The Gas Station in America John A. Jakle, Keith A. Sculle, 1994 The first architect designed gas station a Pittsburgh Gulf station in 1913 was also the first to offer free road maps the familiar Shell name and logo date from 1907 when a British mother of pearl importer expanded its line to include the newly discovered oil of the Dutch East Indies the first enclosed gas stations were built only after the first enclosed cars made motoring a year round activity and operating a service station was no longer a seasonal job the system of octane rating was introduced by Sun Oil as a marketing gimmick 74 for premium in 1931 As the number of true gas stations continues its steady decline from 239 000 in 1969 to fewer than 100 000 today the words and images of this book bear witness to an economic and cultural phenomenon that was perhaps more uniquely American than any other of this century Jacket [Frame by Frame II](#) Phyllis Rauch Klotman, Gloria J.

Liste-Noya, 2011-08-25 Predicated upon the principles of political freedom cultural openness religious tolerance individual self reliance and ethnic diversity the United States of America has been tempted recurrently by the lures of the secret American Secrets explores this political historical and cultural phenomenon from many often surprisingly overlapping angles in these analyses of the literary and cultural uses and abuses of secrecy within a democratic culture Through analyses of diverse literary works and cultural manifestations from Mark Twain's anti imperialist prophecies to 9 11 conspiracy theories from the traumas of the Vietnam war to the homophobia of the American military establishment from the unresolved dilemmas of nuclear politics to the secret ecologies shunted aside by the exploitation of the environment from the questionings of national identity on the ethnic and trans sexual margins to the confessional modes of poetry and the poetics of the unspeakable and unrepresentable these essays reveal the politics within the poetics and indissociably the poetics fueling the politics of secrecy in its ambivalent deployment Secrecy often seems to be a question without an answer or an answer that either seems to beg the question or to be a question itself These essays address this paradox with their own questioning explorations In answering such questions the volume as a whole provides an illuminating overview of the pervasiveness of the secret and its modalities in American culture while also dealing specifically with the poetics of the secret

Woodstock FAQ Thomas E. Harkins, 2019-08-15 Thomas Edward Harkin's Woodstock FAQ All That's Left to Know About the Fabled Garden cuts through the lofty rhetoric and mythology surrounding the legendary festival Rather than waxing philosophical about whether or not the Woodstock Music Art Fair was the defining moment of the 1960s as so many have done before Harkins places the focus on the music solo artists and bands who performed Thirty two acts took to the stage in Bethel New York that weekend and the book gives the performers and the music their due consideration Who were they Where did they come from What songs did they play What happened to them afterward How did the festival impact their careers Those are the questions explored in these pages Further the book attempts to restore the chronological arc of the festival from concept to concert to its aftermath and enduring legacy Drawing on his experiences as a media scholar Harkins ponders how the album releases and Michael Wadleigh's Academy Award winning 1970 film Woodstock helped shape the narrative of the festival and in the bargain distort people's memories of the actual event

Atomic Bomb Cinema Jerome F. Shapiro, 2013-05-13 Unfathomably merciless and powerful the atomic bomb has left its indelible mark on film In *Atomic Bomb Cinema* Jerome F Shapiro unearths the unspoken legacy of the bombing of Nagasaki and Hiroshima and its complex aftermath in American and Japanese cinema According to Shapiro a Bomb film is never simply an exercise in ideology or paranoia He examines hundreds of films like *Godzilla* *Dr Strangelove* and *The Terminator* as a body of work held together by ancient narrative and

symbolic traditions that extol survival under devastating conditions Drawing extensively on both English language and Japanese language sources Shapiro argues that such films not only grapple with our nuclear anxieties but also offer signs of hope that humanity is capable of repairing a damaged and divided world [www atomicbombcinema com](http://www.atomicbombcinema.com)
