Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing Successive chapters focus on Greco Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post Newtonian mechanics The volume will interest historians of science and historians of the idea of creation It simultaneously details the persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution *Routledge History of Philosophy Volume III* John Marenbon, 2003-09-02 The philosophy discussed in this volume constitutes the intellectual and philosophical ideas of the medieval era from Aquinas and Anselm the intellectual philosophy of the Judaic and Arabic traditions the Twelfth Century Renaissance and the philosophical ideas associated with the emergence of the universities This volume provides a broad and scholarly introduction to the major authors and issues involved in the philosophical discourse of the medieval era as well as some original interpretations of the philosophical writings addressed It includes a glossary of technical terms and a chronological table of philosophical and other cultural events *The Cambridge Bibliography of English Literature* Frederick Wilse Bateson, 1940 **Classical Influences on Western Thought A.D. 1650-1870** R. R. Bolgar, 2010-06-10 This volume examines the progress of classical studies to the general history of ideas from 1650 to 1870 *Science, Optics, and Music in Medieval and Early Modern Thought* Alistair Cameron Crombie, 1990-01-01 A C Crombie is one of the best known writers on the history of Science Science Optics and Music in Medieval and Early Modern Thought brings together a coherent body of essays that complement his books and are of independent value A C Crombie traces general themes in the development of Science the Aristotelian inheritance and the importance of the search for logical explanation in the middle ages the ambitions and limitations of experiment and quantification changing attitudes to scientific progress the relations between Science and the Arts and between Mathematics Music and Medical Science and the study of the senses In particular he shows how the mechanistic hypothesis stimulated the experimental and philosophical study of vision **The Scientific Achievement of the Middle**

Ages Richard C. Dales, 2015-02-23 The scientists of the twelfth century were daring original inventive and above all determined to discover purely rational explanations of natural phenomena Their intense interest in the natural world for its own sake their habits of precise observation and the high value they place on man as a rational being portend a new age in the history of scientific thought This book offers a comprehensive sampling of medieval scientific thought in the context of an historical narrative The New Cambridge Bibliography of English Literature George Watson, Ian Roy Willison, 1974 **A History of the University in Europe: Volume 1, Universities in the Middle Ages** Hilde de Ridder-Symoens, 1991-11-07 This the first in the series is also the first volume on the medieval University as a whole to be published in over a century It provides a synthesis of the intellectual social political and religious life of the early University and gives serious attention to the development of classroom studies and how they changed with the coming of the Renaissance and the Reformation Following the first stirrings of the University in the thirteenth century the evolution of the University is traced from the original Corporation of masters and Scholars through the early development of the colleges The second half of the book focuses on the century from the 1440s to 1540s which saw the flowering of the University under Tudor patronage In the decades preceding the Reformation many colleges were founded the teaching structures reorganised and the curriculum made more humanistic The place of Cambridge at the forefront of northern European universities was eventually assured when Henry VIII founded Trinity College in 1546 in the face of changes and difficulties experienced during the course of the Reformation **The Philosophy of Historical Case Studies** Tilman Sauer, Raphael Scholl, 2016-05-24 This volume collects reflections on the role of philosophy in case studies in the history of science Case studies have played a prominent role in recent history and philosophy of science They have been used to illustrate question explore or explicate philosophical points of view Even if not explicitly so historical narratives are always guided by philosophical background assumptions But what happens if different philosophies lead to different narratives of the same historical episodes Can historical case studies decide between competing philosophical viewpoints What are the criteria that a case study has to fulfill in order to be philosophically relevant Bringing together leading practitioners in the fields of history and philosophy of the physical and the life sciences this volume addresses this methodological problem and proposes ways of rendering explicit philosophical assumptions of historical work *Science in the Middle Ages* David C. Lindberg, 1978 In this book sixteen leading scholars address themselves to providing as full an account of medieval science as current knowledge permits Designed to be introductory the authors have directed their chapters to a beginning audience of diverse readers *The Routledge Research Companion to John Gower* Ana Saez-Hidalgo, Brian Gastle, R.F. Yeager, 2017-03-31 The Routledge Research Companion to John Gower reviews the most current scholarship on the late medieval poet and opens doors purposefully to research areas of the future It is divided into three parts The first part Working theories medieval and modern is devoted to the main theoretical aspects that frame Gower's work ranging from his use of medieval law rhetoric theology and religious attitudes to

approaches incorporating gender and queer studies The second part Things and places material cultures examines the cultural locations of the author not only from geographical and political perspectives or in scientific and economic context but also in the transmission of his poetry through the materiality of the text and its reception Polyvocality text and language the third part focuses on Gower's trilingualism his approach to history and narratological and intertextual aspects of his works The Routledge Research Companion to John Gower is an essential resource for scholars and students of Gower and of Middle English literature history and culture generally

Later Platonists and their Heirs among Christians, Jews, and Muslims Eva Anagnostou, Ken Parry, 2022-12-28 Later Platonists and their Heirs among Christians Jews and Muslims offers a thought provoking exploration of the reception of Platonism among communities of faith from early Christianity to the sixteenth century from the Byzantine East to the Latin West Rare emphasis is placed on the importance of Platonic thought and its diffusion in late antique and medieval Syria Armenia and Georgia but also among Arab and Jewish intellectuals from the seventh century onwards As such the volume makes a statement against the separation of Neoplatonic philosophy from Christianity and the other Abrahamic faiths since all four traditions promoted a life of virtue and goodness despite operating under different divine auspices The volume seeks to establish paths of transmission and modes of adaptation across times and places

The Intellectual Properties of Learning John Willinsky, 2018-01-02 Providing a sweeping millennium plus history of the learned book in the West John Willinsky puts current debates over intellectual property into context asking what it is about learning that helped to create the concept even as it gave the products of knowledge a different legal and economic standing than other sorts of property Willinsky begins with Saint Jerome in the fifth century then traces the evolution of reading writing and editing practices in monasteries schools universities and among independent scholars through the medieval period and into the Renaissance He delves into the influx of Islamic learning and the rediscovery of classical texts the dissolution of the monasteries and the founding of the Bodleian Library before finally arriving at John Locke whose influential lobbying helped bring about the first copyright law the Statute of Anne of 1710 Willinsky's bravura tour through this history shows that learning gave rise to our idea of intellectual property while remaining distinct from if not wholly uncompromised by the commercial economy that this concept inspired making it clear that today's push for marketable intellectual property threatens the very nature of the quest for learning on which it rests
