative problems it creates while demonstrating that difference is normal and does not end our engagement with each other Intentions combines recent work in philosophy literary criticism hermeneutics and rhetoric in a highly imaginative way to construct a theory of intention for a postmodern rhetoric It recovers and renovates central concepts in rhetorical theory not only intention but also deliberation politics and judgment Remaking Transitional Justice in the United States James Edward Beitler III,2012-11-09 Remaking Transitional Justice in the United States The Rhetoric of the Greensboro Truth and Reconciliation Commission

explores rhetorical attempts to authorize the Greensboro Truth and Reconciliation Commission a grassroots U S based truth commission created in 2004 toredress past injustices in the city Through detailed rhetorical analyses the book demonstrates that the development of the field of transitional justice has given rise to a transnational rhetorical tradition that provides those working in the field with series of enabling constraints The book then shows how Greensboro stakeholders attempted to reaccentuate this rhetorical tradition in their rhetorical performances to construct authority and bring about justice even as the tradition shaped their discourse in ways that limited the scope of their responses Calling attention to the rhetorical interdependence among practitioners of transitional justice this study offers insights into the development of transitional justice in the United States and in grassroots contexts in other liberal democracies The volume is a relevant quide to scholars and practitioners of transitional justice as it brings into relief mechanisms of transitional justice that are frequently overlooked namely rhetorical mechanisms It also speaks to any readers who may be interested in the communicative strategies tactics that may be employed by grassroots transitional justice initiatives Films as Rhetorical *Texts* Janice D. Fletcher, 2023-10-10 English language arts teachers often find themselves defending their discipline and the practical values it has When will I read this again is an all too common question heard in classrooms Author Jennifer Fletcher faced the same questions and more In Teaching Literature Rhetorically Transferable Literacy Skills for 21st Century Students she shows you how to help your students develop transferable literacy skills that allow them to succeed not just in their English language arts classes but in their future lives and careers The book is built around eight high utility literacy skills and practices that will help students communicate effectively and with confidence as they navigate important transitions in their lives Integrating skills and knowledge from texts Reading closely and critically Assessing rhetorical situations Negotiating different perspectives Developing and supporting a line of reasoning Analyzing genres Communicating with self and others in mind Reading and writing with passion Teaching Literature Rhetorically offers readers writing prompts readings discussion questions graphic organizers as well as examples of student work and activities for helping students to understand key rhetorical concepts As Fletcher writes in her introduction rhetorical thinking promotes the transfer of learning the single most important goal we can have as teachers if we hope to have a positive impact on our students lives This book will help <u>Understanding Rhetoric</u> Eamon M. Cunningham, 2020-01-01 Understanding Rhetoric A teachers everywhere do just that Guide to Critical Reading and Argumentation is a composition textbook that outlines three essential skills rhetoric argument and source based writing geared towards newcomers and advanced students alike Though comprehensive in its coverage the book s focus is a simple one how to move beyond a gut reaction while reading to an articulation of what is effective and what is not while explicitly answering the most important question of Why This text gets at this central concern in two fundamental ways First the text teaches composition as a cumulative process coaching you how to question challenge and expand on not just the readings you hold in your hands but also how to interrogate the internal processes of writing and thinking The book s blend of composition methods detail the cross point of product and process to turn reading and writing from a matter of coming up with answers to questions to learning what type of questions need to be asked in the first place The right questions the text argues are fundamentally rhetorical in nature Second the content of the practice based chapters is framed into a larger mesh of intellectual history to show how the writing and thinking you are doing today is continuous with a long history of writing instruction that goes back to the ancient world This book provides equal representation from classical and contemporary theory with the recognition that theory cannot be fully grasped without practice and practice cannot be fully understood without its theoretical antecedent After all you can t write outside the box until you know where the box is and what it looks like
