A Real Good War Sam Halpert, 1999 *WLA*, 2003 **Living-Room War** Michael J. Arlen, 1997-10-01 One doesn't have to be a panjandrum of Communications to realize that television does something to us Michael Arlen former TV critic of *The New Yorker* writes in the Introduction to *Living Room War* He continues Television has a transforming effect on events It has a transforming effect on the people who watch the transformed events it's just hard to know what that is *Living Room War* is Arlen's valiant and entertaining attempt to figure out exactly what exactly television does to us This timeless collection of essays provides a poetic look at 1960s television culture ranging from the Vietnam war to Captain Kangaroo from the 1968 Democratic convention to televised sports

The War on Learning Elizabeth Losh, 2024-02-06 An examination of technology based education initiatives from MOOCs to virtual worlds that argues against treating education as a product rather than a process Behind the lectern stands the professor deploying course management systems online quizzes wireless clickers PowerPoint slides podcasts and plagiarism detection software In the seats are the students armed with smartphones laptops tablets music players and social networking Although these two forces seem poised to do battle with each other they are really both taking part in a war on learning itself In this book Elizabeth Losh examines current efforts to reform higher education by applying technological solutions to problems in teaching and learning She finds that many of these initiatives fail because they treat education as a product rather than a process Highly touted schemes video games for the classroom for example or the distribution of iPads let students down because they promote consumption rather than intellectual development Losh analyzes recent trends in postsecondary education and the rhetoric around them often drawing on first person accounts In an effort to identify educational technologies that might actually work she looks at strategies including

MOOCs massive open online courses the gamification of subject matter remix pedagogy video lectures from Randy Pausch to the Baked Professor and educational virtual worlds Finally Losh outlines six basic principles of digital learning and describes several successful university based initiatives Her book will be essential reading for campus decision makers and for anyone who cares about education and technology
