Gire, 2003-02-28 Most studies of human development in developing societies have focused on the childhood stage and in a few cases exploration has extended up to adolescence since this age group represents about half the population in developing societies The developed world however is experiencing a surge in the elderly population and this has spurred its study There is growing recognition that studies are needed in order to understand aging in all contexts and to discover how the experience may differ in developing and developed societies In this book the authors discuss the appropriateness or inappropriateness of applying Western theories and perspectives to studies of aging in the developing world The present study critically examines the major theories in the area of aging and adult development covering such domains as the physical psychological and social aspects of aging death and dying and social and public policies Applying the concepts of individualism and collectivism as well as the global and environmental dimensions of the developing world the authors have earmarked the theories that seem suitable only to the developed world and those that appear to be universally relevant      **The Journey of Adulthood** Helen L. Hulstsch, Francine

Deutsch,1981      **Handbook of Adult Development** Jack Demick,Carrie Andreoletti,2012-12-06 This volume is an outgrowth of contemporary research on development over the adult lifespan which by now has burgeoned and developed both nationally and internationally However for us the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development SRAD with its origins some 15 years ago by Michael Commons and his associates in Cambridge Massachusetts Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development Their chapters have been complemented by pieces from other researchers who have adopted more mainstream approaches to adult development and aging Regardless of the particular approach and or focus of the chapter all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come      **Encyclopedia of Aging and Public Health** Sana Loue,Martha Sajatovic,2008-01-16 Americans are living longer and the elder population is growing larger To meet the ongoing need for quality information on elder health the Encyclopedia of Aging and Public Health combines multiple perspectives to offer readers a more accurate and complete picture of the aging process The book takes a biopsychosocial approach to the complexities of its subject In depth introductory chapters include coverage on a historical and demographic overview of aging in America a guide to biological changes accompanying aging an analysis of the diversity of the U S elder population legal issues commonly affecting older adults and the ethics of using cognitively impaired elders in research From there over 425 entries cover the gamut of topics trends diseases and phenomena Specific populations including ethnic minorities custodial grandparents and centenarians Core medical conditions associated with aging from cardiac and pulmonary diseases to Parkinson's and Alzheimer's Mental and emotional disorders Drugs vitamins alternative medicine Disorders of the eyes feet and skin Insomnia and sleep disorders malnutrition and eating disorders Sexual and gender related concerns And a broad array of social and political issues including access to care abuse neglect veterans affairs and assisted suicide Entries on not quite elders concerns e g midlife crisis menopause are featured as well And all chapters and entries include references and resource lists The Encyclopedia has been developed for maximum utility to clinicians social workers researchers and public health professionals working with older adults Its multidisciplinary coverage and scope of topics make this volume an invaluable reference for academic and public libraries      The Safety of Elderly Drivers John Peter Rothe, By the turn of the century the elderly will comprise about 20 percent of the population in North America and 28 percent of those who drive Place this percentage in high powered automobiles and the need for planning and policy

development becomes evident Most standard research on elderly drivers has not gone beyond gathering data on specific situations or characteristics This book rises beyond simple statistical presentation It blends sociological insight with statistical detail to produce an absorbing description of the elderly drivers daily lives driving styles experiences with accident and injury social relationships and life aspirations It also describes areas of neglect imagined and real health problems driving exposure and traffic violations accidents and loss of self esteem It presents in depth accounts of the trauma of loss of license and the importance of the automobile for sustaining mental physical and social well being The self imposed or self defined rules elderly drivers use to navigate traffic or compensate for physical frailties are described in depth The Safety of Elderly Drivers includes penetrating comments from elderly drivers who have been involved in serious accidents and from random elderly drivers speaking for their generation of drivers Integrating statistical findings based on Motor Vehicle Department accident data and survey data with comprehensive interviews and discussions with elderly drivers the book provides an empirically grounded in depth view of the elderly driver today Rothe summarizes theories and models of aging along with past research on elderly drivers projecting what the future may hold if present trends in medicine housing politics migration and mass transit continue It closes with a series of recommendations for future traffic planning This book will be of interest to policymakers concerned with traffic safety as well as social scientists and others interested in gerontological issues It is the latest in a series on traffic safety sponsored by the Insurance Corporation of British Columbia in Canada

*Humor and Aging* Lucille Nahemow, Kathleen A. McCluskey-Fawcett, Paul E. McGhee, 2013-09-24 *Humor and Aging* deals with humor throughout the life span although primary attention is given to humor about and by the elderly The book contains theoretical and review material from infancy to old age and includes empirical studies of death and dying in both our own and other societies The book is divided into four parts Part I considers theoretical models of humor development across the life span and discusses physiological psychological and sociological processes Part II deals with ways of considering humor and aging from different vantage points These include 1 humor about people of different ages 2 humor for people of different ages and 3 humor by people of different ages Part III addresses the grim subject of death and dying and how it lends itself to humorous treatment in our own and other societies Part IV contains brief empirical reports Since scientific research in humor and aging is only beginning it seems important to discuss pilot work in hopes that others will follow Finally an epilogue by Loeb and Wood presents a compelling theoretical approach
