*Getting to the Core of Literacy for History/Social Studies, Science, and Technical Subjects, Grades 6–12* Vicky Giouroukakis, Maureen Connolly, 2013-05-14 Literacy is not just for English teachers anymore. The new Common Core English Language Arts Standards aren't just for English teachers. Fluent reading and writing are critically important to the study of history, social studies, science, and technical subjects too. What's more, the progress your students make is directly tied to their ability to process information they read and to express their ideas in writing. So how do you make literacy a focus of your teaching without taking time away from essential content? This practical resource, packed with teacher-tested CCSS-based sample lessons, shows you how using the Backward Design approach to set and meet your goals. Each lesson template includes the teaching strategies you'll utilize, ways to incorporate technology and media, variations for differentiation and interdisciplinary connections, links to the work of major educational theorists. Following these models, you'll set the CCSS in your sights and develop lessons that both meet standards and fit your classroom. Before you know it, you'll be infusing reading and writing across your curriculum in purposeful and meaningful ways. *Literacy Assessment and Metacognitive Strategies* Stephanie L. McAndrews, 2020-06-25 Packed with useful tools, this practitioner guide and course text helps educators assess and teach essential literacy skills and strategies at all grade levels, PreK–12. All six literacy modalities are addressed: listening, speaking, reading, writing, viewing, and visually representing. Chapters on specific literacy processes integrate foundational knowledge, assessments, and strategies for students who need support in literacy, including English language learners. Presented are dozens of authentic assessments along with differentiation ideas. In a large size format for easy photocopying, the book features more than 70 reproducible assessment forms and resources. Purchasers get access to a webpage where they can download and print the reproducible materials. *Linking Reading Assessment to Instruction* Arleen Shearer Mariotti, Susan P. Homan, 2012-11-12 Now in its Fifth Edition, this text applies current theory to classroom practice by providing in each chapter a brief explanation of major concepts followed by guided practical experience in administering, scoring, and interpreting reading assessment techniques. The Fifth Edition is revised and updated to reflect recent developments in the field. New activities are included throughout. A Companion Website for instructors and students, a value-added feature, is new for this edition. Like previous editions of this popular text, this edition emphasizes the use of assessment and diagnosis for instructional decision making. Stresses the use of informal assessment techniques reflecting the current emphasis in educational assessment theories but also includes usage of standardized test scores. Provides numerous classroom-tested hands-on activities giving students step-by-step experiences in administering, scoring, and interpreting assessment techniques. This text covers assessment diagnosis in all five critical reading areas: phonemic awareness, phonics, vocabulary, fluency, and comprehension. It is designed for undergraduate and graduate courses in reading diagnosis, reading methods that include a diagnostic component, and for in-service courses on reading literacy development and diagnosis. <http://www.pearson.com/9780205189984>
