Burack,2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child s social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success *Precursors of Functional Literacy* Ludo Th Verhoeven,Carsten Elbro,Pieter Reitsma,2002-01-01 The purpose of this volume is to present recent research in the field of the acquisition of functional literacy and its precursors The volume aims to capture the state of the art in this rapidly expanding field An attempt is made to clarify the vague and often inconsistent definitions of functional literacy from the perspective of development Cognitive linguistic educational and social factors of literacy development are all taken into account The volume consists of three

subsequent parts The first part goes into phonological precursors of literacy development In this part the focus is on the development of early language precursors of of reading and writing The cultural foundations of these precursors are explored and their links with reading development are dealt with in detail Different psycholinguistic approaches are also proposed to explain the occurrence of literacy problems In the second part the scope is on the constraints of reading and writing efficiency at the word level and beyond The acquisition of reading and writing is seen as a result from the interaction between phonological orthographic and semantic processes A crosslinguistic perspective is taken on the role of writing system factors in the acquisition of literacy skills The final part deals with the role of social and educational factors in literacy acquisition Starting from a crosscultural perspective the central issue is how the attainment of functional literacy is dependent on sociocultural variation The predictors of more advanced levels of literacy development are considered including foreign language literacy and adult literacy **Elementary English Review** ,1928 SCC library has 1949 cur
