Strabo's Geography Strabo, 2024-06-11 A lively new translation of Strabo's complete Geography an encyclopedic guide to the ancient world of the first century CE connecting it with the world of the twenty first century Strabo's Geography is an encyclopedic description of the ancient world as it appeared to a contemporary observer in the early Roman empire Information about taming elephants collecting saffron producing asphalt and practicing yoga is found alongside accounts of prostitution volcanic activity religious festivals and obscure eastern dynasties all set against the shifting backdrop of political power in the first century CE Traveling around

the Mediterranean Strabo gathered knowledge of places and people supplementing his firsthand experiences with an immense amount of reading to create a sweeping chronicle that attempts to answer the implicit questions Who are we and Where do we come from Sarah Pothecary's new translation of Strabo's complete Geography makes this important work more accessible relevant and enjoyable than ever before Conveying the informal lively and almost journalistic style of Strabo's Greek this translation connects the ancient and modern worlds by providing modern names and maps for places mentioned in the text a generous page layout and marginal notes allowing readers to appreciate Strabo's work directly and immediately The result mimics what Strabo was doing two thousand years ago relating the rapidly changing present of his original readers to their own ancient past A remarkably modern translation of a revealing window on the ancient world this is essential reading for anyone interested in how we look at both antiquity and the world today

*River Deltas of America* Yves Earhart, AI, 2025-02-12 *River Deltas of America* explores the dynamic landscapes of these coastal ecosystems highlighting their formation ecological importance and increasing vulnerability These deltas shaped by fluvial geomorphology and sediment transport play a crucial role in supporting biodiversity and providing essential ecosystem services like storm protection and water filtration The book emphasizes the need for sustainable stewardship in the face of threats such as climate change and human activities The book examines the geological processes of delta formation the ecological richness of habitats like mangrove forests and the impact of human activities including levee construction and oil extraction It presents findings from organizations like the USGS and EPA alongside academic research offering potential conservation strategies and policy recommendations Case studies of different American river deltas are included with a focus on the Mississippi Delta Through an accessible and balanced approach *River Deltas of America* integrates insights from climate science urban planning and environmental policy to provide a comprehensive understanding The book progresses from the geological processes of delta formation to the ecological diversity they support and finally to the impact of human activities This interdisciplinary approach underscores the urgency of collaborative solutions for delta conservation and provides a valuable resource for students professionals and anyone interested in these critical environments

*Raw Histories* Elizabeth Edwards, 2021-01-07 Photographs have had an integral and complex role in many anthropological contexts from fieldwork to museum exhibitions This book explores how approaching anthropological photographs as history can offer both theoretical and empirical insights into these roles Photographs are thought to make problematic history because of their ambiguity and rawness In short they have too many meanings The author refutes this prejudice by exploring through a series of case studies precisely the potential of this raw quality to open up new perspectives Taking the nature of photography as her starting point the author argues that photographs are not merely pictures of things

but are part of a dynamic and fluid historical dialogue which is active not only in the creation of the photograph but in its subsequent social biography in archive and museum spaces past and present In this context the book challenges any uniform view of anthropological photography and its resulting archives Drawing on a variety of examples largely from the Pacific the book demonstrates how close readings of photographs reveal not only western agendas but also many layers of differing historical and cross cultural experiences That is photographs can spring leaks to show an alternative viewpoint These themes are developed further by examining the dynamics of photographs and issues around them as used by contemporary artists and curators and presented to an increasingly varied public This book convincingly demonstrates photographs potential to articulate histories other than those of their immediate appearances a potential that can no longer be neglected by scholars and institutions
