Language at the Speed of Sight Mark Seidenberg, 2017-01-03 In this important and alarming New York Times book see why so many American students are falling behind in their reading skills while others around the world excel The way we teach reading is not working and it cannot

continue We have largely abandoned phonics based reading instruction despite research that supports its importance for word recognition Rather than treating Black English as a valid dialect and recognizing that speaking one dialect can impact the ability to learn to read in another teachers simply dismiss it as incorrect English And while we press children to develop large vocabularies because we think being a good reader means knowing more words studies have found that a large vocabulary is only an indication of better pattern recognition Understanding the science of reading is more important than ever for us and for our children Seidenberg helps us do so by drawing on cutting edge research in machine learning linguistics and early childhood development Language at the Speed of Sight offers an erudite and scathing examination of this most human of activities and concrete proposals for how our society can produce better readers **Occupied Reading** Alan A. Block, 2023-05-31 Today's growing national concern about education centers on the paramount importance of teaching reading and writing This volume offers a rigorous examination of reading and the pedagogy of reading critically The book examines the crucial role of reading in the education of the child for the year 2000 and explores the history of reading and readers in America while surveying the attendant literacy debates The author examines the historical progress of American reading instruction demonstrating that how one is taught to read not only determines what one will read but also what is permissible to read and how pedagogies of reading define reading publics An important chapter focuses on reading as a process of identity construction that creates not only a text but shapes the person who reads that text The book also describes reading as a psychological process in which the creative act of manipulating the text produces the self and the world A final chapter discusses reading as the center of the educational system and examines methodologies An index is provided *The Materiality of Language* David Bleich, 2021-12-22 A critique of male dominated modes of language use their roots in higher education their effects and their spill over into popular culture David Bleich sees the human body its affective life social life and political functions as belonging to the study of language In *The Materiality of Language* Bleich addresses the need to end centuries of limiting access to language and its many contexts of use To recognize language as material and treat it as such argues Bleich is to remove restrictions to language access due to historic patterns of academic censorship and unfair gender practices Language is understood as a key path in the formation of all social and political relations and becomes available for study by all speakers who may regulate it change it and make it flexible like other material things A potentially foundational text in an emergent field of language studies whose work is to break up the monopoly Linguistics and Philosophy have had on the study of language The insight that the affective operation of language is elided in nearly all approaches to language acquisition is brilliant and astounding The analysis of subject creation as an affective process of recognizing and sharing the same affective state and language as the means for materializing affective states is fascinating and persuasive One of the book's distinctive features is the use of gender as a key normative analytical lens throughout It would be difficult to exaggerate how rare this is among language thinkers and how productive it is for the arguments here

Mary Louise Pratt New York University A powerful first rate book on a crucial topic It offers a great interpretation of the sacralization and ascendancy of Latin as a language supporting what Bleich calls an elite group of men This is a brilliant codebook to academic language and its coercions Dale Bauer University of Illinois b DESC literary theory semiotics literary criticism philosophy language philosophy philosophy of language gender studies social science language studies communication studies language arts language disciplines gender sex language rhetoric academic language colloquial language language political aspects language sex differences language and gender LIT006000 LITERARY CRITICISM Semiotics Theory PHI038000 PHILOSOPHY Language SOC032000 SOCIAL SCIENCE Gender Studies LAN004000 LANGUAGE ARTS DISCIPLINES Communication Studies 9780253016508 Well Tempered Woodwinds Friedrich von Huene and the Making of Early Music in a New World Geoffrey Burgess
