are expected to learn at much higher levels than teachers may previously have thought possible It shows how student achievement can be raised by providing both research evidence and practical examples This book is based on the first ever intervention study in the teacher expectation area designed to change teachers expectations through introducing them to the beliefs and practices of high expectation teachers A holistic view of the classroom is emphasised whereby both the instructional and socio emotional aspects of the classroom are considered if teachers are to increase student achievement There is a focus on high expectation teachers those who have high expectations for all students and a close examination of what it is that these teachers do in their classrooms that mean that their students make very large learning gains each year Becoming a High Expectation Teacher explores three key areas in which what high expectation teachers do differs substantially from what other teachers do the way they group students for learning the way they create a caring classroom community and the way in which they use goalsetting to motivate students to promote student autonomy and to promote mastery learning Areas covered include Formation of teacher expectations Teacher personality and expectation Ability grouping and goal setting Enhancing class climate Sustaining high expectations for students Becoming a High Expectation Teacher is an essential read for any researcher student trainee or practicing teacher who cares passionately about the teacher student relationship and about raising expectations and student achievement
