Transfer and Interference in Language Monika Brüggemeier, Dietmar Fütterer, 1984 The topic of this bibliography in its broadest sense is the subject of a wide range of academic disciplines Given these circumstances the particular associations and connotations of the terms transfer and interference in each of these areas are legion with resultant differences in meaning in the disparate literature on these subjects And yet it is in one way or another contact and interaction of languages in the speaker hearer and learner in language acquisition contexts as well as in society in general which is basic to these two concepts throughout the various disciplines The discovery of this basic unitary notion is surely one of the reasons for the new interest in these phenomena In light of all this a bibliography cannot at present avoid being highly selective in order to demarcate an interdisciplinary area of research in its own right and with its own status The establishment of such an area is one of our main aims The focus of interest in this bibliography admittedly is directed towards the psycholinguistics of language contact and interaction

A Bibliography on Writing and Written Language Konrad Ehlich, Florian Coulmas, Gabriele Graefen, 2011-06-01 The bibliography offers information on research about writing and written language over the past 50 years No comprehensive

bibliography on this subject has been published since Sattler's 1935 handbook. With a selection of some 27 500 titles it covers the most important literature in all scientific fields relating to writing. Emphasis has been placed on the interdisciplinary organization of the bibliography creating many points of common interest for literacy experts, educationalists, psychologists, sociologists, linguists, cultural anthropologists and historians. The bibliography is organized in such a way as to provide the specialist as well as the researcher in neighboring disciplines with access to the relevant literature on writing in a given field. While necessarily selective it also offers information on more specialized bibliographies. In addition an overview of norms and standards concerning script and writing will prove very useful for non professional readers. It is therefore also of interest to the generally interested public as a reference work for the humanities.

Errors are information. In contrastive linguistics they are thought to be caused by unconscious transfer of mother tongue

structures to the system of the target language and give information about both systems. In the interlanguage hypothesis of

second language acquisition errors are indicative of the different intermediate learning levels and are useful pedagogical

feedback. In both cases error analysis is an essential methodological tool for diagnosis and evaluation of the language

acquisition process. Errors too give information in psychoanalysis e.g. the Freudian slip in language universal research and in

other fields of linguistics such as linguistic change. This bibliography is intended to stimulate study into cross language cross

discipline and cross theoretical as well as for language universal use of the numerous but sometimes hard to come by error analysis studies 5398 titles covering the period 1578 up to 1990 with work in more than 144 languages and language families are cited cross referenced and described The subject areas covered are numerous For example Theoretical Linguistics Linguistic Typology Cognitive Linguistics Historical Linguistics Language Change Applied Linguistics e g Speech Disorders Translation Mother Tongue Acquisition Foreign Language Learning Negative Transfer Intralingual and Interlingual Errors Psychoanalysis Slips of the Tongue Typography Shorthand Clinical Linguistics and Speech Pathology Reading Research Automatic Error Detection Contact Linguistics Code switching Interference etc **Heidelberger Jahrbücher H.**
