**Romanticism and Language** Arden Reed, 1984-01-01

**British Romanticism and the Archive** David Kerler, 2022-06-06 Taking its cue from Jacques Derrida's concept of *le mal d'archive* this study explores the interrelations between the experience of loss melancholia archives and their self-destructive tendencies surfacing in different forms of spectrality in selected poetry of British Romanticism It argues that the British Romantics were highly influenced by the period's archival fever manifesting itself in various historical material technological and cultural aspects and implicitly reflected and engaged with these discourses and materialities medialities in their works This is scrutinized by focusing on two basal closely related facets the subject's feverish desire to archive and the archive's self-destructive tendencies which may also surface in an ambivalent melancholic relishing in the archived object's presence within its absence Through this new theoretical perspective details and coherence previously gone unnoticed shall be laid bare ultimately contributing to a new and more profound understanding of British Romanticism's It will be shown that the various discursive and material manifestations of archives and archival practices not only echo the period's technological cultural and historical developments along with its incisive experiencing of loss but also fundamentally determine Romantic subjectivity and aesthetics

**Prophecies of Language** Kristina Mendicino, 2016-12-01 The scenes of Babel and Pentecost the original confusion of tongues and their redemption through translation haunt German Romanticism and Idealism This book begins by retracing the ways in which the task of translation so crucial to Romantic writing is repeatedly tied to prophecy not in the sense of telling future events but in the sense of speaking in the place of another most often unbeknownst to the speaker herself In prophetic speech the confusion of tongues repeats each time anew as language takes place unpredictably in more than one voice and more than one tongue at once Mendicino argues that the relation between translation and prophecy drawn by German Romantic writers fundamentally changes the way we must approach this so-called Age of Translation Whereas major studies of the period have taken as their point of departure the opposition of the familiar and the foreign Mendicino suggests that Romantic writing provokes the questions how could one read a language that is not one And what would such a polyvocal polyglot language have to say about philology both for the Romantics whose translation projects are most intimately related to their philological preoccupations and for us In *Prophecies of Language* these questions are pursued through readings of major texts by G W F Hegel Wilhelm von Humboldt Friedrich Schlegel and

Friedrich Hlderlin These readings show how when one questions the presupposition of works composed by individual authors in one tongue these texts disclose more than a monoglot reading yields namely the plus of their linguistic plurality From such a surplus each chapter goes on to advocate for a philology that in and through an inclination toward language takes neither its unity nor its structure for granted but allows itself to be most profoundly affected addressed and afflicted by it

The Literary Sign Language of German Romanticism Marianne Thalmann,1972

**The Politics of Language in Romantic Literature** Richard Marggraf Turley,2002-12-11 This innovative study examines a range of canonical and non canonical materials to open a new narrative on the mutually illuminating interchange between Romantic literature and philological theory in the late eighteenth and early nineteenth centuries Arguing that philology can no longer be treated as something that did not happen to Romantic authors this book undertakes a substantial revision of our understanding of the intellectual and political contexts that helped determine the Romantic consciousness

Romanticism and Ideology David Aers,Jonathan Cook,David Punter,2016-03-31 First published in 1981 The primary purpose of this book is to serve as an introduction to writing in the late eighteenth and early nineteenth centuries In addition to major Romantic poets Blake Wordsworth Coleridge and Shelly the authors discuss writers such as Austen Hazlitt and Burke who are usually studied in a different context and genres such as fiction and political writing which are often cut off from the central body of poetry An original and highly stimulated study this book will appeal to all those who are dissatisfied with the conventional categories into which writers and literary movements are usually placed

Nationalism and Territory George W. White,2000 Why do nations come into conflict What factors lead to the horrors of ethnic cleansing This timely book offers clear eyed answers to these questions by exploring how national identity is shaped by place focusing especially on Serbia Hungary and Romania Moving beyond studies of nationalism that consider only the economic and geostrategic value of territory George W White shows that the very core of national identity is intimately bound to specific places Indeed nations define themselves in terms of spaces that have historical linguistic and religious meaning as Serbs have clearly demonstrated in Kosovo These territories are concrete expressions of a nationAIs identity both past and present With his detailed analysis

of the places that define national identity in Southeastern Europe White convincingly shows why territorial disputes so often escalate into war

*Communicating without Language and Grammar* Victor H. Yngve, Patricia C. Sutcliffe, Bernard Sypniewski, Lara Burazer, 2025-05-06 The book introduces a new hard science which originated in an effort to solve the fundamental problems of linguistic theory linguistics which was far from being scientific wanted to become a science This new approach to analysing how people communicate provides properly scientific theory in a number of areas formerly thought to be outside the reach of a proper science It unifies the hard sciences and the soft sciences and the humanities as analysable in just one new science The book focuses on people not language grammar or any other such soft concept It provides reasons why we must move our studies out of philosophy and into standard science It shows how abstractions as known in older linguistics are flawed as science The book provides a definitive historical perspective on the problems facing linguistics There is a good discussion of prediction in scientific theory

*British Romanticism and the Science of the Mind* Alan Richardson, 2001-07-26 In this provocative and original study Alan Richardson examines an entire range of intellectual cultural and ideological points of contact between British Romantic literary writing and the pioneering brain science of the time Richardson breaks new ground in two fields revealing a significant and undervalued facet of British Romanticism while demonstrating the Romantic character of early neuroscience Crucial notions like the active mind organicism the unconscious the fragmented subject instinct and intuition arising simultaneously within the literature and psychology of the era take on unsuspected valences that transform conventional accounts of Romantic cultural history Neglected issues like the corporeality of mind the role of non linguistic communication and the peculiarly Romantic understanding of cultural universals are reopened in discussions that bring new light to bear on long standing critical puzzles from Coleridge's suppression of Kubla Khan to Wordsworth's perplexing theory of poetic language to Austen's interest in head injury
