Brickstamps of Constantinople Jonathan Bardill, 2004 Brickstamps of Constantinople is the first major catalogue and analysis of stamped bricks manufactured in Constantinople and its vicinity in the Late Roman and Early Byzantine periods. The text discusses the organization of the brickmaking industry, the purpose of brickstamping and establishes for the first time a chronology for the brickstamps. On the basis of the conclusions, dates are proposed for previously undated buildings in the city and revised dates are given for other monuments.

The Beginning of Understanding Marti Lu Allen, 1991

The Cambridge Manual of Latin Epigraphy Alison E. Cooley, 2012-09-13 This book advances our understanding of the place of Latin inscriptions in the Roman world. It enables readers, especially those new to the subject, to appreciate both the potential and the limitations of inscriptions as historical source material by considering the diversity of epigraphic culture in the Roman world and how it has been transmitted to the twenty-first century. The first chapter offers an epigraphic sample drawn from the Bay of Naples illustrating the dynamic epigraphic culture of that region. The second explores in detail the nature of epigraphic culture in the Roman world, probing the limitations of traditional ways of dividing up inscriptions into different categories and offering examples of how epigraphic culture developed in different geographical, social and religious contexts. It examines the life cycle of inscriptions: how they were produced, viewed, reused and destroyed. Finally, the third provides guidance on deciphering inscriptions, face to face and handling specialist epigraphic publications.

Pen, Print and Communication in the Eighteenth Century Caroline Archer-Parré, Malcolm Dick, 2020 This volume considers writing and printing in parallel; it highlights the intersections between the two methods of communication, considers how writing and printing were deployed in the construction of personal and cultural identities and explores the production, distribution and consumption of private and public letters, words and texts during the eighteenth century.

Epigraphic Evidence John Bodel, 2012-11-12 Epigraphic Evidence is an accessible guide to the responsible use of Greek and Latin inscriptions as sources for ancient history. It introduces the types of historical information supplied by inscriptional texts and the methods with which they can be used. It outlines the limitations as well as the advantages of the different types of evidence covered. Epigraphic Evidence includes a general introduction, a guide to the arrangement of the standard corpora, inscriptions and individual chapters on local languages and native cultures, epitaphs and the ancient economy, amongst others.

Dolia Caroline Cheung, 2024-04-23 The story of the Roman Empire's enormous wine industry told through the remarkable ceramic storage and shipping containers that made it possible. The average resident of ancient Rome drank two hundred and fifty liters of wine a year, almost a bottle a day, and the total annual volume of wine consumed in the imperial capital would have overflowed the Pantheon. But Rome was too densely developed and populated to produce its own food, let alone wine. How were the Romans able to get so much wine? The key was the dolium, the ancient world's largest type of ceramic wine and food storage and shipping container. Some of

which could hold as much as two thousand liters In Dolia classicist and archaeologist Caroline Cheung tells the story of these vessels from their emergence and evolution to their major impact on trade and their eventual disappearance Drawing on new archaeological discoveries and unpublished material Dolia uncovers the industrial and technological developments the wide variety of workers and skills and the investments behind the Roman wine trade As the trade expanded potters developed new techniques to build large standardized dolia for bulk fermentation storage and shipment Dolia not only determined the quantity of wine produced but also influenced its quality becoming the backbone of the trade As dolia swept across the Mediterranean and brought wine from the far reaches of the empire to the capital s doorstep these vessels also drove economic growth from rural vineyards and ceramic workshops to the wine shops of Rome Placing these unique containers at the center of the story Dolia is a groundbreaking account of the Roman Empire s Mediterranean wide wine industry
