

# Airport Master Plan **KANSAS CITY WHEELER DOWNTOWN AIRPORT**

## Chapter 1 **EXISTING CONDITIONS**

The inventory of existing conditions is the initial step in the preparation of the Kansas City Wheeler Downtown Airport (MCK) Master Plan. The inventory will serve as an overview of the airport's physical and operational features, including the runways, taxiways, aircraft aprons, hangar facilities, as well as specific information related to the airspace, air traffic activity, and the role of the airport. Finally, a summary of socioeconomic characteristics and review of existing environmental conditions on and adjacent to the airport are thoroughly detailed, which will provide further input into the study process.

Information provided in this chapter serves as the baseline for the remainder of the master plan, which is compiled using a wide variety of resources, including: applicable planning documents and financial reports; on-site visits; interviews with airport staff, tenants, and users; aerial and ground photography; federal, state, and local publications; and project record drawings.
