integrate the form of the monetary regime into the dependent capitalism analysis and to extend it to Balkan countries The monetary regime is seen as complementary to the other elements of the institutional configuration of dependent capitalism In the second part the authors adopt a historical and empirical perspective First they demonstrate how dependent capitalism has emerged in Central and Eastern Europe and the Baltic States over the last 30 years as part of the process of socio economic transformation that began in 1990 The crisis of 2008 was an indicator of this dependence on Western capital Secondly they extend the analysis to the Balkan countries and show that dependence is even stronger for them particularly in the monetary area as evidenced by the implementation of currency boards or euroization phenomena This book is of interest to academics and students as well as to business and economic policy makers
