Federal Energy Regulatory Commission, 2007 The Market Administrator's Bulletin, 2005 *Why on Earth?* Signe Ecklund Schaefer, 2013-12-01 Life today poses many questions both in our personal lives and in our participation in nature and the broader culture We often focus on the outer needs for social political technological or environmental change However can we really meet the challenges around us without also attending to our inner life and to our own evolving biography as it reflects and informs the outer world This book starts from the premise that each of our lives expresses uniqueness of spiritual intention within the unfolding of universal rhythms and possibilities Can we wake up to the developmental opportunities offered to us through different life phases Are we able to step out of the narrowness of the dualistic nature nurture argument and experience that we are both more than our genetic composition and more than a product of the social and educational influences that have shaped us Can we come to appreciate the learning that our I has received through heredity ethnicity schooling and gender without losing a sense of our true individuality Waking up to our unique self as it grows through interaction with the world and other human beings helps us recognize the significance we all play in one another's biographies and in the unfolding of our larger human story Why on Earth invites us to explore our own meaningful life journey to bring conscious attention to how we go our path so that we may more freely perceive our possibilities and our responsibilities along the way of our personal and shared becoming
