Romantic Science The Literary Forms Of Natural History:

Romantic Science Noah Heringman, 2003-07-02 Uncovers the vital role that new scientific discoveries played in Romantic literary culture

Romantic Science Noah Heringman, 2012-02-01 Although romantic science may sound like a paradox much of the romance surrounding modern science the mad scientist the intuitive genius the utopian transformation of nature originated in the Romantic period Romantic Science traces the literary and cultural politics surrounding the formation of the modern scientific disciplines emerging from eighteenth century natural history Revealing how scientific concerns were literary concerns in the Romantic period the contributors uncover the vital role that new discoveries in earth plant and animal sciences played in the period s literary culture As Thomas Pennant put it in 1772 Natural History is at present the favourite science over all Europe and the progress which has been made in it will distinguish and characterise the eighteenth century in the annals of literature As they examine the social and literary ramifications of a particular branch or object of natural history the contributors to this volume historicize our present intellectual landscape by reimagining and redrawing the disciplinary boundaries between literature and science Contributors include Alan Bewell Rachel Crawford Noah Heringman Theresa M Kelley Amy Mae King Lydia H Liu Anne K Mellor Stuart Peterfreund and Catherine E Ross

Autobiography and Natural Science in the Age of Romanticism Bernhard Kuhn, 2016-04-15 Set against the backdrop of a rapidly fissuring disciplinary landscape where poetry and science are increasingly viewed as irreconcilable and unrelated Bernhard Kuhn s study uncovers a previously ignored fundamental connection between autobiography and the natural sciences Examining the autobiographies and scientific writings of Rousseau Goethe and Thoreau as representative of their ages Kuhn challenges the now entrenched thesis of the two cultures Rather these three writers are exemplary in that their autobiographical and scientific writings may be read not as separate or even antithetical but as mutually constitutive projects that challenge the newly emerging boundaries between scientific and humanistic thought during the Romantic period Reading each writer s life stories and nature works side by side as they were written Kuhn reveals the scientific character of autobiographical writing while demonstrating the autobiographical nature of natural science He considers all three writers in the context of scientific developments in their own times as well as ours showing how each one marks a distinctive stage in the growing estrangement of the arts and sciences from the self assured epistemic unity of Rousseau s time to the splintering of disciplines into competing ways of knowing under the pressures of specialization and professionalization during the late Romantic age of Thoreau His book thus traces an unfolding drama in which these writers and their contemporaries each situated in an intellectual landscape more fragmented than the last seek to keep together what modern culture is determined to break apart

Uncommon Contexts: Encounters between Science and Literature, 1800-1914 Ben Marsden, Hazel Hutchinson, Ralph O'Connor, 2016-09-12 Britain in the long nineteenth century developed an increasing interest in science of all kinds Whilst poets and novelists took inspiration from technical and scientific innovations those directly engaged in these

new disciplines relied on literary techniques to communicate their discoveries to a wider audience The essays in this collection uncover this symbiotic relationship between literature and science at the same time bridging the disciplinary gulf between the history of science and literary studies Specific case studies include the engineering language used by Isambard Kingdom Brunel the role of physiology in the development of the sensation novel and how mass communication made people lonely

The Poetry of Erasmus Darwin Martin Priestman, 2016-02-24 While historians of science have focused significant attention on Erasmus Darwin's scientific ideas and milieu relatively little attention has been paid to Darwin as a literary writer In *The Poetry of Erasmus Darwin* Enlightened Spaces Romantic Times Martin Priestman situates Darwin's three major poems *The Loves of the Plants* 1789 *The Economy of Vegetation* 1791 and *The Temple of Nature* 1803 and Darwin himself within a large polymathic late Enlightenment network of other scientists writers thinkers and social movers and shakers Interpreting Darwin's poetry in terms of Darwin's broader sense of the poetic text as a material space he posits a significant shift from the Enlightenment's emphases on conceptual spaces to the Romantic period's emphases on historical time He shows how Darwin's poetry illuminates his stance toward all the major physical sciences and his well formulated theories of evolution and materially based psychology Priestman's study also offers the first substantial accounts of Darwin's mythological theories and their links to Enlightenment Rosicrucianism and Freemasonry and of the reading of history that emerges from the fragment poem *The Progress of Society* a first ever printed edition of which is included in an appendix Ultimately Priestman's book offers readers a sustained account of Darwin's polymathic Enlightenment worldview and cognate poetics in a period when texts are too often judged by their adherence to a retrospectively constructed Romanticism

The Divine in the Commonplace Amy M. King, 2019-07-18 Explores how natural theology features in both early Victorian natural histories and English provincial realist novels of the same period

Marking Time Joel Faflak, 2017-01-01 *Marking Time* edited by Joel Faflak analyses prevailing notions of evolution by tracing its origins to the literary scientific and philosophical discourses of the long nineteenth century

Worm Work Janelle A. Schwartz, 2012 Worms Natural history is riddled with them Literature is crawling with them From antiquity to today the ubiquitous and multiform worm provokes an immediate discomfort and unconscious distancing it remains us against them in anthropocentric anxiety So there is always something muddled or dirty or even offensive when talking about worms Rehabilitating the lowly worm into a powerful aesthetic trope Janelle A Schwartz proposes a new framework for understanding such a strangely animate nature Worms she declares are the very matter with which the Romantics rethought the relationship between a material world in constant flux and the human mind working to understand it *Worm Work* studies the lesser known natural historical records of Abraham Trembley and his contemporaries and the familiar works of Erasmus Darwin Charles Darwin William Blake Mary Shelley and John Keats to expose the worm as

an organism that is not only reviled as a taxonomic terror but revered as a sign of great order in nature as well as narrative. This book traces a pattern of cultural production a vermiculture that is as transformative of matter as it is of mind. It distinguishes decay or division as positive processes in Romantic era writings compounded by generation or renewal and used to represent the biocentric complex structuring of organicism. Offering the worm as an archetypal figure through which to recast the evolution of a literary order alongside questions of taxonomy from 1740 to 1820 and on Schwartz unearths Romanticism as a rich humus of natural historical investigation and literary creation. Far Off Metal River Emilie Cameron, 2015-06-01 *Far Off Metal River* examines how explorer Samuel Hearne's account of the alleged 1771 Bloody Falls massacre in the Central Arctic has shaped ongoing colonization and economic exploitation of the North. As Emilie Cameron demonstrates the Arctic has for centuries been treated like a blank page onto which a long line of explorers missionaries anthropologists resource companies and politicians have inscribed stories that serve their own interests. These stories have played a central role in shaping the region including efforts to open the North to industrial resource extraction. Consequently Qablunaat non Inuit non Indigenous people have a responsibility to question their relationships with the North and northerners first by placing these stories within their proper historical geographical and social context and then by developing new understandings and new relationships that reflect the actual political cultural economic environmental and social landscapes of the contemporary Arctic. **Sound and Sense in British Romanticism** James Grande, Carmel Raz, 2023-09-07 A captivating exploration of the newly reimagined world of sound and sense in Britain in the decades around 1800. *Art, Science, and the Body in Early Romanticism* Stephanie O'Rourke, 2021-11-04 Can we really trust the things our bodies tell us about the world? This work reveals how deeply intertwined cultural practices of art and science questioned the authority of the human body in the late eighteenth and early nineteenth centuries. Focusing on Henry Fuseli Anne Louis Girodet and Philippe de Loutherbourg it argues that romantic artworks participated in a widespread crisis concerning the body as a source of reliable scientific knowledge. Rarely discussed sources and new archival material illuminate how artists drew upon contemporary sciences and inverted them undermining their founding empiricist principles. The result is an alternative history of romantic visual culture that is deeply embroiled in controversies around electricity mesmerism physiognomy and other popular sciences. This volume reorients conventional accounts of romanticism and some of its most important artworks while also putting forward a new model for the kinds of questions that we can ask about them. Romantic Naturalists, Early Environmentalists Dewey W. Hall, 2016-04-08 In his study of Romantic naturalists and early environmentalists Dewey W. Hall asserts that William Wordsworth and Ralph Waldo Emerson were transatlantic literary figures who were both influenced by the English naturalist Gilbert White. In Part 1 Hall examines evidence that as Romantic naturalists interested in meteorology Wordsworth and Emerson engaged in proto environmental activity that drew attention to the potential consequences of the locomotive's

incursion into Windermere and Concord In Part 2 Hall suggests that Wordsworth and Emerson shaped the early environmental movement through their work as poets turned naturalists arguing that Wordsworth influenced Octavia Hill's contribution to the founding of the United Kingdom's National Trust in 1895 while Emerson inspired John Muir to spearhead the United States National Parks movement in 1890 Hall's book traces the connection from White as a naturalist turned poet to Muir as the quintessential early environmental activist who camped in Yosemite with President Theodore Roosevelt Throughout Hall raises concerns about the growth of industrialization to make a persuasive case for literature's importance to the rise of environmentalism

The Botanic Garden by Erasmus Darwin Adam Komisaruk, 2017-07-06 The career of Erasmus Darwin 1731-1802 affords an extraordinary glimpse into the intellectual ferment of late eighteenth and early nineteenth century Britain As a popular poet practicing physician inventor of speaking machines and mechanical birds essayer of natural history from geology to meteorology and proponent of an evolutionary theory that inspired his famous grandson Charles he left a lasting impression on almost every branch of knowledge His magnum opus and the synthesis of his myriad interests is *The Botanic Garden* 1792 an epic poem that aims to enlist the Imagination under the banner of Science Part I *The Economy of Vegetation* sings the praises of British industry as a dance of supernatural creatures while part II *The Loves of the Plants* wittily employs metaphors of human courtship to describe the reproductive cycles of hundreds of flowers Darwin supplements his accomplished verses with often much longer philosophical notes that offer his idiosyncratic perspective on the scholarly controversies of the day Despite a recent surge of academic interest in Darwin however no authoritative critical edition of *The Botanic Garden* exists presenting a barrier to further scholarship This two volume set comprises a complete meticulously transcribed reading text including all the poetry prose apparatus and illustrations along with extensive commentary that situates Darwin within contemporary debates about the natural sciences This set will be of interest to readers as the definitive reference edition of *The Botanic Garden* and due to its efforts to make the work more practically and intellectually accessible to seasoned and novice readers alike This second volume includes the full version of the second part of *The Botanic Garden* *The Lives of Plants* along with the related textual apparatus consisting of the editors annotations discussion of the illustrations textual notes and a taxonomic table of the flowers mentioned

Romantic Ecocriticism Dewey W. Hall, 2016-03-15 *Romantic Ecocriticism Origins and Legacies* is unique due to its rare assemblage of essays which has not appeared within an edited collection before *Romantic Ecocriticism* is distinct because the essays in the collection develop transnational and transhistorical approaches to the proto ecological early environmental aspects in British and American Romanticism First the edition's transnational approach is evident through transatlantic connections such as but are not limited to comparisons among the following writers William Wordsworth William Howitt and Henry D Thoreau John Clare and Aldo Leopold Charles Darwin and Ralph W Emerson Second the transhistorical approach of *Romantic Ecocriticism* is evident in connections among the following writers William Wordsworth and Emily Bronte Thomas

Malthus and George Gordon Byron James Hutton and Percy Shelley Erasmus Darwin and Charlotte Smith Gilbert White and Dorothy Wordsworth among others Thus Romantic Ecocriticism offers a dynamic collection of essays dedicated to links between scientists and literary figures interested in natural history *Handbook of British Romanticism* Ralf Haekel, 2017-09-11 The Handbook of British Romanticism is a state of the art investigation of Romantic literature and theory a field that probably changed more quickly and more fundamentally than any other traditional era in literary studies Since the early 1980s Romantic studies has widened its scope significantly The canon has been expanded hitherto ignored genres have been investigated and new topics of research explored After these profound changes intensified by the general crisis of literary theory since the turn of the millennium traditional concepts such as subjectivity imagination and the creative genius have lost their status as paradigms defining Romanticism The handbook will feature discussions of key concepts such as history class gender science and the use of media as well as a thorough account of the most central literary genres around the turn of the 19th century The focus of the book however will lie on a discussion of key literary texts in the light of the most recent theoretical developments Thus the Handbook of British Romanticism will provide students with an introduction to Romantic literature in general and literary scholars with a discussion of innovative and groundbreaking theoretical developments **British Women and the Intellectual World in the Long Eighteenth Century** Dr Teresa Barnard, 2015-07-28 Highlighting the remarkable women who found ways around the constraints placed on their intellectual growth this collection shows that long eighteenth century writers usurped subjects perceived as masculine to contribute to scientific political philosophical and theological debate and progress This multifaceted volume goes beyond traditional readings of women's creativity to add fresh at times controversial insights into the female view of the intellectual world **Sweet Science** Amanda Jo Goldstein, 2017-07-10 Introduction sweet science Blake's mundane egg epigenesis and milieux Equivocal life Goethe's journals on morphology Tender semiosis reading Goethe with Lucretius and Paul de Man Growing old together Lucretian materialism in Shelley's The triumph of life A natural history of violence allegory and atomism in Shelley's The mask of anarchy Coda old materialism or romantic Marx [English Literature in Context](#) Paul Poplawski, 2017-05-18 From Anglo Saxon runes to postcolonial rap this undergraduate textbook covers the social and historical contexts of the whole of the English literature **The Romanticism Handbook** Sue Chaplin, Joel Faflak, 2011-03-10 A one stop resource containing introductory material through to practical case studies in reading primary and secondary texts to introducing criticism and new directions in research
