Economic Management and Transition Towards a Market Economy Anthony T.H. Chin, 1996 Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union However a growing demand for policy advice technical assistance and expertise is also coming from Asian reforming countries such as China Mongolia Vietnam Laos and Cambodia In addition business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries Such developments are too important to overlook or ignore The transformation of socialist economies towards market based systems entails an unusually wide range of problems Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents Although the structural features of Asian reforming economies are in important ways different from those of the Eastern European economies all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues This volume brings together a rich collection of expertise and information in an attempt to shed some light on the transitional process in Asia The contributions are by no means exhaustive However they provide the reader and

Benjamin Barros, 2016-04-22 Hernando de Soto is one

of the world's leading public intellectuals His books *The Mystery of Capital* and *The Other Path* have had a tremendous impact on debates about international development but his work also has been controversial One of de Soto's core ideas is that the institution of private property is necessary for the proper functioning of a market economy yet even though many property scholars closely follow de Soto's work his ideas have been neglected in property law scholarship and mature market economies like the United States This new collection seeks to remedy this neglect bringing together a diverse group of scholars to apply de Soto's work to a wide range of contemporary issues in property law and theory The important contribution it makes to debates and controversies in property law as well as in related economic fields will appeal to scholars of both law and economics The Roman Market Economy Peter Temin, 2017-09-05 What modern economics can tell us about ancient Rome The quality of life for ordinary Roman citizens at the height of the Roman Empire probably was better than that of any other large group of people living before the Industrial Revolution The Roman Market Economy uses the tools of modern economics to show how trade markets and the Pax Romana were critical to ancient Rome's prosperity Peter Temin one of the world's foremost economic historians argues that markets dominated the Roman economy He traces how the Pax Romana encouraged trade around the Mediterranean and how Roman law promoted commerce and banking Temin shows that a reasonably vibrant market for wheat extended throughout the empire and suggests that the Antonine Plague may have been responsible for turning the stable prices of the early empire into the persistent inflation of the late He vividly describes how various markets operated in Roman times from commodities and slaves to the buying and selling of land Applying modern methods for evaluating economic growth to data culled from historical sources Temin argues that Roman Italy in the second century was as prosperous as the Dutch Republic in its golden age of the seventeenth century The Roman Market Economy reveals how economics can help us understand how the Roman Empire could have ruled seventy million people and endured for centuries **China's Rural Development Road** Xiaoshan Zhang, Zhou Li, 2017-10-27 This
