relationship between urban form and capitalist development This is a valuable introductory text for courses in urban planning urban geography and urban sociology Provided by publisher Analysis and Development of Sustainable Urban Production Systems Max Juraschek, 2021-07-23 Manufacturing of products in urban production sites is connected to unique potentials yet also to specific challenges Urban factories can provide functional diversity and contribute positive impacts to a city The concept of urban production receives rising attention in research and industry and it is recognized in its interdisciplinary nature With a holistic approach from both the urban perspective and the factory perspective negative impacts can be minimized positive effects enabled and mutually beneficial symbiotic combinations created The presented framework and methods for the evaluation and implementation of sustainable urban production systems allow the assessment of impacts and provide the means to control and utilize the unique strengths of urban factories for cities and industry This will allow a structured derivation of methods and measures from the concept of urban production for producing enterprises and the urban stakeholders *Community as Urban Practice* Talja Blokland, 2017-05-11 Community is a central idea in urban studies but remains conceptually vague and empirically difficult to work with Building on existing theories of community Talja Blokland offers an important contribution to defining and understanding this key theme Blokland argues that there has been too much focus on community as a stable construct formed by durable relationships with kin friends social groups or neighbours She draws attention to the non durable fluid encounters that constitute community theorizing communities as shared urban practices in a globalizing world The book proposes two core ways of thinking about community the dimension of familiarity defined by our ability to construct identities and the dimension of access defined by our freedom to enter and leave urban spaces These dimensions form various urban configurations which enable us to experience and practise community in diverse ways As this book maintains community is after all an urban practice not a fixed state of affairs

Urban Theory Alan Harding, Talja Blokland, 2014-05-13 What is Urban Theory How can it be used to understand our urban experiences Experiences typically defined by enormous inequalities not just between cities but within cities in an increasingly interconnected and globalised world This book explains Relations between urban theory and modernity in key ideas of the Chicago School spatial analysis humanistic urban geography and radical approaches like Marxism Cities and the transition to informational economies globalization urban growth machine and urban regime theory the city as an actor Spatial expressions of inequality and key ideas like segregation ghettoization suburbanization gentrification Socio cultural spatial expressions of difference and key concepts like gender sexuality race ethnicity and culturalist perspectives on identity lifestyle subculture How cities should be understood as intersections of horizontal and vertical of coinciding resources positions locations influencing how we make and understand urban experiences Critical interdisciplinary and pedagogically informed with opening summaries boxes questions for discussion and guided further reading *Urban Theory A Critical Introduction to Power Cities and Urbanism in the 21st Century* provides the tools for any student of the city to understand

even to change our own urban experiences **Planning Politics in Toronto** Aaron Alexander Moore, 2013-02-26 The Ontario Municipal Board is an independent provincial planning appeals body that has wielded major influence on Toronto's urban development. In this book Aaron A. Moore examines the effect that the OMB has had on the behavior and relationships of Toronto's main political actors including city planners, developers, neighbourhood associations, and local politicians. Moore's findings draw on a quantitative analysis of all OMB decisions and settlements from 2000 through 2006 as well as eight in-depth case studies. The cases, which examine a variety of development proposals that resulted in OMB appeals, compare the decisions of Toronto's political actors to those typified in American local political economy analyses. A much needed contribution to the literature on the politics of urban development in Toronto since the 1970s, *Planning Politics in Toronto* challenges popular preconceptions of the OMB's role in Toronto's patterns of growth and change.

The Linguistic Landscape of Chinatown Jackie Jia Lou, 2016-05-12 This book presents a sociolinguistic ethnography of the linguistic landscape of Chinatown in Washington DC. The book sheds a unique light on the impact of urban development on traditionally ethnic neighbourhoods and discusses the various historical, social, and cultural factors that contribute to this area's shifting linguistic landscape. Based on fieldwork interviews with residents and visitors and analysis of community meetings and public policies, it provides an in-depth study of the production and consumption of linguistic landscape as a cultural text. Following a geosemiotic analysis of shop signs, it traces the multiple historical trajectories of discourse which shaped the bilingual landscape of the neighbourhood. Turning to the spatial contexts, it then compares and contrasts the situated meaning of the linguistic landscape for residents, community organisers, and urban planners.

The Routledge Handbook of Religion and Cities Katie Day, Elise M. Edwards, 2020-12-30 Like an ecosystem, cities develop, change, thrive, adapt, expand, and contract through the interaction of myriad components. Religion is one of those living parts, shaping and being shaped by urban contexts. *The Routledge Handbook of Religion and Cities* is an outstanding interdisciplinary reference source to the key topics, problems, and methodologies of this cutting-edge subject. Representing a diverse array of cities and religions, the common analytical approach is ecological and spatial. It is the first collection of its kind and reflects the state of the art research focusing on the interaction of religions and their urban contexts. Comprising 29 chapters by a team of international contributors, the Handbook is divided into three parts: Research methodologies; Religious frameworks and ideologies in urban contexts; Contemporary issues in religion and cities. Within these sections, emerging research and analysis of current dynamics of urban religions are examined, including housing, economics, and gentrification; sacred ritual and public space; immigration and the refugee crisis; political conflicts and social change; ethnic and religious diversity; urban policy and religion; racial justice; architecture and the built environment; religious art and symbology; religion and urban violence; technology and smart cities; the challenge of climate change for global cities; and religious meaning-making of the city. *The Routledge Handbook of Religion and Cities* is essential reading for students and researchers in religious studies and urban

studies The Handbook will also be very useful for those in related fields such as sociology history architecture urban planning theology social work and cultural studies

Mapping Desire:Geog Sexuality David Bell,Gill Valentine,2003-09-02 This is the first book to explore sexualities from a geographical perspective The nature of place and notions of space are of increasing centrality to cultural and social theory Mapping Desire presents the rich and diverse world of contemporary sexuality exploring how the heterosexual body has been appropriated and resisted on the individual community and city scales The geographies presented here range across Europe America Australasia Africa the Pacific and the imaginary cutting across city and country and analysing the positions of gay men lesbians bisexuals and heterosexuals The contributors ring different interests and approaches to bear on theoretical and empirical material from a wide range of sources The book is divided into four sections cartographies identities sexualised spaces global local sexualised spaces local global sites of resistance Each section is separately introduced Beyond the bibliography an annotated guide to further reading is also provided to help the reader map their own way through the literature

New Urbanism Ilse Helbrecht,2016-05-13 The advent of the 21st century marks the unfolding of a new urbanism of a new urban fabric in the making Bringing together a range of leading scholars from a wide range of disciplines this edited collection examines innovative urban redevelopment projects around Europe and North America which are at the forefront of this new urbanism and which are here termed New Downtowns It introduces this term and concept and addresses major questions such as What does a sustained urbanity for the 21st century look like Which strategies do politicians and planners deploy to create new synergies between planning for the public good and private interest Can market forces be co opted for collective interests Does the imagination of a European city continue to inspire new urbanism within and beyond Europe And can a future urbanity for the 21st century be planned at all In particular it focuses on Hamburg s HafenCity which at around 155 hectares is one of the most prominent city centre development projects in Europe and will increase the size of Hamburg s city centre by 40 percent The project HafenCity serves as a starting point for a conceptually wide ranging debate on the character shape function and meaning of New Downtowns

The Public Realm Lyn H. Lofland,2017-07-12 This book is about the public realm defined as a particular kind of social territory that is found almost exclusively in large settlements This particular form of social psychological space comes into being whenever a piece of actual physical space is dominated by relationships between and among persons who are strangers to one another as often occurs in urban bars buses plazas parks coffee houses streets and so forth More specifically the book is about the social life that occurs in such social psychological spaces the normative patterns and principles that shape it the relationships that characterize it the aesthetic and interactional pleasures that enliven it and the forces anti urbanism privatism post war planning and architecture that threaten it The data upon which the book s analysis is based are diverse direct observation interviews contemporary photographs historic etchings prints and photographs and historical maps histories of specific urban public spaces or spatial types and the relevant scholarly literature from sociology

environmental psychology geography history anthropology and architecture and urban planning and design Its central argument is that while the existing body of accomplished work in the social sciences can be reinterpreted to make it relevant to an understanding of the public realm this quintessential feature of city life deserves much more u it deserves to be the object of direct scholarly interest in its own right Choice noted that The author s writing style is unusually accessible and the often fascinating narrative is generously supported by well chosen photos The Urban Lawyer ,1984 The national quarterly on local government law **Gentrification** Loretta Lees,Tom Slater,Elvin Wyly,2013-10-18 This first textbook on the topic of gentrification is written for upper level undergraduates in geography sociology and planning The gentrification of urban areas has accelerated across the globe to become a central engine of urban development and it is a topic that has attracted a great deal of interest in both academia and the popular press Gentrification presents major theoretical ideas and concepts with case studies and summaries of the ideas in the book as well as offering ideas for future research **Mapping Desire** David Bell,Gill Valentine,1995 This is the first book to explore sexualities from a geographical perspective The nature of place and notions of space are of increasing centrality to cultural and social theory Mapping Desire presents the rich and diverse world of contemporary sexuality exploring how the heterosexual body has been appropriated and resisted on the individual community and city scales The geographies presented here range across Europe America Australasia Africa the Pacific and the imaginary cutting across city and country and analysing the positions of gay men lesbians bisexuals and heterosexuals The contributors ring different interests and approaches to bear on theoretical and empirical material from a wide range of sources The book is divided into four sections cartographies identities sexualised spaces global local sexualised spaces local global sites of resistance Each section is separately introduced Beyond the bibliography an annotated guide to further reading is also provided to help the reader map their own way through the literature **Urban Geography** ,1988

Life Underground Terry Williams,2024-02-06 Winner 2024 2025 New York City Book Awards New York Society Library Aboveground Manhattan s Riverside Park provides open space for the densely populated Upper West Side Beneath its surface run railroad tunnels disused for decades where over the years unhoused people have taken shelter The sociologist Terry Williams ventured into the tunnel residents world seeking to understand life on the margins and out of sight He visited the tunnels between West Seventy Second and West Ninety Sixth Streets hundreds of times from 1991 to 1996 when authorities cleared them out to make way for Amtrak passenger service and again between 2000 and 2020 Life Underground explores this society below the surface and the varieties of experience among unhoused people Bringing together anecdotal material field observations photographs transcribed conversations with residents and excerpts from personal journals Williams provides a vivid ethnographic portrait of individual people day to day activities and the social world of the underground and their engagement with the world above which they call topside He shows how marginalized people strive to make a place for themselves amid neglect and isolation as they struggle for dignity Featuring Williams s distinctive

ethnographic eye and deep empathy for those on the margins *Life Underground* shines a unique light on a vanished subterranean community *Redevelopment and Race* June Manning Thomas, 2013-04-15 In the decades following World War II professional city planners in Detroit made a concerted effort to halt the city's physical and economic decline Their successes included an award winning master plan a number of laudable redevelopment projects and exemplary planning leadership in the city and the nation Yet despite their efforts Detroit was rapidly transforming into a notorious symbol of urban decay In *Redevelopment and Race* Planning a Finer City in Postwar Detroit June Manning Thomas takes a look at what went wrong demonstrating how and why government programs were ineffective and even destructive to community needs In confronting issues like housing shortages blight in older areas and changing economic conditions Detroit's city planners worked during the urban renewal era without much consideration for low income and African American residents and their efforts to stabilize racially mixed neighborhoods faltered as well Steady declines in industrial prowess and the constant decentralization of white residents counteracted planners efforts to rebuild the city Among the issues Thomas discusses in this volume are the harmful impacts of Detroit's highways the mixed record of urban renewal projects like Lafayette Park the effects of the 1967 riots on Detroit's ability to plan the city building strategies of Coleman Young the city's first black mayor and his mayoral successors and the evolution of Detroit's federally designated Empowerment Zone Examining the city she knew first as an undergraduate student at Michigan State University and later as a scholar and planner Thomas ultimately argues for a different approach to traditional planning that places social justice equity and community ahead of purely physical and economic objectives *Redevelopment and Race* was originally published in 1997 and was given the Paul Davidoff Award from the Association of Collegiate Schools of Planning in 1999 Students and teachers of urban planning will be grateful for this re release A new postscript offers insights into changes since 1997 Gentrification of the City Neil Smith, Peter Williams, 2013-10-15 The author and contributors of this book seek to present alternatives to the mainstream discussions of gentrification It does not present a single coherent vision of the causes effects and experiences of gentrification but a number of different views that do not always coincide What the authors have in common is the attempt to escape a naive empiricism which has dominated much mainstream research as well as the conviction that questions of social class lie at the heart of this issue This book was first published in 1986 **Urban Fortunes** John R. Logan, Harvey Molotch, 2007-08-28 This sociological classic is updated with a new preface by the authors looking at developments in the study of urban planning during the twenty year life of this influential work **Swept Up Lives?** Paul Cloke, Jon May, Sarah Johnsen, 2011-01-31 Utilizing innovative ethnographic research *Swept Up Lives* challenges conventional accounts of urban homelessness to trace the complex and varied attempts to care for homeless people Presents innovative ethnographic research which suggests an important shift in perspective in the analysis and understanding of urban homelessness Emphasizes the ethical and emotional geographies of care embodied and performed within homeless services spaces

Suggests that different homelessness scenes develop in different places due to varied historical political and cultural responses to the problems faced
