Predictive Edge in Technical Analysis Charles G. Koonitz, Predictive technical analysis does not rely on the use of a crystal ball or the interpretation of tarot cards Instead it examines key concepts that are essential to mastering the art of trading stocks This book is for anyone looking to improve their technical analysis skills and tired of being manipulated by the financial institutions that dominate the markets This book explores four key concepts in depth that are essential for

predicting market movements

Technical Analysis

The book begins by establishing the foundations of technical analysis including topics such as time frames charts support and resistance trends leading and lagging indicators and the concepts of divergence and convergence

Price Action

This segment focuses on reading prices without the aid of indicators Price Action emphasizes the analysis of Japanese candlestick movements to detect trading signals In addition the technique focuses on M and W movements which are considered to be the most relevant

Market Structure

A section is reserved for analyzing market structure to counter false signals Market Structure offers an alternative way of entering the markets with the security of clear signals Market entry is based on strict unambiguous rules eliminating any ambiguity

Fibonacci retracements

Unquestionably the swing trader's most important tool retracements are indispensable for assessing downside and upside areas The book shows how to use Fibonacci ratios and extensions providing practical examples and strategies to incorporate into analysis The book is enhanced by more than 120 full color charts and tables that help readers understand concepts techniques and strategies It offers advanced insights that can be integrated into current strategies or used to create novel trading approaches

Mind, Money & Markets Dave Harder, Janice Dorn M.D. Ph.D., 2014-10-10

After losing much of his money when the South Sea Bubble burst in 1720 English physicist and mathematician Isaac Newton stated I can calculate the motion of heavenly bodies but not the madness of people Even though Isaac Newton was a brilliant man he did not realize that markets function in a way that is opposite to almost everything else we do For example if people are lining up around the block to purchase an iPad it is a sign that it is a good product If people are lining up around the block to buy a condominium it is a bad sign for real estate Markets do not always act in a rational or logical manner *Mind Money Markets* explains why they act the way they do It is critical for every person to understand this in order to make wise decisions ranging from buying a home to operating a business Expert advice is much less reliable than we expect it to be because no one can accurately predict the future on a consistent basis Gigantic losses like the 6.2 billion trading loss at JP Morgan in 2012 show that investors are not giving momentum following the trend the respect it deserves *Mind Money Markets* offers a momentum filter specifically a screening tool from which every individual and professional investor should benefit The book also provides a circuit breaker that enables investors to limit losses in case of an unexpected event in financial markets Using powerful and poignant analogies from their life experiences including Dave Harder's twelve years as a Search and Rescue volunteer we provide readers with a simple discipline to preserve precious hard earned capital during severe downturns and to outperform benchmarks when markets are in an uptrend It is easier to know what to do than to actually do it Psychiatrist Dr Janice Dorn specializes in helping traders and investors deal with emotions and aspects of human nature that hinder them from making astute investment decisions for stocks bonds real estate currencies or commodities We have passed on many words of wisdom collected from market sages and great thinkers We also highlight some major misconceptions about investing and show the reader how to overcome them and prosper With a compelling mixture of fascinating stories and more than 100

colored charts and photographs this is truly a unique work about how human beings react to markets The book helps individual as well as professional investors to be efficient with their time and energy by teaching them to focus only on a few factors which have the most significant impact on financial markets The personalized strategies provided in these pages will enable readers to maximize gains minimize losses and have more time to spend on things that matter the most in their lives
