grow a passion for reading and in some cases even enhance text comprehension Digital social reading DSR is a term that encompasses a wide variety of practices related to the activity of reading and using digital technologies and platforms websites social media mobile apps to share thoughts and impressions about books with others This book is the first systematization of DSR practices drawing on case studies from Wattpad AO3 and Goodreads on a worldwide scale Using a combination of qualitative and computational methods Pianzola offers fresh insight into the reading experience on the scale of big data He discusses the impact of digital technology on reading skills and shows that a change of methodological perspective is necessary to understand the positive potential of DSR for promoting reading more broadly He argues that it is not just the medium that changes but also the context and the attitudes of readers He also asserts that grassroots media and open bottom up communities are crucial to the success of many reading practices today especially with young audiences

**The Ethics of Reading in Manuscript Culture** John Dagenais, 1994-02-18 Reexamining the roles played by author reader scribe and text in medieval literary practice John Dagenais argues that the entire physical manuscript must be the basis of any discussion of how meaning was made Medievalists he maintains have relied too heavily on critical editions that seek to create a single definitive text reflecting an author's intentions In reality manuscripts bear not only authorial texts but also a variety of elements added by scribes and readers glosses marginal notes pointing hands illuminations and fragments of other seemingly unrelated works Using the surviving manuscripts of the fourteenth century *Libro de buen amor* a work that has been read both as didactic treatise on spiritual love and as a celebration of sensual pleasures Dagenais shows how consideration of the physical manuscripts and their cultural context can shed new light on interpretive issues that have puzzled modern readers Dagenais also addresses the theory and practice of reading in the Middle Ages showing that for medieval readers the text on the manuscript leaf including the text of the *Libro* was primarily rhetorical and ethical in nature It spoke to them directly individually always in the present moment Exploring the margins of the manuscripts of the *Libro* and of other Iberian works Dagenais reveals how medieval readers continually reshaped their texts both physically and ethically as they read and argues that the context of medieval manuscript culture forces us to reconsider such comfortable received notions as text and literature and the theories we have based upon them *A First Dictionary of Cultural Literacy* Eric Donald Hirsch (Jr.), 1991 This revised edition of *A First Dictionary of Cultural Literacy* offers the common core of knowledge children should have by the end of grade school E D Hirsch author of the best selling *Cultural Literacy* and co author of *The Dictionary of Cultural Literacy* has updated his popular children's version for a generation that needs not only a solid grounding in the arts and sciences but a clear understanding of the world around them from world geography to the World Wide Web Inviting and informative the book is organized by subject including mythology history religion and philosophy music art geography medicine technology and many more No other book gives children so much of the world from ancient history to current technology in one engaging volume **Reading Architecture and Culture** Adam Sharr, 2012

Architecture displays the values involved in its inhabitation construction procurement and design It traces the thinking of the individuals who have participated in it their relationships and their involvement in the cultures where they lived and worked In this way buildings their details and the documents used to make them can be read closely for cultural insights Introducing the idea of reading buildings as cultural artefacts this book presents perceptive readings by eminent writers which demonstrate the power of this approach The chapters show that close readings of architecture and its materials can test commonplace assumptions help architects to appreciate the contexts in which they work and indicate ways to think more astutely about design The readings collected in this innovative and accessible book address buildings specifications and photographs They range in time from the fifteenth century examining the only surviving drawing made by Leon Battista Alberti to the recent past projects completed by Norman Foster in 2006 and Herzog and De Meuron in 2008 They range geographically from France to Puerto Rico to Kazakhstan and they range in fame from buildings celebrated by critics to house extensions and motorway service areas Taken together these essays demonstrate important research methods which yield powerful insights for designers critics and historians and lessons for students *Austria and Other Margins* Katherine Arens, 1996 Case studies looking at how literature crosses national and cultural boundaries

**Place/Culture/Representation** James S. Duncan, David Ley, 2013-04-15 Spatial and cultural analysis have recently found much common ground focusing in particular on the nature of the city Place Culture Representation brings together new and established voices involved in the reshaping of cultural geography The authors argue that as we write our geographies we are not just representing some reality we are creating meaning Writing becomes as much about the author as it is about purported geographical reality The issue becomes not scientific truth as the end but the interpretation of cultural constructions as the means Discussing authorial power discourses of the other texts and textuality landscape metaphor the sites of power knowledge relations and notions of community and the sense of place the authors explore the ways in which a more fluid and sensitive geographer's art can help us make sense of ourselves and the landscapes and places we inhabit and think about *Handbook of Research on Cross-Cultural Approaches to Language and Literacy Development* Smith, Patriann, Kumi-Yeboah, Alex, 2015-08-04 With rapid technological and cultural advancements the 21st century has witnessed the wide scale development of transnationalist economies which has led to the concurrent evolution of language and literacy studies expanding cross cultural approaches to literacy and communication Current language education applies new technologies and multiple modes of text to a diverse range of cultural contexts enhancing the classroom experience for multi lingual learners The Handbook of Research on Cross Cultural Approaches to Language and Literacy Development provides an authoritative exploration of cross cultural approaches to language learning through extensive research that illuminates the theoretical frameworks behind multicultural pedagogy and its myriad applications for a globalized society With its comprehensive coverage of transnational case studies trends in literacy teaching and emerging instructive technologies this

### **Reading Sounds**

Sean Zdenek, 2015-12-23 Imagine a common movie scene a hero confronts a villain Captioning such a moment would at first glance seem as basic as transcribing the dialogue But consider the choices involved How do you convey the sarcasm in a comeback Do you include a henchman's muttering in the background Does the villain emit a scream a grunt or a howl as he goes down And how do you note a gunshot without spoiling the scene These are the choices closed captioners face every day Captioners must decide whether and how to describe background noises accents laughter musical cues and even silences When captioners describe a sound or choose to ignore it they are applying their own subjective interpretations to otherwise objective noises creating meaning that does not necessarily exist in the soundtrack or the script Reading Sounds looks at closed captioning as a potent source of meaning in rhetorical analysis Through nine engrossing chapters Sean Zdenek demonstrates how the choices captioners make affect the way deaf and hard of hearing viewers experience media He draws on hundreds of real life examples as well as interviews with both professional captioners and regular viewers of closed captioning Zdenek's analysis is an engrossing look at how we make the audible visible one that proves that better standards for closed captioning create a better entertainment experience for all viewers
