in a blaze of nuclear firestorm we now suspect that the apocalypse may be much slower creeping in as chemical toxins climate change or nano technologies run amok Taking inspiration from the questions raised by the Bulletin's synecdochical nuclear Risk Criticism aims to generate a hybrid form of critical practice that brings nuclear criticism into conversation with ecocriticism Through readings of novels films theater poetry visual art websites news reports and essays Risk Criticism tracks the diverse ways in which environmental risks are understood and represented today *The Analytics of Uncertainty and Information* Jack Hirshleifer, John G. Riley, 1992-09-10 Economists have always recognised that human endeavours are constrained by our limited and uncertain knowledge but only recently has an accepted theory of uncertainty and information evolved This theory has turned out to have surprisingly practical applications for example in analysing stock market returns in evaluating accident prevention measures and in assessing patent and copyright laws This book presents these intellectual advances in readable form for the first time It unifies many important but partial results into a satisfying single picture making it clear how the economics of uncertainty and information generalises and extends standard economic analysis Part One of the volume covers the economics of uncertainty how each person adapts to a given fixed state of knowledge by making an optimal choice among the immediate terminal actions available These choices in turn determine the overall market equilibrium reflecting the social distribution of risk bearing In Part Two covering the economics of information the state of knowledge is no longer held fixed Instead individuals can to a greater or lesser extent overcome their ignorance by informational actions The text also addresses at appropriate points many specific topics such as insurance the Capital Asset Pricing model auctions deterrence of entry and research and invention **Bulletin of the Public Affairs Information Service** Public Affairs Information Service, 1924 *The Publishers' Weekly*, 1924 *Reading Development and Difficulties* Kate Cain, 2010-06-21 This accessible text brings together research on word reading and comprehension development which are often treated separately and provides a comprehensive and detailed introductory text to reading development and difficulties Key features include An introduction to the important issues in reading research and the skills involved in reading words and understanding text from the point of view of both a beginner and a skilled reader A consideration of the similarities and differences between written and spoken language and the advantages and disadvantages of different methodological approaches An examination of how failures in reading comprehension skills can create difficulties and disorders A consideration of the implications of this research for the teaching of reading and the diagnosis and treatment of reading difficulties This text will be useful to many different groups of readers not only researchers and students in psychology but also those who work in more applied settings such as students in education and speech and language therapy who may have a limited background knowledge of the psychology of reading **Risk Revisited** Patrick Caplan, 2000-02-20 A range of distinguished anthropologists and sociologists re-examine the concept of risk in contemporary societies
