[Chasing Archipelagic Dreams](#) David R. Saunders,2024-12-15 In Chasing Archipelagic Dreams David R Saunders demonstrates that the withdrawal of the British imperial state from Sabah did not result in the decolonization of the territory From the late 1940s to the 1960s international anti colonialism interacted with regional competition over Sabah to result in a paradoxical increase of British power and influence on the ground Meanwhile ethnic social and political heterogeneity in Sabah contributed to fragmentation and disunity undermining the development of a local anti colonial movement Instead a class of influential local elites seized power as competing attempts by the Philippines Indonesia and Malaya to incorporate the territory into their respective archipelagic spheres grew in strength Due to these local and international rivalries Saunders argues Sabah s eventual merger with the Federation of Malaysia in 1963 prompted an extension of colonial style rule resource extraction the suppression of local autonomy and the imposition of an externally configured national identity Chasing Archipelagic Dreams underscores the significance of regional rivalries in the South China Sea and highlights the fate of subaltern communities bisected by post colonial borders

The Empire Review and Journal of British Trade, 1919 **The Herald of Peace and International Arbitration**, 1904 Global Borderlands Victoria Reyes, 2019-09-03 The U S military continues to be an overt presence in the Philippines and a reminder of the country's colonial past Using Subic Bay a former U S military base now a Freeport Zone as a case study Victoria Reyes argues that its defining feature is its ability to elicit multiple meanings For some it is a symbol of imperialism and inequality while for others it projects utopian visions of wealth and status Drawing on archival and ethnographic data Reyes describes the everyday experiences of people living and working in Subic Bay and makes a case for critically examining similar spaces across the world These foreign controlled semi autonomous zones of international exchange are what she calls global borderlands While they can take many forms ranging from overseas military bases to tourist resorts they all have key features in common This new unit of globalization provides a window into broader economic and political relations the consequences of legal ambiguity and the continuously reimagined identities of the people living there Rejecting colonialism as merely a historical backdrop Reyes demonstrates how it is omnipresent in our modern world

Suburban Empire Lauren Hirshberg, 2022-03-15 *Suburban Empire* takes readers to the US missile base at Kwajalein Atoll in the Marshall Islands at the matrix of postwar US imperial expansion the Cold War nuclear arms race and the tide of anti colonial struggles rippling across the world Hirshberg shows that the displacement of indigenous Marshallese within Kwajalein Atoll mirrors the segregation and spatial politics of the mainland US as local and global iterations of US empire took hold Tracing how Marshall Islanders navigated US military control over their lands *Suburban Empire* reveals that Cold War era suburbanization was perfectly congruent with US colonization military testing and nuclear fallout The structures of suburban segregation cloaked the destructive history of control and militarism under a veil of small town

innocence *Canada and the Age of Conflict* C.P. Stacey, 1981-12-15 Few historians are as qualified as C P Stacey to address the questions underlying Canada and the Age of Conflict This volume completes his authoritative and magisterial general history of Canada's relations with the outside world The basic theme of the work is that foreign policy like charity begins at home To this end Professor Stacey emphasizes how changing social economic and political conditions within Canada have dictated her reactions to external problems Volume II begins with the diplomatic revolution of 1921 the election of Mackenzie King as Prime Minister and the appearance of O D Skelton proceeds to cover the twenties the Bennett interlude King's return to office and World War II and concludes with the ending of the King era and the aftermath of the war Drawing extensively on new material from archival records and personal papers recently opened to researchers Stacey strongly portrays the individual makers of Canadian policy and the statesmen abroad with whom they interacted The overmastering influence of the office of the Prime Minister and of the men who held that position is an underlying theme This volume concerns itself particularly with the personality and policies of the man who dominated the political history of the period William Lyon Mackenzie King Elegantly written witty and comprehensive the volume represents a distinctive achievement by one of Canada's pre eminent historians [A Reference Guide to Latin America and the Caribbean](#) University Microfilms International, 1988 **Commissions High** Roy MacLaren, 2006-07-27 *Commissions High* is an account of the work of the Canadian High Commission from 1870 until Britain's entry into the European Common Market one hundred years later Roy MacLaren argues that until the defeat of Diefenbaker in 1963 there was tension between the forces of imperial later Commonwealth solidarity and those of localized nationalism *Commissions High* explores how localized nationalism led Canadian politicians to resist British efforts to centralize imperial decision making and shows how the weakening of Commonwealth and transatlantic bonds following World War II contributed to Britain's focus on Europe and to the increasing domination of Canada by the United States **The History of Foreign Investment in the United States to 1914** Mira Wilkins, 1989 From the colonial era to 1914 America was a debtor nation in international accounts owing more to foreigners than foreigners owed to us By 1914 it was the world's largest debtor nation Mira Wilkins provides the first complete history of foreign investment in the United States during that period The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation's development covering both portfolio and direct investment The immense new wave of foreign investment in the United States today and our return to the status of a debtor nation once again the world's largest debtor nation makes this strong exposition far more than just historically interesting Wilkins reviews foreign portfolio investments in government securities federal state and local and in corporate stocks and bonds as well as foreign direct investments in land and real estate manufacturing plants and even such service sector activities as accounting insurance banking and mortgage lending She finds that between 1776 and 1875 public sector securities principally federal and state securities drew in the most long term foreign investment whereas from 1875 to 1914

the private sector was the main attraction The construction of the American railroad system called on vast portfolio investments from abroad there was also sizable direct investment in mining cattle ranching the oil industry the chemical industry flour production and breweries as well as the production of rayon thread and even submarines In addition there were foreign stakes in making automobile and electrical and nonelectrical machinery America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts

The History of the University of Oxford: Volume VII: Nineteenth-Century Oxford, Part 2 M. G. Brock, M. C. Curthoys, 2000-11-16

Volume VII of The History of the University of Oxford completes the survey of nineteenth century Oxford begun in Volume VI After 1871 both teachers and students at Oxford were freed from tests of religious belief The volume describes the changed mental climate in which some dons sought a new basis for morality while many undergraduates found a compelling ideal in the ethic of public service both at home and in the empire As the existing colleges were revitalized and new ones founded the academic profession in Oxford developed a peculiarly local form centred upon college tutors who stood in somewhat uneasy relation with the University's professors The various disciplines which came to form the undergraduate curriculum in both the arts and sciences are subject to major reappraisal and Oxford's hidden curriculum is explored through accounts of student life and institutions including organized sport and the Oxford Union New light is shed on the social origins and previous schooling of undergraduates A fresh assessment is made of the movement to establish women's higher education in Oxford and the strategies adopted by its promoters to implant communities for women within the masculine culture of an ancient university Other widened horizons are traced in accounts of the University's engagement with imperial expansion social reform and the educational aspirations of the labour movement as well as the transformation of its press into a major international publisher The architectural developments considerable in quantity and highly varied in quality receive critical appraisal in a comprehensive survey of the whole period covered by Volumes VI and VII 1800-1914 By the early twentieth century the challenges of socialism and democracy together with the demand for national efficiency gave rise to a renewed campaign to address issues such as promoting research abolishing compulsory Greek and more generally broadening access to the University Under the terrible test of the First World War still more deep seated concerns were raised about the side effects of Oxford's educational practices and the volume concludes with some reflections on the directions which the University had taken over the previous fifty years

series blurb No private institutions have exerted so profound an influence on national life over the centuries as the universities of Oxford and Cambridge Few universities in the world have matched their intellectual distinction and none has evolved and maintained over so long a period a strictly comparable collegiate structure Now a completely new and full scale History of the University of Oxford from its obscure origins in the twelfth century until the late twentieth century has been produced by the university with the active support of its constituent colleges Drawing on extensive original research as well as on the centuries old tradition of the study of the rich source material the History is

altogether comprehensive appearing in eight chronologically arranged volumes Together the volumes constitute a coherent overall study yet each has a unity of its own under individual editorship and brings together the work of leading scholars in the history of every university discipline and of its social institutional economic and political development as well as its impact on national and international life The result is a history not only more authoritative than any previously produced for Oxford but more ambitious than any undertaken for any other European university and certain to endure for many generations to come
