*Russia's Diamond Colony* John Tichotsky, 2014-01-02 This study looks at the reform process in Sakha and at a one hundred year history of economic development The research revealed that Sakha s progress has always been determined by the export of key resources

*China's Centralized Industrial Order* Chen Li, 2014-11-13 This book is about the political economy of China s industrial reform and the rise of a group of Chinese big businesses under the Communist Party and the central state s control It examines the origins evolution and institutional configuration of this centralized system in governing the commanding heights of the Chinese industrial economy Shaped by persistent industrial policies to develop China s national champions enterprises the core parts of China s central industrial ministries and mono bank system have been transformed into a national team of giant modern business firms in industries such as oil power generation telecommunications aerospace aviation nuclear shipbuilding mining construction automobile and banking Through an adaptive process of learning

experimentation and restructuring the bedrock of the authority relations and control mechanisms among the Party government bureaucracy and firms has been consolidated rather than dismantled in the system's transformation. This alternative view of China's industrial reform presents a direct challenge to the neo liberal transition model of China's institutional development and the mainstream Western conceptions of Chinese big business. *Hungary on the Road to the European Union* László Andor, 2000-04-30 In November 1997 Hungarians voted in favor of membership in NATO primarily as a step toward membership in the European Union and integration into Western society. Andor examines the changes in Hungarian social, political, and economic life after the collapse of communism in Central Europe. He analyzes the difficulties both internal and external to making that transition. In the early 1990s public discourse was dominated by the enthusiastic slogans proclaiming Hungary's return to Europe. Things can only get better was the prevailing feeling surrounding the dismantling of the state socialist system and the construction of the new parliamentary democracy. From the very early years of transition, however, Hungarians faced large scale and unexpected hardships in their changing lives which made them the most disappointed nation in Eastern Europe by 1993. In the second half of the 1990s the policies of the Socialist Liberal coalition and particularly the positive developments in the enlargement process of NATO and the EU restored the belief in a rapid and successful accession to the major Western economic and security organizations. But as Andor indicates the beginnings of negotiations about entry into NATO and EU will be merely the starting point of difficulties arising in both economics and politics. A thoughtful and cautious look at a changing Hungary that will be of interest to scholars, researchers, and policymakers involved with Central Europe and contemporary European politics and economics. **Global Geographies of Post-Socialist Transition** Tassilo Herrschel, 2006-09-27 Since the formal raising of the Iron Curtain there has been much interest in post socialism and the process of post socialist transition. This timely book provides a systematic review and analysis of the process of transition. Herrschel explores recent theories, concepts, and debates on post socialism and the notion of transition. It provides a systematic topical account of post socialist transitions around the world as evidence by social, economic, and political processes. It examines case studies of post socialist transition in east and Central Europe, the former Soviet Union, Asia, and South East Asia, and Africa and Latin America. It brings together theoretical and practical aspects by examining what lessons can be learned from recent experiences. *Global Geographies of Post Socialist Transition* provides a truly global comparative account of the meaning and processes of post socialist transition and will be an invaluable resource for all those interested in this area. **Socialism** Phillip J. Bryson, 2015-10-09 *Socialism: Origins, Expansion, Decline, and Attempted Revival in the United States* This book is an attempt to address all the important economic aspects of socialism: the concepts and theories, the historical attempts to implement socialist economic systems, and the endeavor to establish socialism in the United States. Part I reviews the origins and ideas of socialism which reflect an aspiration radically to transform the market system, the great advantages of which were explained by Adam Smith. Part II reviews the establishment

of Marxist Leninist economic systems in the USSR and the East European countries. The movement featured central economic planning which survived from the 1920s until about 1990. Its failure was the attempt of statist organization to crush the market system and replace it with Stalinist command planning. Central planning was meticulously copied in the bloc countries of East Europe, in China, in India and elsewhere. The national replications of central economic planning always produced the same disappointing, usually disastrous results. Efforts to reform the system always failed. Meanwhile the democratic countries of Western Europe established socialist parties and policies but in less than a century after Marx the great hopes of socialism to achieve successful and productive nationalization of industries on the basis of a national economic plan had been recognized as unproductive and undesirable. Part III reviews the failed attempt to establish a viable socialist party in the United States. The real thrust toward socialism originally launched by the New Deal of Roosevelt came when Barak Obama, a thoroughly indoctrinated and dedicated socialist, ascended to the US presidency. This socialism is an attempt to expand income redistribution and social welfare policies and to pursue massive industrial regulation and unconstitutional interventions in the private sector. The implications of these policies are discussed together with the associated loss of market freedoms and personal liberties.

*Eastern Europe, 1986-1993* Robert H. Burger, Helen F. Sullivan, 1995-12-15. Describing approximately 1 000 books published between 1986 and late 1993, this work provides readers with a selective guide to English language publications on the subject of Eastern Europe. It covers general studies of the area as well as works on the individual countries of Albania, Bulgaria, the former Czechoslovakia, the former German Democratic Republic, East Germany, Hungary, Poland, Romania, and the former Yugoslavia. In addition to bibliographic and descriptive information, the authors also include citations to book reviews. A companion to their *Russia and the Former Soviet Union*. Libraries Unlimited, 1994. This volume also focuses on the social sciences and the humanities. As interest about this part of the world continues to build, and English language publications about it proliferate, Burger and Sullivan's guide is a pertinent addition to academic and public library collections.

**The Reformability Of China's State Sector** James Wen, Dianqing Xu, 1997-03-01. China has achieved alarming success in accelerating the economic growth rate since it started economic reform about 16 years ago. However, its state sector is still running severe deficits. Even though its productivity might be improved since the reform started, its financial situation nevertheless has been worsening, mainly as a result of increased competition from the rapidly expanding non-state sector. Therefore, the reform of this sector has become an urgent problem. All the papers collected in this book are closely related to the various issues that the reform of the state sector has to solve. Among the contributors are Professor Merton H. Miller, a Nobel laureate and expert on firm finance and governance; Mr. Ji Lin, the vice president of the Chinese Academy of Social Sciences; Dr. Justin Y. Lin, the director of Center of China's Economic Research at Beijing University; Professor Gang Fan, the well-known Chinese Economist and vice director of the Institute of Economic Research at the Chinese Academy of Social Sciences; Professor Guoqiang Tian, an expert on mechanism design at Texas A M University; and
