Rival Doctors:

The Rival Doctors Elizabeth Seifert, 1990 **Doctoring the South** Steven M. Stowe, 2011-01-20 Offering a new perspective on medical progress in the nineteenth century Steven M Stowe provides an in depth study of the midcentury culture of everyday medicine in the South Reading deeply in the personal letters daybooks diaries bedside notes and published writings of doctors Stowe illuminates an entire world of sickness and remedy suffering and hope and the deep ties between medicine and regional culture In a distinct American region where climate race and slavery and assumptions about southernness profoundly shaped illness and healing in the lives of ordinary people Stowe argues that southern doctors inhabited a world of skills medicines and ideas about sickness that allowed them to play moral as well as practical roles in their communities Looking closely at medical education bedside encounters and medicine s larger social aims he describes a country orthodoxy of local social medical practice that highly valued the art of medicine While not modern in the sense of laboratory science a century later this country orthodoxy was in its own way modern Stowe argues providing a style of caregiving deeply rooted in individual experience moral values and a consciousness of place and time *JFK's Secret Doctor* Susan E.B. Schwartz, 2015-09-22 Set against the grand panorama of twentieth century world events it captures the remarkable life and spirit of climbing and medical visionary Hans Kraus 1905 1966 Kraus was taught English by James Joyce escaped Nazi dominated Europe and was JFK s secret back specialist A legendary rock climber known for hair raising ascents on two continents Kraus lived a life filled with tragedy and triumph intense passion verve and a whole lot of guts glory and wit One of the great unsung medical pioneers of the twentieth century Kraus made headline news throughout the second half of the 1950s was a guest of honor at Eisenhower s White House and was the subject of cover stories in major magazines throughout America including Sports Illustrated His pioneering work in muscles and fitness uncovered a shocking truth about a lack of fitness in American children and his work curing back pain brought him into the Kennedy White House and inner circle of Camelot Here now is the life of Hans Kraus including the behind the scenes story of Kennedy s crippling back problems based on new documentation including White House medical records and interviews with two Kennedy White House doctors Skyhorse Publishing along with our Arcade Good Books Sports Publishing and Yucca imprints is proud to publish a broad range of biographies autobiographies and memoirs Our list includes biographies on well known historical figures like Benjamin Franklin Nelson Mandela and Alexander Graham Bell as well as villains from history such as Heinrich Himmler John Wayne Gacy and O J Simpson We have also published survivor stories of World War II memoirs about overcoming adversity first hand tales of adventure and much more While not every title we publish becomes a New York Times bestseller or a national bestseller we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home *Rival Truths* Lindsay St Claire, 2018-10-24 It is common sense that our survival as individuals depends on the survival of our physical bodies However common sense has been medicalised

Terms such as road rage and premenstrual syndrome sound like medical problems and suggest that it is affected individuals rather than experiences or circumstances that require treatment Without denying their importance Rival Truths challenges four basic common sense views of health and illness and offers rival social psychological explanations The primacy of biological facts is challenged by looking at the effects of social psychological influences such as those mediated by stress The assumption that medical practices are scientific is challenged by evidence that they also reflect and recreate social constructions The assumption that medical advances are the most effective way to combat disease is questioned as their success may rely on changes in beliefs or behaviour and finally critical analyses suggest that medical treatment can sometimes be to the disadvantage of patients Lindsay St Claire has helped to raise awareness that health problems might be caused by social arrangements not biological dysfunction Thus social psychology might suggest new ways to enhance health status which do not depend on medical breakthroughs This book will be of interest for health psychology students medical students and anyone involved in caring professions

Not What the Doctor Ordered Jeffrey C. Bauer, 2019-07-08 This 25th Anniversary edition completely updates the powerful insights and policy recommendations of Not What the Doctor Ordered first published in 1993 by renowned healthcare futurist and medical economist the author It presents specific solutions to serious problems of cost quality access and outcomes by allowing all Americans to purchase services directly from caregivers who provide an expanding array of medical services at least as well as physicians at lower cost Focusing on new realities of the 21st century the author shows not only why giving consumers the right to choose advanced practitioners is the top priority for improving our overpriced underperforming medical care delivery system but also how to make the necessary changes As he clearly and concisely explains from medical and economic perspectives the key is eliminating physicians monopoly powers over advanced practice nurses clinical pharmacists physical therapists clinical psychologists and other advanced practice AP health professionals who now rival physicians in scientific knowledge and caregiving skills within well defined scopes of practice regulated by state governments

Flourishing Yin Charlotte Furth, 1999-03-05 This book brings the study of gender to Chinese medicine and in so doing contextualizes Chinese medicine in history. It examines the rich but neglected tradition of fuke or medicine for women over the seven hundred years between the Song and the end of the Ming dynasty. Using medical classics, popular handbooks, case histories, and belles lettres, it explores evolving understandings of fertility and menstruation, gestation and childbirth, sexuality, and gynecological disorders. Furth locates medical practice in the home where knowledge was not the monopoly of the learned physician and male doctors had to negotiate the class and gender boundaries of everyday life. Women as healers and as patients both participated in the dominant medical culture and sheltered a female sphere of expertise centered on, but not limited to, gestation and birth. Ultimately, her analysis of the relationship of language, text, and practice reaches beyond her immediate subject to address theoretical problems that arise when we look at the epistemological foundations of our knowledge of the body and its history. The Family Herald, 1877 **Handley Cross** Robert Smith Surtees, 1903

Handley Cross; Or, Mr. Jorrocks's Hunt Robert Smith Surtees, 1854 **Out of a labyrinth** Emma M. Van Deventer, 1887 **Thinking with Cases** Charlotte Furth, Judith T. Zeitlin, Ping-chen Hsiung, 2007-02-28 Case studies fascinate because they link individual instances to general patterns and knowledge to action without denying the priority of individual situations over the generalizations derived from them. In this volume, an international group of senior scholars comes together to consider the use of cases to produce empirical knowledge in premodern China. They trace the process by which the project of thinking with cases acquired a systematic and public character in the ninth century CE and after. Premodern Chinese experts on medicine and law circulated printed case collections to demonstrate efficacy or claim validity for their judgments. They were joined by authors of religious and philosophical texts. The rhetorical strategies and forms of argument used by all of these writers were allied with historical narratives, exemplary biographies, and case examples composed as aids to imperial statecraft. The innovative and productive explorations gathered here present a coherent set of interlocking arguments that will be of interest to comparativists as well as specialists on premodern East Asia. For China scholars, they examine the interaction of different fields of learning in the late imperial period, the relationship of evidential reasoning and literary forms, and the philosophical frameworks that linked knowledge to experience and action. For

comparativists the essays bring China into a global conversation about the methodologies of the human sciences Contributors Chu Honglam Charlotte Furth Hsiung Ping chen Jiang Yonglin Yasuhiko Karasawa Robert Sharf Pierre tienne Will WuYanhong Judith T Zeitlin *Eating Drugs* Stefan Ecks,2014 A Hindu monk in Calcutta refuses to take his psychotropic medications His psychiatrist explains that just as his body needs food the drugs are nutrition for his starved mind Does it matter how or whether patients understand their prescribed drugs Millions of people in India are routinely prescribed mood medications Pharmaceutical companies give doctors strong incentives to write as many prescriptions as possible with as little awkward questioning from patients as possible Without a sustained public debate on psychopharmaceuticals in India patients remain puzzled by the notion that drugs can cure disturbances of the mind While biomedical psychopharmaceuticals are perceived with great suspicion many non biomedical treatments are embraced Stefan Ecks illuminates how biomedical Ayurvedic and homeopathic treatments are used in India and argues that pharmaceutical pluralism changes popular ideas of what drugs do Based on several years of research on pharmaceutical markets Ecks shows how doctors employ a wide range of strategies to make patients take the remedies prescribed Yet while metaphors such as mind food may succeed in getting patients to accept the prescriptions they also obscure a critical awareness of drug effects This rare ethnography of pharmaceuticals will be of key interest to those in the anthropology and sociology of medicine pharmacology mental health bioethics global health and South Asian studies *American Observer* ,1873 *The Doctor's Recreation Series* Charles Wells Moulton,1905 *Galen and the Rhetoric of Healing* Susan P.
