**Massey and Archie** Kenneth B. Farnsworth, Ann L. Koski, 1985      Ohio Hopewell Community Organization William S. Dancey, 2002-10 Contains papers from an April 1992 symposium plus other papers evaluating Olaf Prufer's thesis of the 1960s stating that the Native builders of the earthen mounds of southern Ohio lived in small scattered hamlets Topics include problems and solutions in the study of dispersed communities determining sedentism in the archaeological record habitation at earthworks and evidence and case studies from various sites Includes bandw maps Of interest to professional and amateur archaeologists Annotation copyrighted by Book News Inc Portland OR      **Reclaiming the Hopewellian Ceremonial**

**Sphere** A. Martin Byers, 2015-11-24 Multiple Hopewellian monumental earthwork sites displaying timber features mortuary deposits and unique artifacts are found widely distributed across the North American Eastern Woodlands from the lower Mississippi Valley north to the Great Lakes These sites dating from 200 b c to a d 500 almost define the Middle Woodland period of the Eastern Woodlands Joseph Caldwell treated these sites as defining what he termed the Hopewell Interaction Sphere which he conceptualized as mediating a set of interacting mortuary funerary cults linking many different local ethnic communities In this new book A Martin Byers refines Caldwell's work coining the term Hopewell Ceremonial Sphere to more precisely characterize this transregional sphere as manifesting multiple autonomous cult sodalities of local communities affiliated into escalating levels of autonomous cult sodality heterarchies It is these cult sodality heterarchies regionally and transregionally interacting and not their autonomous communities to which the sodalities also belonged that were responsible for the Hopewellian assemblage and the heterarchies took themselves to be performing not funerary but world renewal ritual ceremonialism mediated by the deceased of their many autonomous Middle Woodland communities Paired with the cult sodality heterarchy model Byers proposes and develops the complementary heterarchical community model This model postulates a type of community that made the formation of the cult sodality heterarchy possible But Byers insists it was the sodality heterarchies and not the complementary heterarchical communities that generated the Hopewellian ceremonial sphere Detailed interpretations and explanations of Hopewellian sites and their contents in Ohio Illinois Indiana and Georgia empirically anchor his claims A singular work of unprecedented scope Reclaiming the Hopewellian Ceremonial Sphere will encourage archaeologists to re examine their interpretations      Between Hopewell and Mississippian William Green, 1987      The Prehistory of Missouri Michael John O'Brien, W. Raymond Wood, 1998 The Prehistory of Missouri is a

fascinating examination of the objects that were made used and discarded or lost by Missouri's prehistoric inhabitants over a period of more than eleven thousand years Missouri's numerous vegetation zones and its diverse topography encompassed extreme variations forcing prehistoric populations to seek a wide range of adaptations to the natural environment As a result Missouri's archaeological record is highly complex and it has not been fully understood despite the vast amount of fieldwork that has been conducted within the state's borders In this groundbreaking account Michael J O'Brien and W Raymond Wood

explore the array of artifacts that have been found in Missouri pinpointing minute variations in form They have documented the ranges in age and distribution of the individual forms explaining why certain forms persisted while others quickly disappeared Organized by chronological periods such as Archaic Woodland and Mississippian the book provides a comprehensive survey of what is currently known about Missouri s prehistoric peoples often revealing how they made their living in an ever changing world The authors have applied rigorous standards of archaeological inquiry Their main objective demonstrating that the archaeological record of Missouri can be explained in scientific terms is accomplished With more than 235 line drawings and photographs including 23 color photos *The Prehistory of Missouri* will appeal to anyone interested in archaeology particularly in the artifacts and the dates of their manufacture as well as those interested in the dichotomy between interpretation and explanation Intended for the amateur as well as the professional archaeologist this book is sure to be the new standard reference on Missouri s prehistory fulfilling current needs that extend beyond those met by Carl Chapman s earlier classic *The Archaeology of Missouri* *The Holdener Site* Warren L. Wittry, 1994 This report details the restricted usage localized resource utilization and brief occupation of this site during the seventh through eleventh centuries A D *People and Plants in Ancient Eastern North America* Paul E. Minnis, 2010-01-15 The environmental diversity of North America is astounding from the circumpolar tundra with few plants more than a few centimeters tall to the lush semitropical forests of the southeastern United States and Caribbean Basin No less remarkable is the record of plants usage by the various indigenous people who have been living there for more than twelve millennia For the vast majority of this time their livelihood food shelter fuel and medicine depended on their knowledge and use of the environment The most comprehensive overview in more than half a century about the interconnectedness of prehistoric Native Americans and their botanical world this book and its forthcoming companion volume *People and Plants in Ancient Western North America* present the latest information on three major topics the use of native plants the history of crops and their uses and how humans affected their environment In this volume expert scholars summarize the prehistoric ethnobotany of four regions the Eastern Woodlands W Cowan K Gremillion M Scarry B Smith and G Wagner Northeast G Crawford and D Smith Plains M Adair and Caribbean L Newsom and D Pearsall This volume contributes significantly to our understanding of the lives of prehistoric people as well as the forces that influenced their communities their ingenuity and their ecological impact It also serves as a guide for designing environmentally sustainable lives today *Applying Evolutionary Archaeology* Michael J. O'Brien, R. Lee Lyman, 2007-05-08 Anthropology and by extension archaeology has had a long standing interest in evolution in one or several of its various guises Pick up any lengthy treatise on humankind written in the last quarter of the nineteenth century and the chances are good that the word evolution will appear somewhere in the text If for some reason the word itself is absent the odds are excellent that at least the concept of change over time will have a central role in the discussion After one of the preeminent and often vilified social scientists of the nineteenth century Herbert Spencer

popularized the term in the 1850s evolution became more or less a household word usually being used synonymously with change albeit change over extended periods of time Later through the writings of Edward Burnett Tylor Lewis Henry Morgan and others the notion of evolution as it applies to stages of social and political development assumed a prominent position in anthropological discussions To those with only a passing knowledge of American anthropology it often appears that evolutionism in the early twentieth century went into a decline at the hands of Franz Boas and those of similar outlook often termed particularists However it was not evolutionism that was under attack but rather comparativism an approach that used the ethnographic present as a key to understanding how and why past peoples lived the way they did Boas 1896 **New**
