Planetary Citizenship:

Educating the Global Environmental Citizen Greg William Misiaszek, 2017-12-15 Misiaszek examines the disconnection between critical global citizenship education models and ecopedagogy which is grounded in Paulo Freire's pedagogy. Exploring how concepts of citizenship are affected by globalization, this book argues that environmental pedagogues must teach critical environmental literacies in order for students to understand global environmental issues through the world's diverse perspectives. Misiaszek analyses the ways environmental pedagogies can use aspects of critical global citizenship education to better understand how environmental issues are contextually experienced and understood by societies locally and globally through issues of globalization, colonialism, socio-economics, gender, race, ethnicities, nationalities, indigenous issues, and spiritualities.

Value-Creating Global Citizenship Education for Sustainable Development Namrata Sharma, 2020-10-13 This volume brings together marginalized perspectives and communities into the mainstream discourse on education for sustainable development and global citizenship. Building on her earlier work, Sharma uses non-western perspectives to challenge dominant agendas and the underlying Western worldview in the UNESCO-led discourse on global citizenship education. Chapters develop the theoretical framework around the three domains of learning within the global citizenship education conceptual dimensions of UNESCO: the cognitive, socio-emotional, and behavioral, and offer practical insights for educators. Value-creating global citizenship education is offered as a pedagogical approach to education for sustainable development and global citizenship in addition to and complementing other approaches mentioned within the recent UNESCO guidelines.

Conversations on Global Citizenship Education Emiliano Bosio, 2021-02-01 This volume offers a remarkable collection of theoretically and practically grounded conversations with internationally recognized scholars who share their perspectives on Global Citizenship Education (GCE) in relation to university research, teaching, and learning. *Conversations on Global Citizenship Education* brings together the narratives of a diverse array of educators who share their unique experiences of navigating GCE in the modern university. Conversations focus on why and how educators' theoretical and empirical perspectives on GCE are essential for achieving an all-embracing GCE curriculum which underpins global peace. Drawing on the Freirean concept of conscientization, GCE is presented as an educational imperative to combat growing inequality, seeping nationalism, and post-truth politics. This timely volume will be of interest to educators who are seeking to develop their theoretical understanding of GCE into teaching practice, researchers, and students who are new to GCE and who seek dynamic starting points for their research, and a general audience who are interested in learning more about the history, philosophy, and practice of GCE.
