Reading Seminars I and II Richard Feldstein, Bruce Fink, Maire Jaanus, 1996-02-22 In this collection of essays Lacan's early work is first discussed systematically by focusing on his two earliest seminars Freud's Papers on Technique and The Ego in Freud's Theory and in the Technique of Psychoanalysis These essays by some of the finest analysts and writers in the Lacanian psychoanalytic world in Paris today carefully lay out the background and development of Lacan's thought In Part I Jacques Alain Miller spells out the philosophical and psychiatric origins of Lacan's work in great detail In Parts II III and IV Colette Soler Eric Laurent and others explain in the clearest of fashions the highly influential conceptualization Lacan introduces with the terms symbolic imaginary and real Part V provides the first sustained account in English to date of Lacan's reformulation of psychoanalytic diagnostic categories neurosis perversion psychosis and their subcategories their theoretical foundations and clinical applications ample case material is provided here Parts VI and VII of this collection take us well beyond Seminars I and II relating Lacan's early work to his later views of the 1960s and

1970s Slavoj Žižek explores the complex philosophical relations between Hegel and Lacan regarding the subject and the cause. And Lacan's article 'On Freud's Trieb and the Psychoanalyst's Desire' that appears here for the first time in English and is brilliantly unpacked by Jacques Alain Miller in his 'Commentary on Lacan's Text' takes a giant step forward to 1965 where we see a crucial reversal in Lacan's perspective: desire is suddenly devalued, the defensive/inhibiting nature of desire coming to the fore. What then becomes essential is the drive as an activity related to the lost object that produces *jouissance*.

Archives of Neurology and Psychiatry, 1923 **Psychotherapeutic Approaches to Schizophrenic Psychoses** Yrjö O. Alanen, Manuel González de Chávez, Ann-Louise S. Silver, Brian Martindale, 2009-06-02 *Psychotherapeutic Approaches to Schizophrenic Psychoses* brings together professionals from around the world to provide an extensive overview of the treatment of schizophrenia and psychosis *The Flight of the Mind* Thomas C. Caramagno, 1992-07-27 Most valuable to my thinking is Caramagno's demonstration of the interrelationship between Woolf's literary brilliance and her devastating depressions and creative highs and his insights into the creative process itself. Ronald R. Fieve M.D., author of *Moodswing*. This book is a knockout. After reading it, Woolf scholars like me and everyone else are going to have to rethink everything we think we know about Virginia Woolf. I expected yet another predictable book on Woolf's madness and instead came away thoroughly impressed. Jane C. Marcus, Distinguished Professor of English at The City College of New York and Coordinator of Women's Studies at the CUNY Graduate Center. Caramagno's powerfully revisionist account of Woolf's life and work traces her courageous attempt to record and understand her own mental illness. His book throws a flood of light on the relentlessly honest self-scrutiny of her autobiographical writing as well as on the deliberate discontinuities of her fiction. Alex Zwerdling, author of *Virginia Woolf and the Real World* *Sarah Kane's Theatre of Psychic Life* Leah Sidi, 2023-03-09 Sarah Kane was one of the landmark playwrights of 1990s Britain, her influence being felt across UK and European theatre. This is the first book to focus exclusively on Kane's unique approach to mind and mental health. It offers an important re-evaluation of her oeuvre, revealing the relationship between theatre and mind which lies at the heart of her theatrical project. Drawing on performance theory, psychoanalysis and neuroscience, this book argues that Kane's innovations generate a dramaturgy of psychic life which re-shapes the encounter between stage and audience. It uses previously unseen archival material and contemporary productions to uncover the mechanics of this innovative theatre practice. Through a radically open-ended approach to dramaturgy, Kane's works offer urgent insights into mental suffering that take us beyond traditional discourses of empathy and mental health and into a profound rethinking of theatre as a mode of thought. As such, her theatre can help us to understand debates about mental suffering today *Becoming-woman* Camilla Griggers, 1997 Griggers analyses contemporary articulations of the feminine in American cultural practices ranging from fashion to foeticide and from Hollywood's production of feminine charismatic military leaders to pop-mediated lesbianism **Reading the Red Book** Sanford L. Drob, 2023-03-28 The long-awaited publication of C.G. Jung's *Red Book* in October 2009 was a signal event in the

history of analytical psychology Hailed as the most important work in Jung's entire corpus it is as enigmatic as it is profound Reading *The Red Book* by Sanford L Drob provides a clear and comprehensive guide to *The Red Book's* narrative and thematic content and details *The Red Book's* significance not only for psychology but for the history of ideas After Oedipus Julia Reinhard Lupton, Kenneth Reinhard, 1993 Exploring the dialogue between psychoanalytic and literary discourses the authors examine the models of plot character and ways of reading which each of these discourses has developed in interpreting Shakespeare Since Freud's writings on Oedipus and Hamlet Shakespearean tragedy has been paradigmatic for psychoanalytic theory and criticism In this ambitious and highly imaginative book the authors trace the dialogue between psychoanalytic and literary discourses by examining the models of plot character and ways of reading which each tradition has developed through its interpretation of Shakespeare **Corpus Anarchicum** Hamid Dabashi, 2012-09-24 This book is a meditation on and an attempt to understand suicidal violence in the immediate context of its most recent political surge the decade between 2001 and 2011 from the suicidal mission of Muhammad Atta and his band in the United States to the suicide of Mohamed Bouazizi in 2010 in Tunisia After the former a devastating military strike and occupation of two Muslim countries commenced and after the latter a massive transnational democratic uprising ensued Suicidal violence is neither specific to Islam nor peculiar to our time It has been manifested in practically all cultures and religions and throughout human history But the suicidal violence we witness today is of an entirely different disposition because the bodies both of the assailant and of the assailed on which it is perpetrated are no longer the human body of our Enlightenment assumption What we are witnessing is in fact the contour of a posthuman body The posthuman body as Dabashi here proposes is the body of a contingent and contextual being and as such an object of disposable knowledge while the human body that it has superseded was corporeally integral autonomous rational indispensable and above all the site of a knowing subject
