News vs Media Studies Julian McDougall, 2019-12-01 This book explores the place of Media Studies in the age of fake news analysing the calls for a curriculum of critical news literacy as part of a cyclical policy debate With the need for young people in democracies to understand mainstream news agendas and take a critical perspective on social media news including so called fake news this book argues for Media Studies as a mandatory subject However fake news is not presented in the book as a stable neutral term with a clear definition but is instead defined as an idea that risks obscuring the key critical and political premise of Media Studies All media representation requires critical deconstruction therefore any distinction between real and fake media is a false binary The author draws together two narrative strands one analysing contemporary news and journalism featuring interviews with journalists and news commentators and the other re appraising the discipline of Media

Studies itself This bold and innovative book will appeal to all those interested in the nebulous and often confusing media landscape as well as students and practitioners of Media Studies **Film, Politics, & Education** Kelvin Shawn Sealey, 2008 Introducing the concept of cinematic education defined as pedagogy infused by the moving image this volume explores the historical theoretical and practical basis for using film in kindergarten through post secondary classrooms Its scholarly inquiry into the meaning film can bring to teaching and learning extends a vast literature on film theory At the same time it broadens the scope of cultural studies in education to include a more thorough consideration of the day to day political dimensions of the cinematic in K 12 public and private classrooms **Media Capitalism** Thomas Klikauer, 2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media s ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book s historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society A Future for Public Service Television Des Freedman, Vana Goblott, 2018-05-04 A guide to the nature purpose and place of public service television within a multi platform multichannel ecology Television is on the verge of both decline and rebirth Vast technological change has brought about financial uncertainty as well as new creative possibilities for producers distributors and viewers This volume from Goldsmiths Press examines not only the unexpected resilience of TV as cultural pastime and aesthetic practice but also the prospects for public service television in a digital multichannel ecology The proliferation of platforms from Amazon and Netflix to YouTube and the vlogosphere means intense competition for audiences traditionally dominated by legacy broadcasters Public service broadcasters whether the BBC the German ARD or the Canadian Broadcasting Corporation are particularly vulnerable to this volatility Born in the more stable political and cultural conditions of the twentieth century they face a range of pressures on their revenue their remits and indeed their very futures This book reflects on the issues raised in Lord Puttnam s 2016 Public Service TV Inquiry Report with contributions from leading broadcasters academics and regulators With resonance for students professionals and consumers with a stake in British media it serves both as historical record and as a look at the future of television in an on demand age Contributors include Tess Alps Patrick Barwise James Bennett Georgie Born Natasha Cox Gunn Enli Des Freedman Vana Goblott David Hendy Jennifer Holt Amanda D Lotz Sarita Malik Matthew Powers Lord Puttnam Trine Syvertsen Jon Thoday Mark Thompson **Mediascape and The State** Shekh Moinuddin, 2017-02-04 This book investigates image politics during elections and how the political discourse is reflected

during the Uttar Pradesh assembly elections in 2012 by the media and the state. It reveals new dimensions of media geography in India and makes image construction and interpretation easy to comprehend. This interdisciplinary approach is located at the interface of geography with social, political, cultural and media sciences. The book draws a geographical interpretation of politics to reveal the role of both media and the state to shape the political discourse with special focus on the privileged position of the heartland Uttar Pradesh in Indian politics. It studies the mediascape by highlighting application of media in both public and private spheres and discussing the importance of both old and new media e.g. print, radio, TV, social media. Several crucial aspects are discussed and answered: How do media and politicians construct politics around the issue of minorities? How do media communalize issues during the election campaign? How can local issues gain national importance and shape national politics? This book appeals to scientists but also to graduates and postgraduates that want to understand the way image politics are performed.

The Uses of Sport John Hughson, David Inglis, Marcus Free, 2005. The Uses of Sport provides an essential resource for the study of sport within culture and popular culture.

Intellectuals and Cultural Policy Jeremy Ahearne, Oliver Bennett, 2007-06-14. Intellectuals and policy analysts might appear to inhabit two different worlds. Intellectuals aspire to articulate issues of universal concern; policy analysts attend to the detail of specific measures and programmes. How far do these common assumptions match up to reality? What happens when intellectuals engage with cultural institutions and the media?

Richard Hoggart and Cultural Studies S. Owen, 2008-10-14. In this new collection of essays a range of established and emerging cultural critics re-evaluate Richard Hoggart's contribution to the history of ideas and to the discipline of Cultural Studies. They examine Hoggart's legacy, identifying his widespread influence, tracing continuities and complexities and affirming his importance.

News as Entertainment Daya Kishan Thussu, 2008-01-09. Thussu brings to this project the passion for news of a socially committed former journalist, the political economy of his international relations education and a formidable assembly of global detail, examining the recent explosion of infotainment. John Downing, Southern Illinois University. Thussu's account of war as infotainment, the Bollywoodization of news and the emergence of a global infotainment sphere is as compelling as it is alarming. This is a significant and essential book for anyone interested in exploring the connections between news, journalism, informed citizenship and democracy.

Bob Franklin, The Cardiff School of Journalism, Media and Cultural Studies. Richly detailed and empirically grounded, this first book-length study of infotainment and its globalization by a leading scholar of global communication offers a comprehensive and critical analysis of this emerging phenomenon. Going beyond both geographically and theoretically, the book challenges the discourse largely confined to the Anglo-American media; the book argues that infotainment may have an important ideological role, a diversion in which soft news masks the hard realities of neo-liberal imperialism. Chapters include a historical appraisal of infotainment, the infrastructure for its globalization as well as coverage of recent wars on television, news as high-tech infotainment and the growing synergies between Hollywood and Bollywood-originated infotainment. A global infotainment

sphere is emerging the book argues within which competing versions of news from 24 7 news networks to bloggers coexist Accessible engagingly written and robustly argued the book combines analyses of theoretical debates on infotainment with extensive and up to date comparative data The SAGE Guide to Key Issues in Mass Media Ethics and Law William A.
