Masterchef Goes Large:

I Want to Change My Life Barrie Gunter, 2014-07-24 Competition talent shows have been among the most popular on television in the 21st century. The producers of these shows claim to give ordinary people extraordinary opportunities to change their lives by showcasing a specific skill leading to a new career trajectory. Most participants will claim that they entered to get a big break and to develop a career they have always dreamed of. To what extent do these shows deliver on such promises? Following through what happens to leading contestants in singing, entertainment, modelling, cooking, and business/entrepreneur competitions, this book shows that few go on to achieve lasting success in their chosen career. Many return to obscurity or to their previous lives. Some enjoy a low level career in the new direction delivered by the competition they entered. Just a few become truly successful. The pop and entertainment themed contests have discovered just a handful of major pop stars and entertainers out of many hundreds who have taken part after the initial auditions. Turning to the cookery or business franchises, there are few who go on to achieve lasting success in their chosen career. In these, it is equally likely that the winners go on to enjoy success with media careers rather than as chefs or entrepreneurs. The most successful franchise of all is the fashion model competition, *Next Top Model*, which has yielded a high hit rate in terms of career success. What the analysis here also reveals is that it isn't only the winners who ultimately benefit the most from their appearances in these shows. Moreover, television picks its own stars by recruiting contestants because they are telegenic or have a good backstory as much as for their relevant talents. In this way, a talent hungry medium has co-opted these franchises to replenish its own needs.

Celebrity Mad Brett Kahr, 2019-08-28 This short book by Professor Brett Kahr provides a psychoanalytic understanding of fame and celebrity in the early twenty-first century, building upon the bedrock foundations of the Freudian corpus. The book is divided into six chapters. Chapter One explores the psychology of the celebrity, questioning narcissistic and exhibitionist psychopathology, while Chapter Two examines the psychological state of those who revel in the fame of others and in celebrity culture more broadly, and offers a discussion of the Celebrity Worship Syndrome. Chapter Three provides a very brief history of the concept of celebrity itself, arguing that contrary to popular opinion, the culture of celebrification cannot be blamed on twenty-first century media moguls but rather that such a preoccupation with famous personalities can be traced back to ancient times and demonstrates the need to broaden our analysis to include the role of deep unconscious psychological forces. In Chapter Four, Kahr reviews some important theoretical concepts advanced by Freud and Winnicott which provide an important foundation for the psychoanalytic study of fame, while Chapter Five provides a more comprehensive theory of the unconscious psychological roots of the need to worship fame and to seek it, drawing upon a multitude of sources ranging from psychoanalytic theory and developmental psychological research to film archaeology and perhaps surprisingly the history of infanticide. The book concludes in Chapter Six by studying the psychodynamics of celebrity and fame, arguing that being recognised by one's family and friends in the intimate context of home life may well be

the very best way to become a celebrity *Celebrity Mad* outlines a psychoanalytic theory of the roots of our obsession with fame It will be of great interest to psychoanalytic practitioners and researchers as well as to readers interested in the psychology of fame

Amateur Media Dan Hunter, 2013 The rise of Web 2.0 has pushed the amateur to the forefront of public discourse public policy and media scholarship Typically non salaried non specialist and untrained in media production amateur producers are now seen as key drivers of the creative economy But how do the activities of citizen journalists fan fiction writers and bedroom musicians connect with longer traditions of extra institutional media production This edited collection provides a much needed interdisciplinary contextualisation of amateur media before and after Web 2.0 Surveying the institutional economic and legal construction of the amateur media producer via a series of case studies it features contributions from experts in the fields of law economics and media studies based in the UK Europe and Singapore Each section of the book contains a detailed case study on a selected topic followed by two further pieces providing additional analysis and commentary Using an extraordinary array of case studies and examples from YouTube to online games from subtitling communities to reality TV the book is neither a celebration of amateur production nor a denunciation of the demise of professional media industries Rather this book presents a critical dialogue across law and the humanities exploring the dynamic tensions and interdependencies between amateur and professional creative production This book will appeal to both academics and students of intellectual property and media law as well as to scholars and students of economics media cultural and internet studies
