Culture and the State in Spain Thomas Lewis, Francisco J. Sanchez, 2017-09-29 This volume addresses the role of literature in the formation of cultural notions of state nation subject and citizen in Spain from the Renaissance to the Romantic period It brings together literary scholars and historians of the Golden Age and the eighteenth and nineteenth centuries in a dialog framed by the rise and dissolution of the Absolutist state Individual essays attempt to understand relationships between subjectivity and the state in Spain from the earliest articulations of the subject to the consolidation of an array of bourgeois subjectivities The major argument running throughout the volume is that literary discourse from the time it emerges in the sixteenth century to the time it coheres within a wholly modern concept of the aesthetic actively develops forms of subjectivity in relation to institutions of class power The intention of the volume is to clarify central problems regarding the emergence and function of literature across distinct modes of production state formations and hegemonic cultures This book keeps open a debate on the long process through which literature and the aesthetic come to be constituted as a complex arena in which sometimes directly more often indirectly the struggle for state power unfolds *Cosmopolitan Italy in the Age of Nations* Edoardo Tortarolo, 2022-12-30 Modern Italian historiography has undergone a substantial revision in the last quarter of a century From an almost exclusive focus on the process of nation building the attention of historians has shifted The most innovative research is now devoted to assessing to what extent the cosmopolitan attitude that was evident in the late eighteenth century morphed but did not disappear in the ensuing two centuries The essays in this volume make the case

that the age of nations had a profound impact on Italian history and contributed to the creation of an Italian identity within the framework of well functioning imperial and global networks They also acknowledge that the process of national individualization carried with it a variety of aspects that reconnected Italian history to the foreign cultures that were undergoing constant self fashioning Cosmopolitan Italy in the Age of Nations Transnational Visions from the Eighteenth to the Twentieth Century will be of interest to scholars throughout the world and intellectual and transnational historians

Hitler and Spain Robert H. Whealey, 2021-05-11 An imperative starting point of any future inquiry concerning Nazi Germany's incursion into and manipulation of Spain's civil strife International History Review The Spanish Civil War begun in July 1936 was a preliminary round of World War II Hitler's and Mussolini's cooperation with General Franco resulted in the Axis agreement of October 1936 and the subsequent Pact of Steel of May 1939 immediately following the end of the Civil War This study presents comprehensive documentation of Hitler's use of the upheaval in Spain to strengthen the Third Reich diplomatically ideologically economically and militarily While the last great cause drew all eyes to Western Europe and divided the British and especially the French internally Hitler could pursue territorial gains in Eastern Europe This book based on little known German records and recently opened Spanish archives fills a major gap in our understanding of one of the twentieth century's most significant conflicts Its comprehensive treatment of German Spanish relations from 1936 through 1939 bringing together diplomatic economic military and naval aspects will be of great value to specialists in European diplomacy and the political economy of Nazi imperialism as well as to all students of the Spanish Civil War A major contribution to understanding not only the Spanish conflict but also the history of the thirties and in particular the failure of Britain France and the Soviet Union to make common cause against fascist powers History Workshop Journal
