**Writing the Structures of the Subject** Will Greenshields, 2017-03-07 This book examines and explores Jacques Lacan's controversial topologisation of psychoanalysis and seeks to persuade the reader that this enterprise was necessary and important. Will Greenshields argues that Lacan achieved his most pedagogically clear and successful presentations of his most essential and notoriously complex concepts such as structure, the subject, and the real through the deployment of topology. The book will help readers to better understand Lacan and also those concepts that have become prevalent in various intellectual discourses such as contemporary continental philosophy, politics, and the study of ideology and literary or cultural criticism.
