The Sky Is Smiling Kevin Munro, 2015-04 I was released from an inpatient mental health ward in early March 2006 A trophy pictured in the preface of this book displays the date July 23 2006 as the initial USA competition poetry award That date marks the deadline of the period required for a poem to be created entered and judged All that was left for application after my 20 years of post grad training was creative writing My hidden hope was to offer in a real way an apology via deed to all those who encountered me when I was unwell There is something strange regarding that period s legal progress since society so easily ignores this as dealing with madness My elderly mother watched as my life appeared to unravel but always offered support In 2009 as she lay upon her deathbed in hospital she held the first volume for which she was my sounding board She smiled and said Well at least you have a little hope appearing now These works you hold are the collated works of this period of hurtful outpour and are continuous from early 2006 until late 2014

Edge-based Clausal Syntax Paul Martin Postal, 2010 An argument that there are three kinds of English grammatical objects each with different syntactic properties In Edge Based Clausal Syntax Paul Postal rejects the notion that an English phrase of the form V DP invariably involves a grammatical relation properly characterized as a direct object He argues instead that at least three distinct relations occur in such a structure The different syntactic properties of these three kinds of objects are shown by how they behave in passives middles able forms tough

movement wh movement Heavy NP Shift Ride Node Raising re prefixation and many other tests This proposal renders Postal's position sharply different from that of Chomsky who defined a direct object structurally as NP VP and with the traditional linguistics text's definition of the direct object as the DP sister of V According to Postal's framework sentence structures are complex graph structures built on nodes vertices and edges arcs The node that heads a particular edge represents a constituent that bears the grammatical relation named by the edge label to its tail node This approach allows two DPs that have very different grammatical properties to occupy what looks like identical structural positions The contrasting behaviors of direct objects which at first seem anomalous even grammatically chaotic emerge in Postal's account as nonanomalous as symptoms of hitherto ungrasped structural regularity
