Thoughts on redesigning tribal education D. C. Nanjunda, 2008 India is a multi racial country Different parts have different cultural traits and levels of development It is not uncommon to find that there are certain tribes which are not yet touched even by the fringe of civilization Aboriginal are examples of this The word tribe is taken to denote a primary aggregate of people lining under primitive or barbarous condition under a headman or chief Tribes is a group of families living as a community under one or more chiefs united by language and customs The main and vital objective of this volume is to make in the book a few selected articles that represent some kind of contributions to the knowledge of tribal education While writing the articles I have tried completely to emphasis on concept principles and applied aspects of tribal education

This volume will be highly useful to faculty members researchers policy makers local self govt and NGOs working on tribal development and to the general public *A Bibliography of Anthropology-related Serial Publications in the University of Nebraska Libraries* Kenneth P. Lohrentz,Ann Larson,Linda Mager,1978 Contemporary Studies in Anthropology D. C. Nanjunda,2010-01-01 With reference to Karnataka India **Glimpses into My Own Black Box** George W. Stocking, Jr.,2010-11-18 George W Stocking Jr has spent a professional lifetime exploring the history of anthropology and his findings have shaped anthropologists understanding of their field for two generations Through his meticulous research Stocking has shown how such forces as politics race institutional affiliations and personal relationships have influenced the discipline from its beginnings In this autobiography he turns his attention to a subject closer to home but no less challenging Looking into his own black box he dissects his upbringing his politics even his motivations in writing about himself The result is a book systematically at times brutally self questioning An interesting question Stocking says is one that arouses just the right amount of anxiety But that very anxiety may be the ultimate source of Stocking s remarkable intellectual energy and output In the first two sections of the book he traces the intersecting vectors of his professional and personal lives The book concludes with a coda Octogenarian Afterthoughts that offers glimpses of his life after retirement when advancing age cancer and depression changed the tenor of his reflections about both his life and his work This book is the twelfth and final volume of the influential History of Anthropology series
