Reading Specialists and Literacy Coaches in the Real World Brenda A. Shearer, DeBorah A.

Carr, MaryEllen Vogt, 2018-07-23 Now more than ever the roles and responsibilities of today's literacy professionals are expanding. Many recent developments require a closer look at the changing careers of reading specialists, coaches, and administrators, leading to an emphasis on increased collaboration and coaching integration of standards and student improvement initiatives. Both scholarly and practical, *Reading Specialists and Literacy Coaches in the Real World* provides the support and guidance both literacy and content area teachers need. The learning goals and outcomes in each chapter are aligned with ILA's Standards for the Preparation of Literacy Professionals 2017, providing opportunities for group inquiry and new perspectives on professional learning. The authors examine the historical, political, and social forces that shape evidence-based practice and incorporate significant developments in intervention, assessment, and adolescent literacy. Their impact on instruction and the needs of students are studied in conjunction with RtI, MTSS, progress monitoring, and differentiation. Instructional technologies related to twenty-first-century literacies, updated information about effective academic language instruction for English learners, and a moral imperative for fostering equity, social justice, and global perspectives. The Fourth Edition also provides Resource Materials to support the text, giving it a great deal of flexibility to explore projects for portfolios and self-assessment. In the real world, as learners among learners, literacy professionals use their experiences and voices for advocacy to help prepare students for success in their lives and careers. *Visual Word*

Together, the two volumes of *Visual Word Recognition* offer a state-of-the-art overview of contemporary research from leading figures in the field. This second volume examines how research on word recognition has been linked to the study of concepts and meaning, such as how morphemes affect word recognition, how the meaning of words affects their processing, and the effect of priming on the processing of words. The book also discusses eye movement research, the reading of whole sentences and passages, how bilinguals recognize words in different languages, individual differences in visual word recognition, and the development of visual word recognition difficulties in developmental dyslexia. The two volumes serve as a state-of-the-art comprehensive overview of the field. They are essential reading for researchers of visual word recognition and students on undergraduate and postgraduate courses in cognition and cognitive psychology, specifically the psychology of language and reading. They will also be of use to those working in education and speech language therapy.

The Hidden Victims Cormac Ó Gráda, 2024-09-03 The two world wars were undoubtedly two of the most catastrophic events in human history not just for those who actually fought in them but for untold millions of civilians And even though the wars superlativeness is unquestioned our understanding of exactly how bad the civilian costs were is limited Although the numbers are better for the two wars than for

most earlier wars gaps and uncertainties remain States went to great lengths to record military casualties but civilian fatalities often went uncounted and figures were often deliberately obscured In this book renowned economic historian Cormac O Grada aims to set the record straight establishing a figure for civilian fatalities that reveals much about the nature of modern war The book builds on earlier estimates of casualties from a range of causes some reliable some approximate at best and warns against spurious precision when approximations are impossible For example while the human toll of the Jewish Holocaust is generally agreed to have been about 6 million the tolls of two other war genocides those of the Armenian community in Turkey during World War I and of the European Roma community during World War II cannot be determined with any precision Scholarly estimates of these range from 0.6 to 1.2 million and from at least 130 000 to between 250 000 and 500 000 During World War II Chinese civilians faced both a civil war and Japanese occupation and no estimate of the resulting civilian deaths which range from an implausibly low 2.5 million to 20 million is reliable The book shows that the single biggest cause of civilian deaths during the two wars were famines some of which are familiar and well documented while others have attracted research only recently and a few await systematic analysis The book covers these as well as genocides particularly the Jewish Holocaust and deaths from aerial bombing and shows how in each of these categories the numbers have been controversial and contested Most of the book deals with death but it contains accounts too of the tens of millions of displaced persons and refugees and forced labourers of civilian trauma and of sexual violence and other atrocities In the end O Grada argues that the two world wars cost at least 45 to 50 million civilian lives almost double the cost in military lives Addressing the uncertainties and inaccuracies in civilian casualties the book shows the failings of international law and gives a vital and harrowing understanding of the true cost of war
