Real Magic Dean Radin, PhD, 2018-04-10 The chief scientist at the Institute of Noetic Sciences IONS turns a critical eye toward such practices as telepathy clairvoyance precognition and psychokinesis Are such powers really possible Science says yes According to noted scientist and bestselling author of The Conscious Universe Dean Radin magic is a natural aspect of reality and each of us can tap into this power with diligent practice But wait aren't things like ESP and telepathy just wishful thinking and flights of the imagination Not according to the author who worked on the US government's top secret psychic espionage program known as Stargate Radin has spent the last forty years conducting controlled experiments that demonstrate that thoughts are things that we can sense others emotions and intentions from a distance that intuition is more powerful than we thought and that we can tap into the power of intention think The Secret only on a more realistic and scientific level These dormant powers can help us to lead more interesting and fulfilling lives Beginning with a brief history of magic over the centuries what was called magic two thousand years ago is turning out to be scientific fact today a review of the scientific evidence for magic a series of simple but effective magical techniques the key is mental focus something elite athletes know a lot about Radin then offers a vision of a scientifically informed magic and explains why magic will play a key role in frontiers of science

Magic's Translations Margaret J. Wiener, 2025-04-04 Do you believe in magic This familiar question suggests magic is

easily recognized but unreal In *Magic's Translations* Margaret J Wiener argues that such views are shaped by historical power struggles especially in Europe's relations with the wider world Focusing on nineteenth and twentieth century Dutch interactions with Indonesians Wiener reveals how colonial agents framed unfamiliar practices practitioners and objects as magic rendering distinct phenomena fundamentally alike and advancing colonizing projects that deemed magic antithetical to reason and reality While colonial authorities including ethnologists mobilized the concept of magic to differentiate Europeans from Indonesians nature from culture reason from superstition and fact from fetish their efforts produced unexpected outcomes Some Indonesian artifacts and acts not only retained their power but invaded European experiences As anthropologists were among the key translators of magic throughout the world Wiener intersperses accounts of magic's translations in the Indies with reflections on anthropology's ongoing engagement with the concept She demonstrates that magic became an object of expert knowledge political control and popular fascination rather than a self-evident category or relic of naïve belief

Experiencing the Impossible Gustav Kuhn, 2019-03-12 This thought provoking tour through the science of magic will make you question what you know about your brain and your reality A psychologist and magician shows how the scientific study of magic reveals intriguing and often unsettling insights into the mysteries of the human mind What do we see when we watch a magician pull a rabbit out of a hat or read a person's mind We are captivated by an illusion we applaud the fact that we have been fooled Why do we enjoy experiencing what seems clearly impossible or at least beyond our powers of explanation In *Experiencing the Impossible* Gustav Kuhn examines the psychological processes that underpin our experience of magic Kuhn a psychologist and a magician reveals the intriguing and often unsettling insights into the human mind that the scientific study of magic provides Magic Kuhn explains creates a cognitive conflict between what we believe to be true for example a rabbit could not be in that hat and what we experience a rabbit has just come out of that hat Drawing on the latest psychological neurological and philosophical research he suggests that misdirection is at the heart of all magic tricks and he offers a scientific theory of misdirection He explores among other topics our propensity for magical thinking the malleability of our perceptual experiences forgetting and misremembering free will and mind control and how magic is applied outside entertainment the use of illusion in human computer interaction politics warfare and elsewhere We may be surprised to learn how little of the world we actually perceive how little we can trust what we see and remember and how little we are in charge of our thoughts and actions Exploring magic Kuhn illuminates the complex and almost magical mechanisms underlying our daily activities

Consecrating Science Lisa H. Sideris, 2017-08-15 In *Consecrating Science* Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and

religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe The New Cambridge History of Islam: Volume 4, Islamic Cultures and Societies to the End of the Eighteenth Century Robert Irwin,2010-11-04 Robert Irwin s authoritative introduction to the fourth volume of The New Cambridge History of Islam offers a panoramic vision of Islamic culture from its origins to around 1800 The introductory chapter which highlights key developments and introduces some of Islam s most famous protagonists paves the way for an extraordinarily varied collection of essays The themes treated include religion and law conversion Islam s relationship with the natural world governance and politics caliphs and kings philosophy science medicine language art architecture literature music and even cookery What emerges from this rich collection written by an international team of experts is the diversity and dynamism of the societies which created this flourishing civilization Volume four of The New Cambridge History of Islam serves as a thematic companion to the three preceding politically oriented volumes and in coverage extends across the pre modern Islamic world
