God, Value, and Nature Fiona Ellis, 2014 This book takes on board the assumption that we should be naturalists and argues that the position can accommodate the idea of God Naturalism and theism are no longer logically incompatible and the fashionable atheism of our times is shown to depend upon an unwarranted commitment to scientism and a questionable conception of God

The Problem of Objectivity in Gadamer's Hermeneutics in Light of McDowell's Empiricism Morten S. Thanning, 2015-08-21 This book reassesses Gadamer's hermeneutics by bringing it into a dialogue with John McDowell's minimal empiricism. It employs the resources of McDowell's minimal empiricism to address the transcendental and ontological presuppositions for objective experience and understanding while retaining Gadamer's emphasis on the historicity of understanding. By means of the dialogue with McDowell, the book develops a hermeneutical conception of objectivity and perceptual experience which also entails reinterpretations of Gadamer's notions of tradition, practical wisdom, and meaning. The book explores the philosophical space beyond the analytic/Continental divide and demonstrates that hermeneutics is not limited to a reflection on understanding as it is practiced in the human sciences but can be revived as a distinct and cogent philosophical approach with a transcendental and ontological dimension. Thanning's book is a richly detailed, well-argued, and coherent presentation of a defensible and potentially very important philosophical position. It demonstrates an impressively deep understanding of the literature both from the phenomenological tradition and from the part of the analytical tradition inspired by Wilfrid Sellars to which John McDowell belongs. Being a substantial philosophical achievement in its own right, the book raises far-reaching questions that will be of interest to a wide audience. Dr. Steven Crowell, Rice University, Houston, USA. Morten Thanning's book is an important contribution to the discourse of philosophical hermeneutics. Thanning extensively discusses a topic which recent debates have touched upon but which up to now has not been the subject matter of concentrated scholarly work: the relation between Gadamer's hermeneutics and McDowell's empiricism. With Thanning's interpretation, Gadamer's work can be read anew as concerning the problem of hermeneutical objectivity. Prof. Dr. Gnter Figal, University of Freiburg, Germany

The Philosophy of Reenchantment Michiel Meijer, Herbert De Vriese, 2020-10-27 This book presents a philosophical study of the idea of reenchantment and its merits in the interrelated fields of philosophical anthropology, ethics, and ontology. It features chapters from leading contributors to the debate about reenchantment, including Charles Taylor, John Cottingham, Akeel Bilgrami, and Jane Bennett. The chapters examine neglected and contested notions such as enchantment, transcendence, interpretation, attention, resonance, and the sacred or reverence-worthy notions that are crucial to human self-understanding but have no place in a scientific worldview. They also explore the significance of adopting a reenchanting perspective for debates on major concepts such as nature, naturalism, God, ontology, and disenchantment. Taken together, they demonstrate that there is much to be gained from working with a more substantial and affirmative concept of reenchantment understood as a fundamental existential orientation towards what is seen as meaningful and of value. *The Philosophy of Reenchantment* will be of interest to scholars and advanced students in philosophy, especially those working in moral philosophy, metaphysics, philosophy of religion, theology, religious studies, and sociology.

Naturalism and Normativity Mario De Caro, David Macarthur, 2010 Normativity concerns

what we ought to think or do and the evaluations we make For scientific naturalists the moral is reached by reducing the normative to the nonnormative For orthodox nonnaturalists the moral is found in the transcendent realm of norms This book challenges both sides of this debate **Art and Ethics in a Material World** Jennifer McMahon,2013-11-26 In this book McMahon argues that a reading of Kant s body of work in the light of a pragmatist theory of meaning and language which arguably is a Kantian legacy leads one to put community reception ahead of individual reception in the order of aesthetic relations A core premise of the book is that neo pragmatism draws attention to an otherwise overlooked aspect of Kant s Critique of Aesthetic Judgment and this is the conception of community which it sets forth While offering an interpretation of Kant s aesthetic theory the book focuses on the implications of Kant s third critique for contemporary art McMahon draws upon Kant and his legacy in pragmatist theories of meaning and language to argue that aesthetic judgment is a version of moral judgment a way to cultivate attitudes conducive to community which plays a pivotal role in the evolution of language meaning and knowledge *In the Light of Experience* Johan Gersel,Rasmus Thybo Jensen,Morten S. Thaning,Søren Overgaard,2018-06-13 How does the idea that perception must provide reasons for our empirical judgements constrain our conception of our perceptual experiences This volume presents ten new essays on perception which in different ways address this fundamental question Charles Travis and John McDowell debate whether we need to ascribe content to experience in order to understand how it can provide the subject with reasons Other essays address issues such as the following What exactly is the Myth of the Given and why should it be worthwhile to try to avoid it What constitutes our experiential reasons Is it experiences themselves the objects of experiences or facts about our experiences Should we conceive of experiential reasons as conclusive reasons How should we conceive of the fallibility of our perceptual capacities if we think of experiences as capable of providing conclusive reasons How should we conceive of the objects of experience The contributors offer a variety of views on the reason giving potential of experience engaging explicitly and critically with each other s work

‘Yo!’ and ‘Lo!’ Rebecca Kukla,Mark Lance,2009 Much of 20th century philosophy approached metaphysical and epistemological issues through an analysis of language This book demonstrates that non declarative speech acts including vocative hails Yo and calls to shared attention Lo are as fundamental to the possibility and structure of meaningful language as are declaratives Natural Moralities David B Wong,2009-03-03 In this book David B Wong defends an ambitious and important new version of moral relativism He does not espouse the type of relativism that says anything goes but he does start with a relativist stance against alternative theories such that there need not be only one universal truth Wong proposes that there can be a plurality of true moralities existing across different traditions and cultures all with one core human question as to how we can all live together The Philosophy of Philosophy Timothy Williamson,2021-09-23 The Philosophy of Philosophy The Blackwell Brown Lectures in Philosophy The Philosophy of Philosophy presents an original unified concept of philosophy as a non natural science In this provocative work distinguished philosopher Timothy Williamson challenges

Knowing by Perceiving Alan Millar, 2019-01-24 Epistemological discussions of perception usually focus on something other than knowledge They consider how beliefs arising from perception can be justified With the retreat from knowledge to justified belief there is also a retreat from perception to the sensory experiences implicated by perception On the most widely held approach perception drops out of the picture other than as the means by which we are furnished with the experiences that are supposed to be the real source of justification experiences that are conceived to be no different in kind from those we could have had if we had been perfectly hallucinating In this book a radically different perspective is developed one that explicates perceptual knowledge in terms of recognitional abilities and perceptual justification in terms of perceptually known truths as to what we perceive to be so Contrary to mainstream epistemological tradition justified belief is regarded as belief founded on known truths The treatment of perceptual knowledge is situated within a broader conception of epistemology and philosophical method Attention is paid to contested conceptions of perceptual experience to knowledge from perceived indicators and to the standing of background presuppositions and knowledge that inform our thinking Throughout the discussion is sensitive to ways in which key concepts figure in ordinary thinking while remaining resolutely focused on what knowledge is and not just on how we think of it

On Thinking and the World Sandra M. Dingli, 2017-07-05 John McDowell's *Mind and World* has since its publication in 1994 become a seminal text putting forward many new ideas on the manner in which concepts mediate the relation between minds and the world Yet McDowell's ideas are not easy to comprehend In this book Sandra Dingli both elaborates and simplifies McDowell's ideas in order to give greater clarity to them and to assist in the understanding and appreciation of his work Dingli selects five particular contemporary philosophical topics which McDowell deals with and investigates in detail the implications of particular points of view analysing the current literature on each topic and drawing out shortcomings and possibilities for overcoming them This work is then both a critique and complement to McDowell's text McDowell's project is to dissolve a number of dualisms such as sensibility and understanding conceptual and non conceptual content scheme and content and reason and nature Dingli critically analyses each of these and claims that a proper understanding of the philosophical method of quietism is important for a correct understanding of this text concluding that McDowell does not go far enough in his attempt to attain peace for philosophy as traditional dichotomies such as that of realism and anti realism still appear to exert a grip on his thinking
