The Retroviridae Jay A. Levy, 2012-12-06 Providing both historical background and recent advances this series reviews in depth the biologic molecular immunologic and pathologic features of this fascinating virus family The current volume focuses on the avian and murine species which have generated novel insights into cancer and the evolution of the retroviridae

Viroids and Satellites Karl Maramorosch, 1991-09-11 This is an essential bench book that describes the molecular biology structure detection purification and pathogenesis of viroids and satellites The volume begins with an overview of the current status of the field followed by four chapters describing details of methodology nucleic acid probes purification sequence variation complementary RNA probes polyacrylamide gel electrophoresis and mutational analysis of viroid movement and pathogenicity Remaining chapters discuss such topics as viroids that cause apple scar disease in China the cadang cadang disease of palms in the Pacific area viroid like satellite RNAs and a comparison of plant viroids with the human pathogenic delta agent The book will be a major reference work on viroids for years to come and an essential resource for virologists molecular biologists microbiologists geneticists biochemists biomedical investigators plant pathologists and agricultural researchers

Plant Molecular Biology 2 R.G. Herrmann, Brian A. Larkins, 2012-12-06 The VI NATO Advanced Study Institute on Plant Molecular Biology held in Elmau Bavaria Germany from 14 to 23 May 1990 brought together representative scientific leaders from all over the world to review their latest results They presented lectures or posters participated in lively discussions educated students and exchanged views and plans for future research in this highly exciting field of science The experiments data and questions were naturally varied but all of them illustrate that the modern techniques of molecular biology complemented by developments in immunology genetics and ultrastructural research have pervaded nearly every branch of biology The presentations show that these approaches have tremendously increased our potential both for fundamental research our understanding of life and by analogy to the precedents of physics and chemistry have led and will continue to lead to engineering sciences and implicitly to new industrial processes Some of these applications are a matter of debate in the public domain today and many feel that the development of industrial gene technology requires the attention of the whole scientific community Nevertheless the implications of this research for the genetic improvement of agricultural plants are profound Some of the near term technologies being developed provide novel approaches for improving the utility of food

crops They can also result in reduced dependence on the use of pesticides for food production

Plant Protection: Viral Pathogenesis And Disease Resistance - Proceedings Of The Fifth International Symposium

Donald D Bills, Shain-dow Kung, 1995-10-30 This volume emphasizes recent research developments in the field of plant viral pathogenesis and disease resistance focusing on the underlying molecular biology as well as the application of recent advances to agricultural problems Each of the following general topics is covered by four or five chapters genome replication and expression subviral RNA s virus host interactions and expression of viral genes in transformed plants

Viral Genes

and Plant Pathogenesis Thomas P. Pirone, John G. Shaw, 2012-12-06 The chapters in this book represent detailed versions of papers presented at the Symposium on Viral Genes and Plant Pathogenesis held at Lexington Kentucky on October 16 and 17 1989 In selecting topics and authors we attempted to have represented a spectrum of systems which are at the forefront of research on plant virus genes and gene products particularly as they relate to plant disease The book also contains pertinent discussion of the papers presented at the symposium as well as summaries observations and projections of future research directions prepared by the session chairmen We wish to express our appreciation to Dr D L Davis of the R1 Reynolds Tobacco Company for suggesting the organization of the Symposium and the publication of the proceedings and to the R1 Reynolds Tobacco Company for the financial support which made the symposium possible We also wish to thank those of our colleagues in the Department of Plant Pathology University of Kentucky who very ably and in many ways contributed to the organization and conduct of the conference
