Master Of The Moon:

THE FIRST MEN IN THE MOON H.G. Wells, 2017-04-23 Mr Bedford Meets Mr Cavor at Lympe As I sit down to write here amidst the shadows of vine leaves under the blue sky of southern Italy it comes to me with a certain quality of astonishment that my participation in these amazing adventures of Mr Cavor was after all the outcome of the purest accident It might have been any one I fell into these things at a time when I thought myself removed from the slightest possibility of disturbing experiences I had gone to Lympe because I had imagined it the most uneventful place in the world Here at any rate said I I shall find peace and a chance to work And this book is the sequel So utterly at variance is destiny with all the little plans of men I may perhaps mention here that very recently I had come an ugly cropper in certain business enterprises Sitting now surrounded by all the circumstances of wealth there is a luxury in admitting my extremity I can admit even that to a certain extent my disasters were conceivably of my own making It may be there are directions in which I have some capacity but the conduct of business operations is not among these But in those days I was young and my youth among other objectionable forms took that of a pride in my capacity for affairs I am young still in years but the things that have happened to me have rubbed something of the youth from my mind Whether they have brought any wisdom to light below it is a more doubtful matter **The Nyaishes** Maneckji Nusservanji Dhalla, 1908 The First Men On The Moon H. G.

G. Wells, 2025-04-28T18:16:24Z Mr Bedford an aspiring playwright moves to the British countryside in hope of writing a successful play that will cure his financial troubles There he becomes acquainted with Mr Cavor an eccentric and reclusive scientist who hopes to create an anti gravitational material After the two men accidentally create the material they decide to use it to land on the Moon Cavor motivated by expanding the realms of knowledge and Bedford by the prospective mining of lunar minerals There they meet an intelligent civilization of arthropoids whom they name the Selenites First serialized between November 1900 and June 1901 the novel was published in a single volume the same year By contrasting Selenite society with the society of Victorian England Wells criticizes Victorian mores and professes eugenic and socialist ideas This book is part of the Standard Ebooks

project which produces free public domain ebooks **The Latin Qur'an, 1143-1500** Cándida Ferrero Hernández, John Tolan, 2021-10-25 In 1143 Robert of Ketton produced the first Latin translation of the Qur'an. This translation extant in 24 manuscripts was one of the main ways in which Latin European readers had access to the Muslim holy book. Yet it was not the only means of transmission of Quranic stories and concepts to the Latin world: there were other medieval translations into Latin of the Qur'an and of Christian polemical texts composed in Arabic which transmitted elements of the Qur'an often in a polemical mode. The essays in this volume examine the range of medieval Latin transmission of the Qur'an and reaction to the Qur'an by concentrating on the manuscript traditions of medieval Qur'an translations and anti-Islamic polemics in Latin. We see how the Arabic text was transmitted and studied in Medieval Europe. We examine the strategies of translators who struggled to find a proper vocabulary and syntax to render Quranic terms into Latin at times showing miscomprehensions of the text or willful distortions for polemical purposes. These translations and interpretations by Latin authors working primarily in twelfth and thirteenth century Spain were the main sources of information about Islam for European scholars until well into the sixteenth century when they were printed, reused and commented. This volume presents a key assessment of a crucial chapter in European understandings of Islam.

Science-fiction Everett Franklin Bleiler, Richard Bleiler, 1998 Complementing *Science Fiction: The Early Years* which surveys science fiction published in book form from its beginnings through 1930, the present volume covers all the science fiction printed in the genre magazines *Amazing*, *Astounding* and *Wonder* along with offshoots and minor magazines from 1926 through 1936. This is the first time this historically important literary phenomenon which stands behind the enormous modern development of science fiction has been studied thoroughly and accurately. The heart of the book is a series of descriptions of all 1,835 stories published during this period plus bibliographic information. Supplementing this are many useful features: detailed histories of each of the magazines; an issue by issue roster of contents; a technical analysis of the art work; brief authors' biographies; poetry and letter indexes; a theme and motif index of approximately 30,000 entries; and general indexes. *Science Fiction: The Gernsback Years* is not only indispensable for reference librarians, collectors, readers and scholars interested in science fiction; it is also of importance to the study of popular culture during the Great Depression in the United States. Most of its data, which are largely based on rare and almost unobtainable sources, are not available elsewhere.
