Representation Theories and Algebraic Geometry A. Broer, 2013-03-09 The 12 lectures presented in Representation Theories and Algebraic Geometry focus on the very rich and powerful interplay between algebraic geometry and the representation theories of various modern mathematical structures such as reductive groups quantum groups Hecke algebras restricted Lie algebras and their companions This interplay has been extensively exploited during recent years resulting in great progress in these representation theories Conversely a great stimulus has been given to the development of such geometric theories as D modules perverse sheafs and equivariant intersection cohomology. The range of topics covered is wide from equivariant Chow groups decomposition classes and Schubert varieties multiplicity free actions convolution algebras standard monomial theory and canonical bases to annihilators of quantum Verma modules modular representation theory of Lie algebras and combinatorics of representation categories of Harish Chandra modules Hand-atlas of Human Anatomy Werner Spalteholz, 1923 Software Engineering and Formal Methods Gilles Barthe, Alberto Pardo, Gerardo Schneider, 2011-10-21 This book constitutes the refereed proceedings of the 9th International Conference on Software Engineering and Formal Methods SEFM 2011 held in Montevideo Uruguay in November 2011 The 22 revised regular papers presented together with 1 short paper 2 tool papers and 4 keynote talks were carefully reviewed and selected from 105 initial abstracts and 85 full submissions Besides the regular session the conference held a special track devoted to Modeling for Sustainable Development with 5 accepted papers selected from 7 submissions that are also part of this volume The aim of SEFM is to advance the state of the art in formal methods to scale up their application in software industry and to encourage their integration with practical engineering methods OCP: Oracle Certified Professional Java SE 8 Programmer II Study Guide Jeanne Boyarsky, Scott Selikoff, 2015-12-04 Complete trusted preparation for the Java Programmer II exam OCP Oracle Certified Professional Java SE 8 Programmer II Study Guide is your comprehensive companion for preparing for Exam 1Z0 809 as well as upgrade Exam 1Z0 810 and Exam 1Z0 813 With full coverage of 100% of exam objectives this invaluable guide reinforces what you know teaches you what you don't know and gives you the hands on practice you need to boost your skills Written by expert Java developers this book goes beyond mere exam prep with the insight explanations and perspectives that come from years of experience You ll review the basics of object oriented programming understand functional programming apply your knowledge to database work and much more From the basic to the advanced this guide walks you through everything you need to know to confidently take the OCP 1Z0 809 Exam and upgrade exams 1Z0 810 and 1Z0 813 Java 8 represents the biggest changes to the language to date and the latest exam now requires that you

Baluska, Milada Ciamporová, Otília Gasparíková, Peter W. Barlow, 2013-11-11 In 1971 the late Dr J Kolek of the Institute of Botany Bratislava organized the first International Symposium devoted exclusively to plant roots At that time perhaps only a few of the participants gathered together in Tatranska Lomnica sensed that a new era of root meetings was beginning Nevertheless it is now clear that Dr Kolek's action undertaken with his characteristic enormous enthusiasm was rather pioneering for it started a series a similar meetings Moreover what was rather exceptional at the time was the fact that the meeting was devoted to the functioning of just a single organ the root One possible reason for the unexpected success of the original perhaps naive idea of a Root Symposium might lie with the fact that plant roots have always been extremely popular as experimental material for cytologists biochemists and physiologists whishing to probe processes as diverse as cell division and solute transport Of course the connection of roots with the rest of the plant is not forgotten either This wide variety of disciplines is now coupled with the development of increasingly sophisticated experimental techniques to study some of these old problems These factors undoubtedly contribute to the necessity of continuing the tradition of the root symposia. The common theme of root function gives in addition a certain unity to all these diverse activities American Journal of Physiology, 1915 Vols for 1898 1941 1948 56 include the Society's proceedings primarily abstracts of papers presented at the 10th 53rd annual meetings and the 1948 56 fall meetings Mathematics of Program Construction Jan L.A. van de Snepscheut, 1989-06-07 The papers included in this volume were presented at the Conference on Mathematics of Program Construction held from June 26 to 30 1989 The conference was organized by the Department of Computing Science Groningen University The Netherlands at the occasion of the University's 375th anniversary The creative inspiration of the modern computer has led to the development of new mathematics the mathematics of program construction Initially concerned with the posterior verification of computer programs the mathematics have now matured to the point where they are actively being used for the discovery of elegant solutions to new programming problems Initially concerned specifically with imperative programming the application of mathematical methodologies is now established as an essential part of all programming paradigms functional logic and object oriented programming modularity and type structure etc Initially concerned with software only the mathematics are also finding fruit in hardware design so that the traditional boundaries between the two disciplines have become blurred The varieties of mathematics of program construction are wide ranging They include calculi for the specification of sequential and concurrent programs program transformation and analysis methodologies and formal

inference systems for the construction and analysis of programs The mathematics of specification implementation and analysis have become indispensable tools for practical programming Multiple Dwelling and Tourism Norman McIntyre, Daniel Williams, Kevin McHugh, 2006 The movement of people goods capital and information is a central aspect of living in the inter connected globalised late modern world Although this broader view of mobility is recognized this book focuses mainly on migration or the movement of people It examines multiple dwelling as a societal response to the major influences of increased mobility and amenity tourism The book also considers the modern day meaning of multiple dwelling how it affects personal identity and the meaning of home and its impacts on host communities and landscapes American Polytechnic Journal, 1853 Therapeutic Gazette .1911 ECOOP 2004 - Object-Oriented Programming Martin Odersky, 2004-06-08 This book constitutes the refereed proceedings of the 18th European Conference on Object Oriented Programming ECOOP 2004 held in Oslo Norway in June 2004 The 25 revised full papers presented together with the abstracts of 2 invited talks were carefully reviewed and selected from a total of 132 submissions.
