**Ndimele, Ozo-mekuri**

## **Rivers And People:**

*Rivers and People* Tom Browne, 1982-01-01      **Scribner's Monthly, an Illustrated Magazine for the People** ,1874

*Rivers for Life* Sandra Postel, Brian Richter, 2012-06-22 The conventional approach to river protection has focused on water quality and maintaining some minimum flow that was thought necessary to ensure the viability of a river. In recent years, however, scientific research has underscored the idea that the ecological health of a river system depends not on a minimum amount of water at any one time but on the naturally variable quantity and timing of flows throughout the year. In *Rivers for Life*, leading water experts Sandra Postel and Brian Richter explain why restoring and preserving more natural river flows are key to sustaining freshwater biodiversity and healthy river systems and describe innovative policies, scientific approaches, and management reforms for achieving those goals. Sandra Postel and Brian Richter explain the value of healthy rivers to human and ecosystem health, describe the ecological processes that support river ecosystems, and how they have been disrupted by dams, diversions, and other alterations. They consider the scientific basis for determining how much water a river needs, examine new management paradigms focused on restoring flow patterns and sustaining ecological health, assess the policy options available for managing rivers and other freshwater systems, explore building blocks for better river governance. Sandra Postel and Brian Richter offer case studies of river management from the United States, the San Pedro River, and the Missouri River in Australia, the Brisbane River in South Africa, and the Sabie River along with numerous examples of new and innovative policy approaches that are being implemented in those and other countries. *Rivers for Life* presents a global perspective on the challenges of managing water for people and nature with a concise yet comprehensive overview of the relevant science, policy, and management issues. It presents exciting and inspirational information for anyone concerned with water policy, planning, and management, river conservation, freshwater biodiversity, or related topics.      *The People of the River* Oscar de la Torre, 2018-08-17 In this history of the black peasants of Amazonia, Oscar de la Torre focuses on the experience of African descended people navigating the transition from slavery to freedom. He draws on social and environmental history to connect them intimately to the natural landscape and to Indigenous peoples. Relying on this world as a repository for traditions, discourses, and strategies that they retrieved especially in moments of conflict, Afro-Brazilians fought for autonomous communities and developed a vibrant ethnic identity that supported their struggles over labor, land, and citizenship. Prior to abolition, enslaved and escaped blacks found in the tropical forest a source for tools, weapons, and trade, but it was also a cultural storehouse within which they shaped their stories and records of confrontations with slaveowners and state authorities. After abolition, the black peasants' knowledge of local environments continued to be key to their aspirations, allowing them to maintain relationships with powerful patrons and to participate in the protest cycle that led Getúlio Vargas to the presidency of Brazil in 1930. In commonly referring to themselves by such names as sons of the river, black Amazonians melded their agro-ecological traditions with their emergent identity as political stakeholders.      Canadian Comprehension
