River Out of Eden Richard Dawkins, 2008-08-04 How did the replication bomb we call life begin and where in the world or rather in the universe is it heading Writing with characteristic wit and an ability to clarify complex phenomena the New York Times described his style as the sort of science writing that makes the reader feel like a genius Richard Dawkins confronts this ancient mystery

River Out of Eden Richard Dawkins, 2014-03-20 The No 1 SUNDAY TIMES bestseller A fascinating explanation of how evolution works from bestselling author of THE GOD DELUSION Dawkins is a brilliant communicator SUNDAY TELEGRAPH A model of simplicity and power Douglas Adams The river of Dawkins's title is a river of DNA flowing through time from the beginning of life on earth to the present and onwards Dawkins explains that DNA must be thought of as the most sophisticated information system imaginable Life is just bytes and bytes of information he writes Using this perspective he describes the mechanisms by which evolution has taken place gradually but inexorably over a period of three thousand million years It is the story of how evolution happens rather than a narrative of what has actually happened in evolution He discusses current views on the process of human evolution including the idea that we all trace back to a comparatively recent African Eve and speculates that the information explosion that was unleashed on Earth when DNA came into being has almost certainly happened in other places in the universe

Maupassant's Fiction and the Darwinian View of Life Laurence A. Gregorio, 2005 The Naturalists wrote from a scientific point of view and no science had more currency in society in the late nineteenth century than Darwin's theory of evolution Until now this motif in Guy de Maupassant has escaped critical attention Maupassant's Fiction and the Darwinian View of Life examines evolutionary theory in the literature in a way accessible to students of literature and science alike It first explains the theoretical basis and Maupassant's affinity for it then studies one short story La Ficelle in its entirety proposing a new and interesting interpretation based on evidence read through a Darwinian lens The remaining chapters organize a lively Darwinian reading of Maupassant according to topics such as natural selection heredity and materialism The book shows that Darwinism and the economic variety of Social Darwinism figure significantly in Maupassant's fiction It is a must for students and teachers of Naturalism and Darwinism across the liberal arts

Theistic Evolution Mariusz Tabaczek, 2023-11-02 Deeply rooted in the classical tradition this book develops a contemporary reimagined proposal of an Aristotelian Thomistic perspective on theistic evolution
