***A History of Ancient Rome in Twelve Coins*** Gareth Harney, 2025-01-14 Hold the glory and infamy of ancient Rome in the palm of your hand in this extraordinary and accessible story of history's greatest superpower as told through humanity's most universal object the coin When Gareth Harney was first handed a Roman coin by his father as a child he became entranced by its beauty and its unique ability to connect us with the distant past He soon learned that the Romans saw coins as far more than just currency these were metal canvases on which they immortalized their sacred gods mighty emperors towering monuments and brutal battles of conquest Revealed in those intricate designs struck in gold silver and bronze was the epic story of the Roman Empire Now with his novel and highly readable Philip Matyszak author of *The Blood Red Sunset* voice and engaging research Harney traces ancient Rome's rise from a few huts on an Italian hilltop to an all conquering empire spanning three continents through the fascinating lives of twelve remarkable coins A unique and enthralling work of history for experts and casual history buffs

**History of Palaeobotany** A. J. Bowden, Cynthia V. Burek, R. Wilding, 2005 Often regarded as the Cinderella of palaeontological studies palaeobotany has a history that contains some fascinating insights into scientific endeavour especially by palaeontologists who were perusing a personal interest rather than a career The problems of maintaining research facilities in universities especially in the modern era are described and reveal a noticeable absence of a national UK strategy to preserve centres of excellence in an avowedly specialist area Accounts of some of the pioneers demonstrate the importance of collaboration between taxonomists and illustrators The importance of palaeobotany in the rise of geoconservation is outlined as well as the significant and influential role of women in the discipline Although this volume has a predominantly UK focus two very interesting studies outline the history of palaeobotanical work in Argentina and China
