Readings In World Literature:

What Is World Literature? David Damrosch, 2018-06-05 World literature was long defined in North America as an established canon of European masterpieces but an emerging global perspective has challenged both this European focus and the very category of the masterpiece The first book to look broadly at the contemporary scope and purposes of world literature What Is World Literature probes the uses and abuses of world literature in a rapidly changing world In case studies ranging from the Sumerians to the Aztecs and from medieval mysticism to postmodern metafiction David Damrosch looks at the ways works change as they move from national to global contexts Presenting world literature not as a canon of texts but as a mode of circulation and of reading Damrosch argues that world literature is work that gains in translation When it is effectively presented a work of world literature moves into an elliptical space created between the source and receiving cultures shaped by both but circumscribed by neither alone Established classics and new discoveries alike participate in this mode of circulation but they can be seriously mishandled in the process From the rediscovered Epic of Gilgamesh in the nineteenth century to Rigoberta Menchú's writing today foreign works have often been distorted by the immediate needs of their own editors and translators Eloquently written argued largely by example and replete with insightful close readings this book is both an essay in definition and a series of cautionary tales

Reading World Literature Sarah Lawall, 2010-01-01 As teachers and readers expand the canon of world literature to include writers whose voices traditionally have been silenced by the dominant culture fundamental questions arise What do we mean by world What constitutes literature Who should decide Reading World Literature is a cumulative study of the concept and evolving practices of world literature Sarah Lawall opens the book with a substantial introduction to the overall topic Twelve original essays by distinguished specialists run the gamut from close readings of specific texts to problems of translation theory and reader response The sequence of essays develops from re examinations of traditional canonical pieces through explorations of less familiar works to discussions of reading itself as a literacy dependent on worldview Reading World Literature will open challenging new vistas for a wide audience in the humanities from traditionalists to avant garde specialists in literary theory cultural studies and area studies

Postcolonial Readings of Music in World Literature Cameron Fae Bushnell, 2013 This book reads representations of Western music in literary texts to reveal the ways in which artifacts of imperial culture function within contemporary world literature Bushnell argues that Western music s conventions for performance composition and listening established during the colonial period persist in postcolonial thought and practice Music from the Baroque Classical and Romantic periods Bach through Brahms coincides with the rise of colonialism and Western music contains imperial attitudes and values embedded within its conventions standards and rules The book focuses on the culture of classical music as reflected in the worlds of characters and texts and contends that its effects outlast the historical significance of the real composers pieces styles and forms Through examples by authors such as McEwan Vikram Seth Bernard MacLaverty Chang rae Lee and J M Coetzee the book demonstrates how Western music enters narrative as both acts of history and as structures of analogy that suggest subject positions human relations and political activity that in turn describes a postcolonial condition The uses to which Western music is put in each literary text reveals how European art music of the seventeenth through the nineteenth centuries is read and misread by postcolonial generations exposing mostly hidden cultural structures that influence our contemporary understandings of social relations and hierarchies norms for resolution and for assigning significance and standards of propriety The book presents strategies for thinking anew about the persistence of cultural imperialism reading Western music simultaneously as representative of imperial cultural dominance and as suggestive of resistant structures forms and practices that challenge the imperial hegemony

Polish Literature as World Literature Piotr Florczyk, K. A. Wisniewski, 2022-12-15 This carefully curated collection consists of 16 chapters by leading Polish and world literature scholars from the United States Canada Italy and of course Poland An historical approach gives readers a panoramic view of Polish authors and their explicit or implicit contributions to world literature Indeed the volume shows how Polish authors from Jan Kochanowski in the 16th century to the 2018 Nobel laureate Olga Tokarczuk have

engaged with their foreign counterparts and other traditions active participants in the global literary network and the conversations of their day The volume features views of Polish literature and culture within theories of world literature and literary systems with a particular attention paid to the resurgence of the idea of the physical book as a cultural artifact This perspective is especially important since so much of today's global literary output stems from Anglophone perceptions of what constitutes literary quality and tastes The collection also sheds light on specific issues pertaining to Poland such as the idea of Polishness and global phenomena including social and economic advancement as well as ecological degradation Some of the authors discussed like the Romantic poet Adam Mickiewicz or the 1980 Nobel laureate Czeslaw Milosz were renowned far beyond the borders of their country while others like the contemporary travel writer and novelist Andrzej Stasiuk embrace regionalism seeing as they do in their immediate surroundings a synecdoche of the world at large Nevertheless the picture of Polish literature and Polish authors that emerges from these articles is that of a diverse cosmopolitan cohort engaged in a mutually rewarding relationship with what the late French critic Pascale Casanova has called the world republic of letters

Readings Birgit M. Kaiser, Kathrin Thiele, 2018-10-18 Diffraction patterns in quantum physics evidence the fact that the behavior of matter is the result of its entanglements with measurement or as Karen Barad suggests the entanglement of matter and meaning In this sense therefore phenomena including texts cultural agents or life forms are the results of their relational onto epistemological entanglements and not individual entities that separately pre exist their joint becoming As such diffraction proposes a new understanding of difference no longer a dualist understanding but one going beyond binaries Diffraction is about patterns constellations relationalities From this angle the book explores diffraction which has begun to impact critical theories and humanities debates especially via new materialist feminisms STS and quantum thought but is often used without further reflection upon its implications or potentials Doing just that the book also pursues new routes for the onto epistemological and ethical challenges that arise from our experience of the world as relational and radically immanent because if we start from the ideas of immanence and entanglement our conceptions of self and other culture and nature cultural and sexual difference our epistemological procedures and disciplinary boundaries have to be rethought and adjusted The book offers an in depth consideration of diffraction as a quantum understanding of difference and as a new critical reading method It reflects on its import in humanities debates and thereby also on some of the most inspiring work recently done at the crossroads of science studies feminist studies and the critical humanities This book was originally published as a special issue of Parallax
