Reading Matters Narrative In The New Media Ecology:

Reading Matters Joseph Tabbi, Michael Wutz, 2018-05-31 The convergence of twentieth century narrative and technology is one of the most important developments in current literary study A decade after the founding of the Society for Literature and Science and the appearance of such influential books as Kathleen Woodward's *Culture of Information* and William Paulson's *The Noise of Culture* Joseph Tabbi and Michael Wutz have edited a landmark volume to summarize this still emerging field Twelve original essays and the editors' introductory overview show how these theoretical concerns can contribute to the practical study of narrative *Reading Matters* covers the range of contemporary literature from the canonical novels of high modernism and postmodernism through subjects new to the academic agenda such as cyberpunk and hypertext fiction In an age that has proclaimed the death of the novel many times over the contributors argue persuasively for the continued vitality of literary narrative By responding in ingenious ways to the capabilities of other media they assert the novel has enlarged and redefined its territory of representation and its range of techniques and play while maintaining its viability in the new media assemblage

Narrative Across Media Marie-Laure Ryan, 2004-01-01 Narratology has been conceived from its earliest days as a project that transcends disciplines and media The essays gathered here address the question of how narrative migrates mutates and creates meaning as it is expressed across various media Dividing the inquiry into five areas face to face narrative still pictures moving pictures music and digital media *Narrative across Media* investigates how the intrinsic properties of the supporting medium shape the form of narrative and affect the narrative experience Unlike other interdisciplinary approaches to narrative studies all of which have tended to concentrate on narrative across language supported fields this unique collection provides a much needed analysis of how narrative operates when expressed through visual gestural electronic and musical means In doing so the collection redefines the act of storytelling Although the fields of media and narrative studies have been invigorated by a variety of theoretical approaches this volume seeks to avoid a dominant theoretical bias by providing instead a collection of concrete studies that inspire a direct look at texts rather than relying on a particular theory of interpretation A contribution to both narrative and media studies *Narrative across Media* is the first attempt to bridge the two disciplines

Media Ecologies of Literature Susanne Beyerlipp, Ralf Haekel, Johannes Schlegel, 2022-11-03 This book explores the media ecologies of literature the ways in which a literary text is interwoven in its material technical performative praxeological affective and discursive network and which determine how it is experienced and interpreted Through novel approaches to the complex contingent and interdependent environments of literature this volume demonstrates how questions about the mediality of literature particularly in the wake of digitization shed a new light on our understanding of textuality reading platforms and reception processes By drawing on recent developments in advanced media theory *Media Ecologies of Literature* emphasizes the productivity of innovative reconceptualizations of literature as a medium in its own right In an intentionally wide historical scope the essays engage with

literary texts from the Romantic to the contemporary period from Charlotte Smith and Oscar Wilde to A L Kennedy and Mark Z Danielewski from the traditionally printed novel to audiobooks and reading apps *The Routledge Companion to Experimental Literature* Joe Bray, Alison Gibbons, Brian McHale, 2012-07-26 What is experimental literature How has experimentation affected the course of literary history and how is it shaping literary expression today Literary experiment has always been diverse and challenging but never more so than in our age of digital media and social networking when the very category of the literary is coming under intense pressure How will literature reconfigure itself in the future The Routledge Companion to Experimental Literature maps this expansive and multifaceted field with essays on the history of literary experiment from the beginning of the twentieth century to the present the impact of new media on literature including multimodal literature digital fiction and code poetry the development of experimental genres from graphic narratives and found poetry through to gaming and interactive fiction experimental movements from Futurism and Surrealism to Postmodernism Avant Pop and Flarf Shedding new light on often critically neglected terrain the contributors introduce this vibrant area define its current state and offer exciting new perspectives on its future This volume is the ideal introduction for those approaching the study of experimental literature for the first time or looking to further their knowledge

Paper Empire Joseph Tabbi,Rone Shavers,2007 Celebrates and illuminates the legacy of one of America's most innovative and consequential 20th century novelists In 2002 following the posthumous publication of William Gaddis's collected nonfiction and his final novel and Jonathan Franzen's lengthy attack on him in *The New Yorker* a number of partisan articles appeared in support of Gaddis's legacy In a review in *The London Review of Books* critic Hal Foster suggested a reason for disparate responses to Gaddis's reputation Gaddis's unique hybridity his ability to write in the gap between two

dispensations between science and literature theory and narrative and different orders of linguistic imagination Gaddis 1922 1998 is often cited as the link between literary modernism and postmodernism in the United States His novels *The Recognitions* *JR Carpenter's Gothic* and *A Frolic of His Own* are notable in the ways that they often restrict themselves to the language and communication systems of the worlds he portrays Issues of corporate finance the American legal system economics simulation and authenticity bureaucracy transportation and mass communication permeate his narratives in subject setting and method The essays address subjects as diverse as cybernetics theory the law media theory race and class music and the perils and benefits of globalization The collection also contains a memoir by Gaddis's son an unpublished interview with Gaddis from just after the publication of *JR* and an essay on the Gaddis archive newly opened at Washington University in St Louis The editors acknowledge that we live in an age of heightened global awareness But as these essays testify few American writers have illuminated as poignantly or incisively just how much the systemic forces of capitalism and mass communication have impacted individual lives and identity imparting global dimensions to private pursuits and desires than William Gaddis
