The Politics of Backwardness in Hungary, 1825-1945 Andrew C. Janos, 2012-01-20 Why did Hungary a country that shared much of the religious and institutional heritage of western Europe fail to replicate the social and political experiences of the latter in the nineteenth and early twenties centuries The answer the author argues lies not with cultural idiosyncracies or historical accident but with the internal dynamics of the modern world system that stimulated aspirations not easily realizable within the confines of backward economics in peripheral national states The author develops his theme by examining a century of Hungarian economic social and political history During the period under consideration the country witnessed attempts to transplant liberal institutions from the West the corruption of these institutions into a neo corporatist bureaucratic state and finally the rise of diverse Left and Right radical movements as much in protest against this institutional corruption as against the prevailing global division of labor and economic inequality Pointing to significant analogies between the Hungarian past and the plight of the countries of the Third World today this work should be of interest not only to the specialist on East European politics but also to students of development dependency and center periphery relations in the contemporary world

Intervention and Underdevelopment Jon V. Kofas, 2010-11 this ground breaking study by Jon Kofas provides an insightful analysis of the American aid program that determined the political and economic configuration of postwar Greece Kofas's analysis however is equally significant for United States history because it was on Greek soil that American counterinsurgency pacification and containment tactics were evolved tested and later applied elsewhere in the Third World Those who seek meaningful reappraisal rather than beguiling rationalization might well begin with this study solidly grounded on all available sources It presents a revisionist perspective regarding both the economic and the political development of Greece under American tutelage The declared objective of the economic aid was to avoid restructuring of the Greek economy and to preserve Greece as an exporter of raw materials and an importer of manufactured goods Kofas asserts that an alternative program similar to that of the northern Balkan countries was feasible and that failure to undertake such a program is vulnerable of today's Greek economy Likewise in the political realm Kofas rejects the Washington dogma that Greece has to be in either the Soviet or the American camp and therefore must be in the latter Kofas proposes as a plausible alternative a social demographic regime that in addition to socioeconomic reforms at home could have pursued abroad a pro Greek rather than a pro Soviet or pro American course The victory of the American supported forces in Greece obscured this alternative vision for decades Yet it was persistently propounded in the face of discouraging odds by a variety of centrist and leftist leaders With the coming to office of Andreas Papandreou this vision has become official policy in Athens Furthermore assorted versions of this alternative strategy are cropping up globally which is the underlying reason why the Third World today is out of control And also why superpower doctrines and projects not recognizing this indisputable and irreversible fact are experiencing difficulties as embarrassing as

they are predictable Hence the broad significance of this thoughtful and thought provoking study From the Foreword by L S Stavrianos **Madison Avenue in Asia** Michael H. Anderson,1984 Dependency theory is used to analyze the significance of the rapidly expanding transnational advertising agencies as they operate in Singapore China Indonesia and Malaysia The American hegemony over international advertising is discussed as is the general question of the effectiveness of foreign influenced advertising **From American Empire to América Cósmica through Philosophy** Terrance

MacMullan,2023-08-08 From American Empire to Am rica C smica through Philosophy Prospero s Reflection envisions a greater ideal American philosophy that integrates philosophies from across the Americas and is set to work resolving the problems that vex the peoples of the Americas This work contributes to the rapidly growing dialogue on Inter American philosophy with research that adds to the list of philosophical affinities across the Americas However Terrance MacMullan also delves deeply into the points of philosophical contention and misrecognition between Anglo American and Ibero American philosophies by reversing the colonial gaze of the last centuries Following in the tradition of cultural theorists like Enrique Rod and Roberto Fern ndez Retamar who draw on Shakespeare s The Tempest as a source of literary metaphors to understand colonialism and imperialism in the Americas MacMullan argues that the United States will never achieve democratic community unless it first contends with the harsh critiques of its culture and philosophies reflected within the works of Latin American philosophers who prophesied and survived the imperialism of the North American Prospero but whose works are still largely unknown and unseen within U S universities Critical Readings on Latinos and Education Enrique G Murillo Jr,2019-01-14 This critical anthology showcases an interdisciplinary forum of scholars sharing a common interest in the analysis discussion critique and dissemination of educational issues impacting Latinos Drawing on the best of the past 20 years of the Journal of Latinos and Education the collection highlights work that has been seminal in addressing complex educational issues affecting and influencing the growing Latina and Latino population Chapters discuss the production and application of wisdom and knowledge to real world problems while engaging and collaborating with the interests of key stakeholders in other sectors outside the traditional academy Organized thematically around issues related to policy research practice and creative and literary works the collection is sure to extend and encourage novel ways of thinking about the ongoing and emerging questions around the unifying thread of Latinos and education *Investment Behavior of Multinational Corporations in Developing Areas* Bret Lee Billet, If political power is directly related to economic wealth then multinational corporations are powerful actors in the international system The sales of some are greater than the gross national product of some of the most economically advanced countries in the world This book examines key political and economic factors that influence the behavior of multinationals when they decide where to make direct investments as well as how their investment decisions affect the development process and policies in host countries It also looks for discernible patterns in the behavior of multinationals that originate in different home countries These include corporations from
